Linklater Resonance Ladder

This bestselling book by one of the world’s foremost voice and acting coaches is a classic in its field. Practical, passionate and inspiring, It teaches how to use the voice fully and expressively, without fear and in any situation. Patsy Rodenburg has trained thousands of actors, singers, lawyers, politicians business people, teachers and students: her book distills that knowledge and experience so that everyone can enjoy the right to speak. This second edition contains new revisions and additional content taking into account the effect of social media on communication skills, the need for empathetic listening, how scientific discovery now illuminates why and how voice exercises work and cultural and global issues of ethics and storytelling.

Learn to turn a simple screenplay into a visual masterpiece! Top production designers share their real-life experiences to explain the aesthetic, narrative, and technical aspects of the craft. Step by step, aspiring filmmakers will discover sound instruction on the tools of the trade, and established filmmakers will enjoy a new outlook on production design. They will learn, for example, the craft behind movie magic—such as how to create a design metaphor, choose a color scheme, use space, and work within all genres of film, from well-funded studio projects to “guerilla filmmaking.” This indispensable resource also contains a history of movie making and guidelines for digital production design. For the experienced filmmaker seeking new design ideas to the struggling newcomer stretching low-budget dollars, this book makes the concepts of production design accessible. Allworth Press, an imprint of Skyhorse Publishing publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don’t aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

Geomorphometry is the science of quantitative terrain characterization and analysis, and has traditionally focused on the investigation of terrestrial and planetary landscapes. However, applications of marine geomorphometry have now moved beyond the simple adoption of techniques developed for terrestrial studies, driven by the rise in the acquisition of high-resolution seafloor data and by the availability of user-friendly spatial analytical tools. Considering that the seafloor represents 71% of the surface of our planet, this is an important step towards understanding the Earth in its entirety. This volume is the first one dedicated to marine applications of geomorphometry. It showcases studies addressing the five steps of geomorphometry: sampling a surface (e.g., the seafloor), generating a Digital Terrain Model (DTM) from samples, preprocessing the DTM for subsequent analyses (e.g., correcting for errors and artifacts), deriving terrain attributes and/or extracting terrain features from the DTM, and using and explaining those terrain attributes and features in a given context. Throughout these studies, authors address a range of challenges and issues associated with applying geomorphometric techniques to the complex marine environment, including issues related to spatial scale, data quality, and linking seafloor topography with physical, geological, biological, and ecological processes. As marine geomorphometry becomes increasingly recognized as a sub-discipline of geomorphometry, this volume brings together a collection of research articles that reflect the types of studies that are helping to chart the course for the future of marine geomorphometry.

Traditional valuation approaches are increasingly recognised as being insufficient to address the wicked valuation problems of the diverse peoples and groups that inhabit the globe from north, south, east to west. This book demonstrates the limitations of science and, in particular economics, as the foundation on which valuations are traditionally based. It demonstrates the importance of and provides justification for the personal, cultural values and norms which underpin our assessment of “value”, and the fact that these vary across the world. In Wicked Valuations Michael McDermott develops a means of engaging with highly complex valuation problems. His autoethnography provides a lens to draw on knowledge and experience from his 40 years in land valuation in Africa and the Asia-Pacific, while documentary analysis is used to draw in the views of other valuation practitioners and scholars who are becoming increasingly aware of the need to develop ways to adapt land valuation processes to the complexity of our contemporary landscapes.

This book on the psychology of white collar criminals discusses various cases of financial crime, while also attempting to delve into the minds of the criminals in question. The literature on this topic is growing as it gains momentum in the scientific field, as a result of the extremely negative impact white collar crime has on its victims. Because there is considerable damage and vulnerability from these crimes, it is important to begin to classify them, and to understand the minds of those that commit these offenses. While the current literature is not extensive, this work provides a closer look into the various ethical and legal facets of financial crime, and helps to uncover the social, psychological and neurological factors that intersect in the minds of those criminals.

18 essays on the subject. With contributions by Mallerie, Stephen Lansing, David Guss, Karl Young, Dennis Tedlock, Becky Cohen, Jed Rasula, Alison Knowles, George Quasha, Tina Oldknow, Dick Higgins, Edmond Jabes, Paul Eluard, Gershon Scholem, and Herbert Marcuse.

