

## Lista De Codigos Cnae 2009 2010 2011 2012 2013

Fifteen in a series of annual reports comparing business regulation in 190 economies, Doing Business 2018 measures aspects of regulation affecting 10 areas of everyday business activity: • Starting a business • Dealing with construction permits • Getting electricity • Registering property • Getting credit • Protecting minority investors • Paying taxes • Trading across borders • Enforcing contracts • Resolving insolvency These areas are included in the distance to frontier score and ease of doing business ranking. Doing Business also measures features of labor market regulation, which is not included in these two measures. The report updates all indicators as of June 1, 2017, ranks economies on their overall “ease of doing business”?, and analyzes reforms to business regulation +“ identifying which economies are strengthening their business environment the most. Doing Business illustrates how reforms in business regulations are being used to analyze economic outcomes for domestic entrepreneurs and for the wider economy. It is a flagship product produced in partnership by the World Bank Group that garners worldwide attention on regulatory barriers to entrepreneurship. More than 137 economies have used the Doing Business indicators to shape reform agendas and monitor improvements on the ground. In addition, the Doing Business data has generated over 2,182 articles in peer-reviewed academic journals since its inception. Data Notes; Distance to Frontier and Ease of Doing Business Ranking; and Summaries of Doing Business Reforms in 2016/17 can be downloaded separately from the Doing Business website. This publication highlights the impact of culture on local economies and the methodological issues related to its identification.

Este livro inclui perguntas e respostas sobre NF-e, SPED Contábil e Fiscal. O livro serve como um organizador de ideias que levará o leitor a questionar os impactos do Big Brother Fiscal. Empresários, Contadores , Profissionais de TI, Gestores, Advogados e Estudantes terão a oportunidade de compreender como a implantação do SPED no Brasil irá influenciar na competitividade empresarial. A obra aborda assuntos como - NF-e, NFS-e, SPED Contábil e Fiscal; NF-e e Simples Nacional; Contingência; Dúvidas sobre NF-e; Dúvidas sobre SPED; Dúvidas sobre Certificados Digitais; Oportunidades e riscos do SPED; Os desafios da Gestão Empresarial; Pequenas empresas e escritórios contábeis; Importância do ERP. Cecilia Valdés is arguably the most important novel of 19th century Cuba. Originally published in New York City in 1882, Cirilo Villaverde's novel has fascinated readers inside and outside Cuba since the late 19th century. In this new English translation, a vast landscape emerges of the moral, political, and sexual depravity caused by slavery and colonialism. Set in the Havana of the 1830s, the novel introduces us to Cecilia, a beautiful light-skinned mulatta, who is being pursued by the son of a Spanish slave trader, named Leonardo. Unbeknownst to the two, they are the children of the same father. Eventually Cecilia gives in to Leonardo's advances; she becomes pregnant and gives birth to a baby girl. When Leonardo, who gets bored with Cecilia after a while, agrees to marry a white upper class woman, Cecilia vows revenge. A mulatto friend and suitor of hers kills Leonardo, and Cecilia is thrown into prison as an accessory to the crime. For the contemporary reader Helen Lane's masterful translation of Cecilia Valdés opens a new window into the intricate problems of race relations in Cuba and the Caribbean. There are the elite social circles of European and New World Whites, the rich culture of the free people of color, the class to which Cecilia herself belonged, and then the slaves, divided among themselves between those who were born in Africa and those who were born in the New World, and those who worked on the sugar plantation and those who worked in the households of the rich people in Havana. Cecilia Valdés thus presents a vast portrait of sexual, social, and racial oppression, and the lived experience of Spanish colonialism in Cuba.

Rio de Janeiro: um estado em transição é um conjunto de 17 estudos focados, cada um em ângulo diverso, na economia, nas instituições políticas, nas políticas públicas, inclusive de gestão fiscal, e nas realidades e perspectivas sociais do estado do Rio de Janeiro. A obra, coordenada por Armando Castelar e Fernando Veloso, traz inegável contribuição ao debate honesto sobre o futuro do estado, que, na virada do século, saiu da depressão aguda para a euforia desmedida. O livro é um convite à reflexão racional sobre os pontos fortes e as fragilidades do estado.

