Improving Human Learning in the Classroom provides a functional and realistic approach to facilitate learning through a demonstration of commonalities between the various theories of learning. Designed to assist educators in eliciting students' prior knowledge, providing feedback, transfer of knowledge, and promoting self-assessment, Taylor and MacKenney provide proven strategies for infusing various learning theories into a curriculum, guiding educators to find their own strategies for promoting learning in the classroom. Both quantitative and qualitative research methods investigate learning theories and reforms in education. Quantitative data sources build the theoretical framework for educating the student, as well as developing strategies for closing the achievement gap. Taylor and MacKenney fuse personal experiences with solid strategies for human learning.

Albania is not well known by outsiders; it was deliberately closed to the outside world during the communist era. Now it has thankfully become free again, its borders are open and it can be visited, and it is increasingly integrating with the rest of Europe and beyond. Unfortunately, Albania has had its share of problems in the post-communist era; it's a land of destitution and despair, thanks in part to the Albanian mafia, which has turned the country into one of blood-feuds, kalashnikovs, and eternal crises. Yet, Albania is, in essence, a European nation like any other and will soon, it is to be hoped, advance and take its proper place in Europe and the world. The second edition of the Historical Dictionary of Albania relates the history of this little-known country through a detailed chronology, an introduction, a bibliography, appendices, and over 700 cross-referenced dictionary entries on significant persons, places, and events; institutions and organizations; and political, economic, social, cultural, and religious facets.

This book is ideal for teachers, whether they are P4C trained or just experimenting with philosophy. It will help teachers to present ideas and stimulate discussions which both accommodate and engage adolescent appetites. Are human beings flawed? Is murder an act of insanity or just plain thoughtlessness? Do we need a soul? From the fall of Icarus to the rise of Caesar this practical book draws upon history, philosophy and literature to provoke students to think, question and wonder. Divided into chapters on The World, Self, Society and Others, this resource for secondary school is written to give teachers the means to listen rather than teach and to allow the ideas and thoughts of students to form the centre of the lesson. It raises questions on the nature of evil, belief in God, slavery, consumerism, utopia, the limits of freedom, and a whole lot more. With a clear introductory outline on its use both in and out of the classroom, Provocations also contains tips and advice to help guide teachers to span the curriculum.

Applicable to History, Geography, RS, Science, Art, English and Citizenship it offers teachers of all subjects the opportunity to introduce a student-centred approach to their lessons. There is also an extensive bibliography for those who wish to explore the topics in greater depth. Provocations is a set of philosophy sessions designed for secondary school and predicated on the pedagogical methods of The Philosophy Foundation. These sessions are mature, challenging and provocative, using history, literature, myth and the world today as their basis. Each session contains particular pedagogical tips and advice and suggestions as to how they can be effectively delivered

This publication sets out the core competences needed by teachers to put democratic citizenship and human rights into practice in the classroom, throughout the school and in the wider community. It is intended for all teachers, not only specialists but teachers in all subject areas, and teacher educators working in higher-education institutions or other settings, both in pre- and in-service training. Some 15 competences are presented and grouped into four clusters. Each cluster of competences corresponds to one chapter, within which the competences are described in detail and exemplified. The reader will find progression grids and suggested developmental activities for each competence: these grids, featuring focusing, developing, established and advanced practice, aim to help teachers and teacher educators determine the level to which their professional practice corresponds, and thus identify specific and practical improvements upon which they can focus.

Masterful in its simplicity, Chronicle in Stone is a touching coming-of-age story and a testament to the perseverance of the human spirit. Surrounded by the magic of beautiful women and literature, a boy must endure the deprivations of war as he suffers the hardships of growing up. His sleepy country has just thrown off centuries of tyranny, but new waves of domination inundate his city. Through the boy's eyes, we see the terrors of World War II as he witnesses fascist invasions, allied bombings, partisan infighting, and the many faces of human cruelty—as well as the simple pleasures of life. Evacuating to the countryside, he expects to find an ideal world full of extraordinary things, but discovers instead an archaic backwater where a severed arm becomes a talisman and deflowered girls mysteriously vanish. Woven between the chapters of the boy's story are tantalizing fragments of the city's history. As the devastation mounts, the fragments lose coherence, and we perceive firsthand how the violence of war destroys more than just buildings and bridges.

The tender plant of Albanian literature grew in a rocky soil. It was late to evolve and its development, indeed its very existence, was threatened in many periods. 'Albanian Literature: A Short History' tells the story of the survival and growth of Albanian creative writing beginning with the earliest thirteenth century texts of Theodor of Shkodra, tracing the development of the modern literature of Buzuku, Budi and Bogdani, the incorporation of the Muslim influences of Frakulla and Kyykyu and continuing with the works of Cajupi and Kadare during the reign of King Zog and the Hoxha administration. A unique book that illuminates an under-researched subject, 'Albanian Literature' is an essential reference guide for all those interested in Balkan cultures, in comparative literature and in European cultural history in general.