This comprehensive book reviews all aspects of cancers of the mouth and oropharynx with the aim of equipping advanced students and practitioners in the early stages of specialist training with an up-to-date guide and reference. A multinational team of authors – all experts in the field of oral oncology – provide illuminating contributions on the full range of relevant topics: epidemiology, risk factors, clinical features, staging and prognostic factors, pathology, diagnostic techniques, disease prevention, surgery, radiotherapy, and chemotherapy. Molecular biology, molecular targeted therapies for advanced cases, and future diagnostic and prognostic applications of new technologies also receive careful attention. In providing a wealth of essential information and guidance in a practical format, the book will be a superb asset for senior graduate students in dentistry and specialist trainees in head and neck oncology. It will also be of high value to the many physicians, surgeons, pathologists, dentists, and specialists involved in the prevention, diagnosis, and management of squamous cell carcinomas of the oral cavity and oropharynx.

Voice and Communication Theory for the Transgender/Gender Diverse Client: A Comprehensive Clinical Guide, Third Edition remains a must-have resource for speech-language pathologists, voice clinicians and trainers who assist transgender/gender diverse clients in aligning their communication with their gender identity. Such goals for transfeminine, transmasculine and gender diverse people are far from insurmountable given appropriate training. This third edition builds on the work of the first two editions, and meets the clinical and training needs of an even larger and better-informed core of speech language pathologists and trainers. Enhancements to this edition include significantly expanded chapters on counseling, psychotherapy, theater, non-verbal communication, singing, vocal health, medical considerations, and the historical perspectives on evidence-based research as well as a call to action to meet the needs of trans youth. Chapters cover each aspect of a communication training program, including case studies, summaries, appendices and an extensive bibliography, as well as an outline of therapy protocols and ideas for transmasculine, transfeminine and gender diverse clients. New to this edition: A new co-editor, Jack Pickering, brings a fresh perspective from extensive experience in transgender voice and communication trainingA comprehensive chapter addressing research and the voice and communication needs of transmasculine individualsA chapter focusing on the needs of trans youth, future directions in this area, and the role of SLPs with this unique populationA practical chapter on psychotherapy and the relationship between the SLP and psychotherapist/social worker and how these professionals work in tandem to help in the entire transition processA chapter on counseling for the transgender/gender diverse client, with step by step practical information that can also be used for counseling with all populations seen by SLPsA practical chapter on theater giving the perspectives from two transgender actresses’ personal experiences, a cisgender actress/voice clinician, and a cisgender voice/theater coach/teacherAn expanded medical chapter outlining foundational information on terminology, development, endocrinology and surgeries as well as the physician’s role and best practice in the transition process for each clientUpdated and expanded chapters on the role of multidisciplinary considerations for the transgender/gender diverse client, and assessment of these clients, in all aspects of pitch and inflection, the art and science of resonance, non-verbal communication, and group therapy and discharge. This seminal text guides clinicians and trainers who work with the transgender/gender diverse population, in designing and administering a mindful, focused, and appropriate treatment plan. Speech-language pathologists, voice coaches, ENT physicians, professors and anyone working in the areas of voice, singing, and the vocal performing arts, will find this text to be an essential resource.

For directors, voice and dialect coaches, Alexander teachers, medical specialists, speech pathologists, actors and singers and anyone interested in the performers voice in the theatre, this book provides an overview of basic voice and speech production, the Alexander technique and ways to integrate these principles into the rehearsal process and methods for working most effectively with voice and speech/Alexander coaches.

First published in Germany in 1929, The End and the Beginning is a lively personal memoir of a vanished world and of a rebellious, high-spirited young woman’s struggle to achieve independence. Born in 1883 into a distinguished and wealthy aristocratic family of the old Austro-Hungarian Empire, Hermynia Zur Muhlen spent much of her childhood travelling in Europe and North Africa with her diplomat father. After five years on her German husband’s estate in czarist Russia she broke with both her family and her husband and set out on a precarious career as a professional writer committed to socialism.

Besides translating many leading contemporary authors, notably Upton Sinclair, into German, she herself published an impressive number of politically engaged novels, detective stories, and children’s fairy tales. Because of her outspoken opposition to National Socialism, she had to flee her native Austria in 1938 and seek refuge in England, where she died, virtually penniless, in 1951. This revised and corrected translation of Zur Muhlen’s memoir – with extensive notes and an essay on the author by Lionel Gossman – will appeal especially to readers interested in women’s history, the Central European historical world that came to an end with the First World War, and the culture and politics of the late nineteenth and early twentieth centuries.