This is a print on demand edition of a hard to find publication. Presents the annual estimates of rates and levels of violent crime (rape or sexual assault, robbery, aggravated assault, and simple assault), property crime (burglary, motor vehicle theft, and property theft), and personal theft (pocket picking and purse snatching). It describes the year-to-year change from 2008 and trends for the 10-year period from 2000 through 2009. The Nat. Criminal Victimization Survey collects information on non-fatal crimes, reported and not reported to the police, against persons age 12 or older from a nationally representative sample of U.S. households. This report also includes data on the characteristics of victims of crime; estimates of intimate partner violence; and use of firearms and other weapons during the crime. Illustrations.

This book includes selected papers presented at the International Conference on Marketing and Technologies (ICMarkTech 2020), held at ISCTE - University Institute of Lisbon, in the city of Lisbon in Portugal, between 8 and 10 October 2020. It covers up-to-date cutting-edge research on artificial intelligence applied in marketing, virtual and augmented reality in marketing, business intelligence databases and marketing, data mining and big data, marketing data science, web marketing, e-commerce and v-commerce, social media and networking, geomarketing and IoT, marketing automation and inbound marketing, machine learning applied to marketing, customer data management and CRM, and neuromarketing technologies.

This book is a theoretical investigation of the influence of human learning on the development through time of a 'pure labour' economy. The theory proposed is a simple one, but aims to grasp the essential features of all industrial economies. Economists have long known that two basic phenomena lie at the root of long-term economic movements in industrial societies: capital accumulation and technical progress. Attention has been concentrated on the former. In this book, by contrast, technical progress is assigned the central role. Within a multi-sector framework, the author examines the structural dynamics of prices, production and employment (implied by differentiated rates of productivity growth and expansion of demand) against a background of 'natural' relations. He also considers a number of institutional problems. Institutional and social learning, know-how, and the diffusion of knowledge emerge as the decisive factors accounting for the success and failure of industrial societies.

Business Strategy is becoming increasingly 'pluralist', drawing on the insights of different disciplines, and business practice in different parts of the world. This book brings together the work and ideas of leading international scholars working in the field under three main headings Technology, Strategy and Organization, and Regions. The purpose of the book is to explore from different perspectives the dynamic interplay between the technology of a firm; its strategies; organizational choices; and issues of place, region, and location. The contributors are Peter Hagström, Alfred Chandler, Takahiro Fujimoto, Richard Nelson, Nathan Rosenberg, Erik von Hippel, Cristiano Antonelli, Giovanni Dosi, Benjamin Coriat, David Teece, Gunnar Hedlund, Pari Patel, Keith Pavitt, Ikujiro Nonaka, Hirotaka Takeuchi, Lars-Gunnar Mattsson, John Cantwell, John Dunning, Michael Enright, Masahisa Fujita, Ryoichi Ishii, Allen Scott, Orjan Solvell, Ivo Zander, J-C Spender, and Michael Porter. Together they address the challenge of explaining the long-run competitiveness of firms in an ever more global world. This book will be a benchmark for anybody wanting to keep abreast of leading edge strategic thinking.

The world has seen a shift in socio-economic relations, in the patterns and processes of industrialization and regional development. The social regulation of the economic order, flexible production organization and industrial district formation have brought periods, places and pathways to the heart of economic debate. Pathways to Industrialization and Regional Development provides a platform from which to address a new economic order. All the major schools of thought are represented. Focussing upon the interactions between economic logic and political institutions at both the local and global levels, the authors set the agenda for the 1990s.

This book explores how the design, construction, and use of robotics technology may affect today's legal systems and, more particularly, matters of responsibility and agency in criminal law, contractual obligations, and torts. By distinguishing between the behaviour of robots as tools of human interaction, and robots as proper agents in the legal arena, jurists will have to address a new generation of “hard cases.” General disagreement may concern immunity in criminal law (e.g., the employment of robot soldiers in battle), personal accountability for certain robots in contracts (e.g., robo-traders), much as clauses of strict liability and negligence-based responsibility in extra-contractual obligations (e.g., service robots in tort law). Since robots are here to stay, the aim of the law should be to wisely govern our mutual relationships.

