A Reference Handbook of the Medical Sciences Embracing the Entire Range of Scientific and Allied Sciences

Here is a book written without the slightest nod to political correctness. It assumes that the reader and writer are equals in every way: intelligence, experience and the ability to exert common sense. The author is not trying to sell anything or prove anything; it is presented as friends in earnest discussion with a few comic breaks thrown in. It is a collection of thoughts from a man who has done everything from work in a labor gang to founding a non-profit organization devoted to philosophy. Who worked as a janitor to get through college and became the CEO of five corporations. Who has been rich and poor and believes that the sole primary purpose of human existence is learning. You won't have to guess about this writer's opinions, they will come to you in short, concise, clear bursts. You will love some, hate some others and, in the end, agree that you have been entertained in a stimulating fashion.

Rushlow has been there, seen it, done it and now he tells it.

The Medical Department of the United States Army in the World War: Finance and supply, by E. P. Wolfe. 1928

U.S. Geological Survey Water-supply Paper

Letters and numbers have become an indispensable part of our everyday life. Children come into contact with letters and numbers at a very early age. Every child who recognizes letters, who practices them and learns them, will find it easier to read and write extended texts later on. This ABC and numbers book is intended to make your children fit at their first contact with letters and numbers. BOOK FEATURES * 62 sheets/125 pages * Premium matte cover design * Easy-to-follow dotted lines to start learning the alphabet as well as numbers 0-9 to improve your child's handwriting skills * For ages 3-5 to practice fine motor skills * Perfectly sized at 8.5"x11" * Essential writing practice for preschool and kindergarten The alphabet has a fixed structure. It begins with the letter A and ends with the letter Z. This book is also structured in this way for better orientation. After the alphabet, we have added all numbers from 0-9. Your child can work with this paper quite freely. In practice, it has been shown that many children start with letter A (or number 1) and later on, they continue working with their favorite letters and numbers. This is perfectly fine because children should learn that letters and numbers have a meaning attached to them. Give your child enough time and space to work through the book. Once your child has mastered all the exercises, he or she will be able to learn to handwrite quickly. Do not hesitate to invest in your child's education right now! One click on "Buy now with 1-Click" is enough.