The 5th edition of this best-selling textbook provides a systematic and comprehensive introduction to the main theoretical approaches in the study of international relations. While maintaining focus on the core theories and assessing the importance of theory in the study of International Relations, this edition has been updated throughout to take account of major events and developments, such as the Arab Spring and to reflect the developments in the field, including new material on neo-realism and neo-liberalism, post-colonialism and cosmopolitanism. Each chapter is written by a leading expert on the theory, elucidating the concepts and its application to field coverage whilst maintaining an objective perspective in their evaluations. This text can be used as reference work for particular theories, or as a tool to learn the use and importance of theory, as well as the particulars of each school of thought. This text is accessible to students on courses across the world, and it assumes no prior knowledge of any of the theories, making it the ideal companion as students begin studying theories of International Relations, whether at undergraduate or Master’s level.

(Applause Books). Standard Speech is an anthology of essays from VASTA (the Voice and Speech Trainers Association) on a variety of topics of interest to actors, voice and speech teachers. Exploring the idea of what should be the standards for good speech this volume offers views from more than 40 top experts on the subject. Also essays on Coaching, Singing, Vocal Health, Verse and Dialect Accent studies. A must for the serious student of voice and speech.

A Wholistic Approach to Singing

Teaching Sound Film

In The Naked Voice, W. Stephen Smith invites all singers to improve their vocal technique through his renowned and time-tested wholistic method. Focusing not only on the most important technical, but also on the often overlooked psychological and spiritual elements of learning to sing, his book allows readers to develop their own full and individual identities as singers. With philosophies and techniques drawn from a lifetime of teaching voice, Smith demonstrates how one can reveal the true unique sound of one’s own voice by singing with the whole self. The master’s method, presented in concrete and comprehensible terms with helpful illustrations, is enhanced by a CD containing exercises performed by singers from Smith’s own studio-singers whose talent and training bring them across the country and around the world. The clear and easy style of *The Naked Voice* welcomes the reader into Smith’s teaching studio, and into conversation with Smith himself as he presents the six simple and elegant exercises that form the core of his method. These exercises provide a foundation for free singing, and lead singers through the step-by-step process of mastering the technique. Throughout, Smith speaks sympathetically and encouragingly to the singer in search of an unencumbered and effective approach to the art. The Naked Voice is a must-read for all singers, giving teachers and students, amateurs and professionals, access to the methods and concepts that have earned Smith his reputation as one of the most highly-sought-after vocal instructors in the international arena today.

Lana and Lilly Wachowski have redefined the technically difficult and topically possible while joyfully defying audience expectations. Visionary films like The Matrix trilogy and Cloud Atlas have made them the world’s most influential transgender media producers, and their coming out retroactively put trans’ aesthetics at the very center of popular American culture. Ciel M. Keegan views the Wachowskis’ films as an approach to trans’ experience that maps a transgender journey and the promise we might learn “to sense beyond the limits of the given world.” Keegan reveals how the filmmakers take up the relationship between trans’ gender diverse identity and assessment of these clients, in all aspects of pitch and inflection, the art and science of resonance, non-verbal communication, and group therapy and discharge. This seminal text guides clinicians and trainers who work with the transgender/gender diverse population, in designing and administering a mindful, focused, and appropriate treatment plan. Speech-language pathologists, voice coaches, ENT physicians, professors and anyone working in the areas of voice, singing, and the vocal performing arts, will find this text to be an essential resource.

Rural movements have recently emerged to become some of the most important social forces in opposition to neoliberalism. From Brazil and Mexico to Zimbabwe and the Philippines, rural movements of diverse political character, but all sharing the same social basis of dispossessed peasants and unemployed workers, have used land occupations and other tactics to confront the neoliberal state. This volume brings together, for the first time across three continents - Africa, Latin America and Asia - an intellectually consistent set of original investigations into this new generation of rural social movements. These studies seek to identify their social composition, strategies, tactics, and ideologies; to assess their relations with other social actors, including political parties, urban social movements, and international aid agencies and other institutions; and to examine their most common tactic, the land occupation, its origins, pace and patterns, as well as the responses of governments and landowners. At a more fundamental level, this volume explores the ways in which two decades of neoliberal policy - including new land tenure arrangements intended to hasten the commodification of land, and new land uses linked to global markets - have undermined the social reproduction of the rural labour force and created the conditions for popular resistance. The volume demonstrates the longer-term potential impact of these movements. In economic terms, they raise the possibility of tackling immiseration by means of the redistribution of land and the reorganisation of production on a more efficient and socially responsible basis. And in political terms, breaking the power of landowners and transnational capital with interests in land could ultimately open the way to an alternative pattern of capital accumulation and development.