Rio de Janeiro

The Future of Tourism

Galicia ha sido hasta mediados los años 80 el principal productor mundial de mejillón, con una producción fuertemente centrada en el mercado español, en el que su posición era hegemónica. Sin embargo, el escenario internacional es cada vez más un condicionante de la dinámica productiva interna, como muestra, sin ir más lejos, la creciente presencia de producciones foráneas en el mercado interno. La progresiva integración de los mercados, la aparición de productos sustitutivos, el incremento de la producción de mejillón y la influencia de los mercados internacionales en la determinación de los precios, son factores que aconsejan iniciar este trabajo con una revisión del contexto en el que se inserta la producción gallega. Para ello, realizaremos una revisión tanto del marco internacional, como de las principales características del estatal.

This manual, which has been jointly developed by the OECD and Eurostat, aims to provide a firm basis for constructing comparable statistics of the environmental industry.

O mercado financeiro tem sido palco de inovações que desafiaram o Direito, dos títulos de crédito aos valores mobiliários, dos fundos de investimento aos derivativos. Desde o advento da criptomoeda Bitcoin, há muitas discussões jurídicas relevantes sobre criptoativos, exchanges nas quais são negociados, novos paradigmas para a prestação de serviços financeiros e preocupações diante do modelo regulatório existente para o mercado de capitais com vistas ao desenvolvimento econômico. Também surgiram novas maneiras de se praticarem condutas ilícitas - notadamente lavagem de dinheiro, evasão de divisas e manipulação de mercado. Esta obra procura sintetizar os conceitos básicos para a compreensão desse novo cenário, estabelecendo um diálogo entre acadêmicos, reguladores e profissionais de mercado, a fim de que sejam construídas, de maneira compartilhada, uma gramática e uma semântica jurídicas no tocante a criptoativos, blockchain e suas aplicações.

This book presents the research results of an interdisciplinary study on climate change policies by the Enforcing Environmental Policy (EEP) Network, a project supported by the Human Dimension Potential Programme. Contributions are from highly qualified economic and legal specialists based at research institutes across Europe. The book gives answers to several questions related to the implementation of the international rules on climate change, most notably the Kyoto Protocol. It analyses ways and means to facilitate and encourage compliance with the objectives of the Kyoto Protocol. It is addressed to policy-makers, academics, business-sector and stakeholders throughout and outside Europe. Due to its interdisciplinary approach, this work is a distinctive and unique product compared to the existing literature on the subject. The effective implementation of climate protection and clean air policy requires an understanding of the political, legal and economic structures and constraints facing policy makers - and this is exactly what this book offers.

A Reference Book for Transition Countries

The book is very well-structured. . . [It] provides a timely contribution to a conversation with a long history, and debates over the nature and purpose of the university seem certain to figure prominently in educational discourse for many years to come. Peter Roberts, Journal of Educational Administrative and History Drawing from experience as a professor in innovation and entrepreneurship and as a consultant to universities, Wissema offers deep insights into management of the modern universities. The book is well-written and all those university administrators who wish to transform their universities into entrepreneurial universities would find the book very useful. Jandhyala B.G. Tilak, Journal of Educational Planning and Administration In Central and Eastern Europe, universities are struggling to adapt to the new economic and institutional situations. The concept of the Third Generation University is powerful in giving direction. In addition, the book offers much practical advice, taken from the author s experience as a consultant to universities. Marjan Bojadzhiev, University American College Skopje, Macedonia Although the quality of university management makes or breaks the effectiveness and efficiency of a university, most university managers come unprepared to the job while only few books and courses in the subject are available. This book offers, amongst other things, welcome insights into the issue of university management. In Wageningen, the concept of the Third Generation University has proven to be inspiring, challenging and operational. It enabled us to develop science for Impact for a variety of new stakeholders. M. Kropff, Wageningen University and Research Centre, the Netherlands This book demonstrates that universities are subject to fundamental change, evolving from science-based, monodisciplinary institutions into transfunctional, international know-how hubs named third generation universities or 3GUs. J.G. Wissema explores the combination of forces that propel this dramatic change, tracing the historic development of universities, and exploring the technology-based enterprises, technostarters and financiers for start-ups and young enterprises that are the main partners of these 3GUs. He goes on to illustrate that universities play a new role as incubators of new science- or technology-based enterprises and take an active role in the exploitation of the knowledge they create. The book concludes with suggestions regarding the way in which changes in the university s mission should be reflected in subsequent organisational changes. Offering practical advice on the route forward for universities, and elucidating the role of education in entrepreneurship, this unique book will prove invaluable to academics and practitioners who seek to implement and facilitate changes for 3GU status. It will also appeal to students and researchers with an interest in business and management, education, entrepreneurship and public policy on education.