*The Millennium Development Goals, adopted at the UN Millennium Summit in 2000, are the world's targets for dramatically reducing extreme poverty in its many dimensions by 2015?income poverty, hunger, disease, exclusion, lack of infrastructure and shelter?while promoting gender equality, education, health and environmental sustainability. These bold goals can be met in all parts of the world if nations follow through on their commitments to work together to meet them. Achieving the Millennium Development Goals offers the prospect of a more secure, just, and prosperous world for all. The UN Millennium Project was commissioned by United Nations Secretary-General Kofi Annan to develop a practical plan of action to meet the Millennium Development Goals. As an independent advisory body directed by Professor Jeffrey D. Sachs, the UN Millennium Project submitted its recommendations to the UN Secretary General in January 2005. ?The core of the UN Millennium Project's work has been carried out by 10 thematic Task Forces comprising more than 250 experts from around the world, including scientists, development practitioners, parliamentarians, policymakers, and representatives from civil society. UN agencies, the World Bank, the IMF, and the private sector.This report lays out the recommendations of the UN Millennium Project Task Force on Education and Gender Equality.? In the education sector, the Task Force recommends that countries now ?off track? expand access, overcome demand-side barriers, and implement institutional changes to make the education system more responsive and accountable.? As part of a compact with low-income countries working toward the goal of 100% primary school completion by 2015, donors and the international community must fulfill commitments already made under the Fast Track Initiative, and commit to still greater levels of support.*

*Frist published in 1997, this book aims to answer if European 'post-national' citizenship provide a practical opening and a conceptual challenge to cope with the diverse and close-circuiting crises of national European social models? What then might a new sphere of European social inclusion look like? This book also provided the first attempt to go well beyond 'national gridlock'. Old solutions will no longer do. Is new land in sight? With monetary integration almost implemented this is a highly relevant exploration of a central complementary 'common currency' in Europe's future.*

From Ismail Kadare, winner of the inaugural Man Booker International Prize – a novelist in the class of Coetzee, Pamuk, Márquez, and Rushdie – the stunning new translation of one of his major works. In the early fifteenth century, as winter falls away, the people of Albania know that their fate is sealed. They have refused to negotiate with the Ottoman Empire, and war is now inevitable. Soon enough, dust kicked up by Turkish horses is spotted from a citadel. Brightly coloured banners, hastily constructed minarets, and tens of thousands of men fill the plain below. From this moment on, the world is waiting to hear that the fortress has fallen. The Siege tells the enthralling story of the weeks and months that follow – of the exhilaration and despair of the battlefield, the constantly shifting strategies of war, and those whose lives are held in the balance, from the Pasha himself to the artillerymen, astrologer, blind poet, and harem of women who accompany him. "Believe me," the general said. "I've taken part in many sieges but this," he waved toward the castle walls, "is above the most fearful carnage of our times will take place. And you surely know as well as I do that great massacres always give birth to great books. You really do have an opportunity to write a thundering chronicle redolent with pitch and blood, and it will be utterly different from the graceful whines composed at the fireside by squealers who never went to war." Brilliantly vivid, as insightful as it is compelling, The Siege is an unforgettable account of the clash of two great civilisations, and a portrait of war that will resonate across the centuries.

Peopled by larger-than-life heroes and villains, charged with towering questions of good and evil, Atlas Shrugged is Ayn Rand's magnum opus: a philosophical revolution told in the form of an action thriller–nominated as one of America's best-loved novels by PBS's The Great American Read. Who is John Galt? When he says that he will stop the motor of the world, is he a destroyer or a liberator? Why does he have to fight his battles not against his enemies but against those who need him most? Why does he fight his hardest battle against the woman he loves? You will know the answer to these questions when you discover the reason behind the baffling events that play havoc with the lives of the amazing men and women in this book. You will discover why a productive genius becomes a worthless playboy...why a great steel industrialist is working for his own destruction...why a composer gives up his career on the night of his triumph...why a beautiful woman who runs a transcontinental railroad falls in love with the man she has sworn to kill. Atlas Shrugged, a modern classic and Rand's most extensive statement of Objectivism–her groundbreaking philosophy–offers the reader the spectacle of human greatness, depicted with all the poetry and power of one of the twentieth century's leading artists.

Reinhart Koselleck (1923–2006) was one of most imposing and influential European intellectual historians in the twentieth century. Constantly probing and transgressing the boundaries of mainstream historical writing, he created numerous highly innovative approaches, absorbing influences from other academic disciplines as represented in the work of philosophers and political thinkers like Hans Georg Gadamer and Carl Schmitt and that of internationally renowned scholars such as Hayden White, Michel Foucault, and Quentin Skinner. An advocate of "grand theory," Koselleck was an inspiration to many scholars and helped move the discipline into new directions (such as conceptual history, theories of historical times and memory) and across disciplinary and national boundaries. He thus achieved a degree of international fame that was unusual for a German historian after 1945. This book not only presents the life and work of a "great thinker" and European intellectual, it also contributes to our understanding of complex theoretical and methodological issues in the cultural sciences and to our knowledge of the history of political, historical, and cultural thought in Germany from the 1950s to the present.

*A chance meeting with a charismatic photographer will forever change Elizabeth's life. Until she met Richard, Elizabeth's relationship with Georgia O'Keeffe and her little-known Hawaii paintings was purely academic. Now it's personal. Richard tells Elizabeth that the only way she can truly understand O'Keeffe isn't with her mind—it's by getting into O'Keeffe's skin and reenacting her famous nude photos. In the intimacy of Richard's studio, Elizabeth experiences a new, intoxicating abandon and fullness. It never occurs to her that the photographs might be made public, especially without her consent. Desperate to avoid exposure—she's a rising star in the academic world and the mother of young children—Elizabeth demands that Richard dismantle the exhibit. But he refuses. The pictures are his art. His property, not hers. As word of the photos spreads, Elizabeth unwittingly becomes a feminist heroine to her students, who misunderstand her motives in posing. To the university, however, her actions are a public scandal. To her husband, they're a public humiliation. Yet Richard has reawakened an awareness that's haunted Elizabeth since she was a child—the truth that cerebral knowledge will never be enough. Now she must face the question: How much is she willing to risk to be truly seen and known?*