The classic voice-training book for actors, teachers of voice and speech and anyone interested in vocal expression - by a pre-eminent voice teacher, actor and director. Fully revised and expanded edition. Linklater’s approach is to liberate the voice, the voice you have rather than apply vocal techniques from the outside. Her basic assumption is that everyone possesses a voice capable of expressing whatever emotion, mood or thought he/she experiences. This edition incorporates vocal exercises developed over three decades to help the voice connect visibly with language - a key element in the actor’s craft, ‘a radical breakaway from the old formal methods... an invaluable new resource... essential’ Educational Theatre Journal ‘the best and only work of its kind for vocal training’ Educational Theatre News

The Right to Speak

Critical Essays on an Indie-wed Icon

Voice and Communication Therapy for the Transgender/Gender Diverse Client

The first science fiction course in the American academy was held in the early 1950s. In the sixty years since, science fiction has become a recognized and established literary genre with a significant and growing body of scholarship. The Cambridge History of Science Fiction is a landmark volume as the first authoritative history of the genre. Over forty contributors with diverse and complementary specialties present a history of science fiction across national and genre boundaries, and trace its intellectual and creative roots in the philosophical and fantastic narratives of the ancient past. Science fiction as a literary genre is the central focus of the volume, but fundamental to its story is its non-literary cultural manifestations and influence. Coverage thus includes transmedia manifestations as an integral part of the genre’s history, including not only short stories and novels, but also film, art, architecture, music, comics, and interactive media. Drawing on the experiences of diabetologists, vascular surgeons, infectious disease specialists, orthotists, plastic and orthopaedic surgeons, this book describes established techniques known to be effective. It provides information regarding the role of the increased inflammatory state of diabetes and the failure to heal the foot ulcer.

This book represents the culmination of Thomas Elsaesser’s intense and passionate thinking about the Hollywood mind-game film from the previous two decades. In order to answer what the mind-game film is, why they exist, and how they function, Elsaesser maps the industrial-institutional challenges and constraints facing Hollywood, and the broader philosophic horizon within which American cinema thrives today. He demonstrates how the ‘Persistence of Hollywood’ continues as it has adapted to include new twists and turns, as well as revisions of past concerns, as film moves through the 21st century. Through examples such as Minority Report, Mulholland Drive, Source Code, and Back to the Future, Elsaesser explores how mind-game films challenge us and play games with our perception of reality, creating skepticism and (self-) doubt. He also highlights the mind-game film’s tendency to intervene in a complex fashion in the political moment by questioning the dominant power’s intent to program both body and mind alike. Prescient and compelling, The Mind-Game Film will appeal to students, scholars, and enthusiasts of media studies, film studies, philosophy, and politics.

Finding your voice can be used as a resource by actors at all levels, from students and young professionals to established and experienced actors. Drama teachers in schools and committed amateur actors who wish to increase their vocal skills and understanding will also find it invaluable.

Drawing upon the expertise of film scholars from around the world, Puzzle Films investigates a number of films that sport complex storytelling—from Memento, Old Boy, and Run Lola Run, to the Infernal Affairs trilogy and In the Mood for Love. Unites American ‘independent’ cinema, the European and International Art film, and certain modes of avant-garde filmmaking on the basis of their shared storytelling complexity Draws upon the expertise of film scholars from North America, Britain, China, Poland, Holland, Italy, Greece, New Zealand, and Australia Teaching Sound Film: A Reader is a film analysis-and-criticism textbook that contains 35 essays on 35 geographically diverse, historically significant sound films. The countries represented here are France, Italy, England, Belgium, Russia, India, China, Cuba, Germany, Japan, Russia, Romania, Czechoslovakia, Brazil, Taiwan, Austria, Afghanistan, South Korea, Finland, Burkina Faso, Mexico, Iran, Israel, Colombia, and the United States. The directors represented include Jean Renoir, Orson Welles, Akira Kurosawa, Federico Fellini, Woody Allen, Aki Kaurismäki, Ken Loach, Tomás Gutiérrez Alea, Abbas Kiarostami, Michael Haneke, and Hong Sang-soo. Written with university students (and possibly also advanced high school students) in mind, the essays in Teaching Sound Film: A Reader cover some of the central films treated—and central issues raised—in today’s cinema courses and provide students with practical models to help them improve their own writing and analytical skills. These essays are clear and readable—that is, sophisticated and meaty yet not overly technical or jargon-heavy. This makes them perfect introductions to their respective films as well as important contributions to the field of film studies in general. Moreover, this book’s scholarly apparatus features credits, images, bibliographies for all films discussed, a glossary of film terms, and an appendix containing three essays, respectively, on film acting, avant-garde cinema, and theater vs. film.