Following Adam Gopnik's best-selling Paris to the Moon, the adventure continues against the panorama of another storied city. Autumn, 2000: the Gopnik family moves back to a New York that seems, at first, safer and shinier than ever. Here are the triumphs and travails of father, mother, son and daughter; and of the teachers, coaches, therapists, adversaries and friends who round out the extended urban family. From Bluae, a goldfish fated to meet a Hitchcockian end, to Charlie Ravioli, an imaginary playmate who, being a New Yorker, is too busy to play, Gopnik's New York is charmed by the civilization of childhood. It is a fabric of living, which, though rent by the events of 9/11, will reweave itself, reviving a world where Jewish jokes mingle with debates about the problem of consciousness, the price of real estate and the meaning of modern art. By turns elegant and exultant, written with a signature mix of mind and heart, Through the Children's Gate is at once a celebration of a newly fragile city and a poignant study of a family trying to find its way, and joy, within it.

A rapidly growing area of economic research investigates the top of the income distribution using data from income tax records. This volume brings together studies of top incomes for twelve countries from around the world, including China, India, Japan, Argentina and Indonesia. Together with the first volume, published in 2007, the studies cover twenty two countries. They have a long time span, the earliest data relating to 1875 (for Norway), allowing recent developments to be placed in historical perspective. The volume describes in detail the source data and the methods employed. It will be an invaluable reference source for researchers in the field. Individual country chapters deal with the specific nature of the data for each of the countries, and describe the long-term evolution of top income shares. In the countries as a whole, dramatic changes have taken place at the top of the income distribution. Over the first part of the century, top income shares fell markedly. This largely took the form of a reduction in capital incomes. The different authors examine the impact of the First and Second World Wars, contrasting countries that were and were not engaged. They consider the impact of depressions and banking crises, and pay particular attention to the impact of progressive taxation. In the last 30 years, the shares of top incomes have increased markedly in the US and other Anglo-Saxon countries, reflecting the increased dispersion of earnings. The volume includes statistics on the much-discussed top pay and bonuses, providing a global perspective that discusses important differences between countries such as the lesser increase in Continental Europe. This book, together with volume 1, documents this interesting development and explores the underlying causes. The findings are brought together in a final summary chapter by Atkinson, Piketty and Saez.

This book presents the foundations for the future of tourism in a structured and detailed format. The who-is-who of tourism intelligence has collaborated to present a definitive blueprint for tourism reflecting the role of science, market institutions, and governance in its innovation and sustainability. The book adopts a comprehensive approach, exploring recent research and the latest developments in practice to inform the reader about instruments and actions that can shape a successful future for tourism. Broad in scope, the book incorporates the perspectives of leading tourism academics, as well as the views of tourism entrepreneurs, destination managers, government officials, and civil leaders. The book is divided into three parts, the first of which addresses the scientific facets of innovation, analyzing the challenges and opportunities that technology provides for organic and disruptive developments in tourism, which will shape its future. In turn, the second part examines socio-cultural paradigms – with a view to dismantling traditional barriers to innovation. It also explores the role of heritage and the ethics of inclusiveness as drivers for sustainable tourism. The third part investigates new ways and means in governance and policy making for tourism. It introduces advances such as strategic positioning, symbiotic partnerships, and innovative management, and closes by presenting governance frameworks for an inclusive and sustainable future of tourism.

