This book presents  
all the publicly  
available questions

from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.

Effective science teaching requires

creativity,  
imagination, and  
innovation. In light  
of concerns about  
American science  
literacy, scientists  
and educators  
have struggled to  
teach this discipline  
more effectively.