Young Stan the Actor is the classic work by Cicely Berry, Voice Director of the Royal Shakespeare Company and world-famous voice trainer. Encapsulating her renowned method of teaching voice production, the exercises in this straightforward, no-nonsense guide will develop relaxation, breathing and muscular control - without which no actor or speaker can achieve their full potential. Illustrated with passages used in Cicely Berry’s own teaching, Voice and the Actor is the essential first step towards speaking a text with truth and meaning. Inspiring and practical, her words will be a revelation for beginner and professional alike.

Soon to be a major motion picture from Academy Award-winning director Guillermo del Toro and starring Bradley Cooper, Cate Blanchett, Rooney Mara, and Toni Collette. Nightmare Alley begins with an extraordinary description of a carnival-show geek—alcoholic and abject and the object of the voyeuristic crowd’s gleeful disgust and derision—going about his work at a county fair. Young Stan Carlisle is working as a carry, and he wonders how a man could fall so low. There’s no way in hell, he vows, that anything like that will ever happen to him. And since Stan is clever and ambitious and not without a useful streak of ruthlessness, soon enough he’s going places. Onstage he plays the mentalist with a cute assistant (before long his harried wife), then he graduates to full-blown spiritualist, catering to the needs of the rich and gullible in their well-upholstered homes. It looks like the world is Stan’s for the taking. At least for now.

Lights On! a Reflective Journey

The End and the Beginning

Reclaiming the Land

To what extent do minority writers feel represented by the literary canon of a nation and its body of “great works”? To what extent do they adhere to, or contest, the supposedly universal values conveyed through those texts and how do they situate their own works within the national tradition? Building on Edward W. Said’s contrapuntal readings and Gayatri Chakravorty Spivak’s reflections on the voice of the subaltern, this monograph examines the ways in which Rafik Schami, Emine Sevgi Özdamar, and Feridun Zaimoglu have re-read, challenged, and adapted their own literary and cultural traditions. The author explores the ways in which these writers have negotiated the intersection between politics, ethics, and aesthetics in their work, focusing on the appropriation and re-evaluation of cultural legacies in German-language literature. Opening up a rich critical dialogue with scholars of German Studies and Postcolonial Theory, Christine Meyer provides a fresh perspective on German-language minority literature. This book provides a critical overview of the role of the emotions in politics. Compassion is a politically charged virtue, and yet we know surprisingly little about the uses (and abuses) of compassion in political environments. Covering sociology, political theory and psychology, and with contributions from Martha Nussbaum and Andrew Linklater amongst others, the book gives a succinct overview of the main theories of political compassion and the emotions in politics. It covers key concepts such as humanitarianism, political emotion and agency in relation to compassion and the politics of compassion.

The most rigorous, organic and actor-friendly approach to Phonetics and Accents available. Linklater based and highly compatible with all systems of voice training. Classroom tested and approved for twenty years.

A passionate exploration of the process of comprehending and speaking the words of William Shakespeare. Detailing exercises and analyzing characters’ speech and rhythms, Linklater provides the tools to increase understanding and make Shakespeare’s words one’s own.

This book provides a comprehensive review of the diagnosis, management and treatment of sports injuries to the foot and ankle. The editors have assembled a list of contributors at the top of their field to define the medical management, treatment and surgery for the most common and highly debilitating sports injuries. Currently, foot and ankle injuries are the most common musculoskeletal injuries, thus this book fills the clear need for a state-of-the art resource that focuses upon this growing area of orthopaedic practice. Foot and Ankle Sports Orthopaedics is highly relevant to orthopaedic surgeons, sports orthopaedic surgeons and medical professionals dealing with sports injuries around the F&A. With clear and didactic information and superb illustrations, this book will prove to be an indispensable learning tool for readers seeking expert guidance to further their surgical skills in this area.

(Applause Acting Series). The classic Skinner method to speech for the stage! This 75-minute audio CD and booklet is a companion to the paperback Speak with Distinction (ISBN 1557830479). Revised with new material added by Timothy Monich and Lilene Mansell.