Desde la Red Española de Compostaje se observa con interés el creciente acercamiento de la sociedad a la gestión sostenible de los residuos orgánicos, así como la aparición y paulatina implantación de tecnologías que permiten transformar los residuos en recursos, con la obtención de valor añadido a nivel energético, fertilizante, medioambiental. Por ello, hemos desarrollado un proyecto editorial denominado DE RESIDUO A RECURSO, EL CAMINO HACIA LA SOSTENIBILIDAD que desde la Ciencia y aprovechando nuestra formación didáctica y de divulgación integra todo el conocimiento científico necesario para poder comprender y participar a nivel experto de la gestión de los residuos, a través del conocimiento de su naturaleza, sus potenciales alternativas de tratamiento así como ejemplos avanzados de gestión sostenible. Este libro presenta una temática de gran relevancia dentro de la gestión de residuos orgánicos, ya que la industria agroalimentaria es uno de los sectores de actividad económica más importantes dentro del ámbito nacional, europeo e internacional. En este volumen se estudian en profundidad estos materiales residuales, sus principales características, y las posibilidades de gestión, tratamiento y/o valorización que posibilitan su uso tanto en alimentación animal, como con un destino agrícola y/o energético, así como su posible aprovechamiento como fuente para la obtención de distintos productos de valor añadido.

No Brasil, 99% das empresas que atuam de forma regular e legal são de pequeno e médio porte. Ainda que o espírito desses empresários seja alimentado em grande parte pela sua intuição, estar bem informado e instruído torna-se uma necessidade diante da moderna aparelhagem tecnológica da Receita Federal. Antonio Sérgio de Oliveira, com sua larga experiência, aponta quando propõe ao pequeno e médio empresário tratar sua empresa como se ela fosse de grande porte, uma vez que a Receita Federal, ao modernizar o sistema tributário por meio do Sped, democratizou seu relacionamento com a totalidade do ambiente empresarial. Por isso, este livro, repleto de informações e dicas sobre os meandros do Sped, oferece uma excelente oportunidade às pequenas e médias empresas, e sua leitura certamente contribuirá para uma melhor gestão contábil e administrativa nesse segmento.

O Livro retenção previdenciária vem para ser uma ferramenta prática de uso diário para o servidor público que milita na área. Aborda toda a legislação das retenções previdenciárias trazendo junto exemplos práticos, soluções de consultas da Receita Federal e no final a legislação que o rege a retenção previdenciária de 11%.

En el conjunto de actividades de la Cátedra Modelo Económico Sostenible de Valencia y su entorno, se presentan cuatro investigaciones que se consideran claves en el marco de la transformación del modelo económico valenciano para la ciudad de Valencia y su entorno inmediato. En el primer capítulo se presenta la información disponible sobre indicadores de sostenibilidad de la ciudad de Valencia y se comparan con otras ciudades españolas. En el siguiente capítulo, se analizan los principales indicadores del mercado de trabajo, económicos y sociales de la ciudad. En el tercer capítulo se revisan los activos de primer nivel para la consolidación de Valencia como la gran plataforma logística del Mediterráneo así como las dificultades que hasta el momento han existido, proponiendo una hoja de ruta. Finalmente, en el último capítulo se revisa el papel de las industrias creativas como impulsoras de la innovación y catalizadoras de la transformación económica. Se establece un marco conceptual que explica el efecto de las industrias creativas sobre la renta o la productividad agregada de la ciudad, complementándose con un análisis de contenido generado por usuarios de las principales redes sociales en el sector.

This Guide to Measuring the Information Society is a compilation of concepts, definitions, classifications and methods for information society measurement and analysis.

Grossman and Helpman develop a unique approach in which innovation is viewed as a deliberate outgrowth of investments in industrial research by forward-looking, profit-seeking agents. Traditional growth theory emphasizes the incentives for capital accumulation rather than technological progress. Innovation is treated as an exogenous process or a by-product of investment in machinery and equipment. Grossman and Helpman develop a unique approach in which innovation is viewed as a deliberate outgrowth of investments in industrial research by forward-looking, profit-seeking agents.

