

Lippincott Pharmacology 7th Edition

Lippincott NCLEX-RN Alternate-Format Questions, 7th edition is designed to help anyone preparing to take the RN licensing examination. This updated 7th edition has everything needed for students to be fully prepared to answer every type of question found on the NCLEX. More than 600 questions include multiple-response, drag-and-drop, hotspot, audio, chart, graphic option, and fill-in-the blank questions. Also included are two comprehensive tests with 100 questions each. Rationales are clear and detailed and cover correct as well as incorrect answers. Test-taking strategies help students dissect each question to its core components and provide keys to choosing the right answer. The book reviews all the topics covered on the actual NCLEX-RN. Hundreds of questions at the application level or above prompt active learning and higher-order thinking. Questions are aligned with the National Council of State Boards of Nursing (NCSBN) 2019 RN test plan and are written in the style used on the licensing examination. An accompanying PassPoint trial provides an additional opportunity for students to practice for NCLEX while also giving a glimpse of the full PassPoint experience.

This concise review of medical pharmacology is designed to help medical students streamline their study for course review and help prepare for the USMLE Step 1. Each chapter presents specific drugs and discusses their general properties, mechanism of action, pharmacologic effects, therapeutic uses, and adverse effects. Drug lists and two-color tables and figures summarize essential information. USMLE-style review questions and answers with explanations follow each chapter and a comprehensive examination appears at the end of the book. A companion website offers fully searchable text and an interactive question bank with questions from the book.

Oklahoma Notes/Pharmacology, Second Edition, a major revision and expanded update of the first edition, is designed to serve as a study guide for a review of pharmacology preparatory to Part I of the National Board of Medical Examiners (NBME) examination. All sections have undergone significant revision. The three sections comprising the largest components of the volume - on central nervous system drugs, renal/cardiovascular/hematopoietic drugs, and chemotherapy - have been completely reorganized and rewritten. Examination questions in several instances have been updated; new questions have been added and older questions that no longer appear relevant have been removed.