Humanitarian workers around the world struggle under dangerous conditions. Yet many do not have the technological tools readily available elsewhere to help them realize their mission to provide essential services and save lives. This book, the fruit of a historic conference, is a practical guide to current technologies that can help relief and humanitarian aid workers succeed. Designed to facilitate needed technology transfer to the humanitarian sector, the essays focus on areas where technology is underused and predict where new technological advances may be applied to relief efforts. The essays cover essential areas: communications technology and infrastructure support and security. They describe how such technologies as personal identification and tagging systems, software radios, wireless networks, and computer-aided language translation can promote safety and manage large groups of people. Other essays outline new technological solutions to such challenges as mine removal, water purification, and energy generation. The contributors are: Kevin M. Cahill, Frank Fernandez, C. Kumar Patel, Paul J. Kolodzy, Joseph Mitola III, Victor Zue, Jaime G. Carbonell, Stephen Squires, Joseph V. Braddock, Arthur L. Lerner-Lam, Ralph James, William L. Warren, and Regina E. Dugan.

Voice And The Actor

This is the first comprehensive volume to offer a state of the art investigation both of the nature of political ideologies and of their main manifestations. The diversity of ideology studies is represented by a mixture of the range of theories that illuminate the field, combined with an appreciation of the changing complexity of concrete ideologies and the emergence of new ones. Ideologies, however, are always with us. The Handbook is divided into three sections: The first is divided into three sections: The first reflects some of the latest thinking about the development of ideology on an historical dimension, from the standpoints of conceptual history, Marx studies, social science theory and history, and leading schools of continental philosophy. The second includes some of the most recent interpretations and theories of ideology, all of which are sympathetic in their own ways to its exploration and close investigation, even when judiciously critical of its social impact. This section contains many of the more salient contemporary accounts of ideology. The third focuses on the leading ideological families and traditions, as well as on some of their cultural and geographical manifestations, incorporating both historical and contemporary perspectives. Each chapter is written by an expert in their field, bringing the latest approaches and understandings to their task. The Handbook will position the study of ideologies in the mainstream of political theory and political analysis and will attest to its indispensability both to courses on political theory and to scholars who wish to take their understanding of ideologies in new directions.

Wes Anderson’s films can be divisive, but he is widely recognized as the inspiration for several recent trends in indie films. Using both practical and theoretical lenses, the contributors address and explain the recurring stylistic techniques, motifs, and themes that dominate Anderson’s films and have had such an impact on current filmmaking.

Directing: Film Techniques and Aesthetics is a comprehensive manual that teaches the essentials of filmmaking from the perspective of the director. Ideal for film production and directing classes, as well as for aspiring and current directors. Directing covers all phases of preproduction and production, from idea development to final cut. Thoroughly covering the basics, Directing guides the reader to professional standards of expression and control, and goes to the heart of what makes a director. The book outlines a great deal of practical work to meet this goal, with projects, exercises. The third edition emphasizes the connection between knowing and doing, with every principle realizable through projects and exercises. Much has been enhanced and expanded, notably: aspects of dramaturgy; beats and dramatic units; pitching stories and selling one’s work; the role of the entrepreneurial producer; and the dangers of embedded moral values. Checklists are loaded with practical recommendations for action, and outcomes assessment tables help the reader honestly gauge his or her progress. Entirely new chapters present: preproduction procedures; production design; script breakdown; procedures and etiquette on the set; shooting location sound; continuity; and working with a composer. The entire book is revised to capitalize on the advantages offered by the revolutionary shift to digital filmmaking.

Animal Narratology interrogates what it means to narrate, to speak—speak for, on behalf of—and to voice, or represent life beyond the human, which is in itself as different as insects, bears, and dogs are from each other, and yet more, as individual as a single mouse, horse, or puma. The varied contributions to this interdisciplinary Special Issue highlight assumptions about the human perception of, attitude toward, and responsibility for the animals that are read and written about, thus demonstrating that just as “the animal” does not exist, neither does “the human”. In their zoopoetic focus, the analyses are aware that animal narratology ultimately always contains an approximation of an animal perspective in human terms and terminology, yet they make clear that what matters is how the animal is approximated and that there is an effort to approach and encounter the non-human in the first place. Many of the analyses come to the conclusion that literary animals give readers the opportunity to expand their own points of view both on themselves and others by adopting another’s perspective to the degree that such an endeavor is possible. Ultimately, the contributions call for a recognition of the many spaces, moments, and modes in which human lives are entangled with those of animals—one of which is located within the creative bounds of storytelling.