Measuring the Digital Transformation: A Roadmap for the Future provides new insights into the state of the digital transformation by mapping indicators across a range of areas – from education and innovation, to trade and economic and social outcomes – against current digital policy issues, as presented in Going Digital: Shaping Policies, Improving Lives.

The Laws of Robots

In recent years, the study of creativity has shifted from analysis of culture as an end in itself to one of economic enhancement, and its capability to generate wealth and promote economic development. Increasingly, European cities and regions are using the arts to fuel wellbeing and reinvigorate economies after the comparative demise of more traditional industry and manufacturing. A growing literature is starting to highlight the innovation capacity of cultural and creative industries (CCIs) as they intersect the innovation processes of other manufacturing and services sectors with an innovative and creative output. Culture and creativity may be a strategic weapon to exit the present crisis and redefine an economic model of sustainable development. This book brings together a set of multidisciplinary contributions to investigate the kaleidoscope of European creativity, focussing on CCIs and the innovations connected with them. The two main questions that this volume aims to address are: How can we identify, map and define CCIs in Europe? And how do they contribute to innovation and sustainable growth? The volume is split into two parts. The first part deals with the definition, measurement and mapping of the geography of European CCIs according to a local economic approach, focussing on Italy, Spain, the UK, Austria, Denmark and France. This section surveys the different industrial typologies and spatial patterns, which underline a significant dissimilarity between the North and the South of Europe, mainly due to the difference between heritage-driven and technology-driven countries. The section concludes with a case study on a Japanese creative city. The second part collects some interesting cases of innovation generated in creative spaces such as cities of art or creative clusters and networks. This entails the study of innovations among creative and non-creative sectors (e.g. laser technologies in conservation of works of art and design networks in Italy) and across European and non-European countries (e.g. Spaghetti Western movies in the US or visual artists in New Zealand). Finally, an innovation capacity of culture that can regenerate mature sectors (e.g. the French food supply chain and Swiss watch Valley) or combine the creative and green economics paradigms (e.g. the green creative cities in North Europe) is analyzed. This book will appeal to academics, scholars and practitioners of urban and regional studies, cultural and creative economics and managerial and organization studies.

Escrito em linguagem simples e direta, este livro trata da legislação relativa ao eSocial e sua aplicação nas esferas trabalhista, previdenciária e da saúde e segurança. As autoras tratam, em detalhes, do processo referente a admissão, as informações pertinentes a cada tipo de contrato, do correto cadastramento das rubricas, das obrigações a serem inseridas, falando também a respeito do dos tributos na área de saúde e segurança do trabalho e do denominado GUIL-RAT e o FAP. Detalham, ainda, o procedimento para preenchimento da CAT dentro do eSocial e os comparativos entre os dados da Tabela 24 do e-Social para fins de aposentadoria especial para os agentes químicos, físicos e biológicos com os anexos da NR15 para fins de insalubridade.

Cannabis dependence is controversial. Does it occur or is it a myth put forth by those who oppose legalisation? What are the signs of cannabis dependence? How many people are affected? What are the health and behavioural risks of becoming cannabis-dependent? What counselling approaches have been tested with adults and adolescents, and how effective are they? What are the arguments for legalisation, regulation or prohibition? Looking back and toward the future, what do we know and what do we need to learn? This state-of-the-science review sets out to answer all those questions, beginning with an historical examination and moving into diagnosis, classification, epidemiology, public health, policy, issues relating to regulation and prohibition, and evidence-based interventions.

Occupational Safety and Hygiene presents selected papers from the International Symposium on Occupational Safety and Hygiene – SHO2013 (Guimarães, Portugal, 14-15 February 2013), which was organized by the Portuguese Society for Occupational Safety and Hygiene (SPOSHO). The contributions from 15 different countries focus on: - Occupational safety - Risk assessment - Safety management - Ergonomics - Management systems - Environmental ergonomics - Physical environments - Construction safety - Human factors The papers included in the book are mainly based on research carried out at universities and other research institutions, but they are also based on practical studies developed by Occupational Health & Safety (OHS) practitioners within their companies. As a result, this book will be useful to get acquainted with the state-of-the-art of the research within the aforementioned domains, as well as with some practical tools and approaches that are currently used by OHS professionals worldwide.
