

## Lotus Buyers Guide

*The Lotus Elan was Colin Chapman and Lotus' first affordable road car, produced from 1962 and, along with its larger Plus 2 variant, until 1974. As a replacement for the expensive Lotus Elite, the Elan and Plus 2 were both successful sports cars, which carried Lotus through the 1960s and into the 1970s. Starting with a brief history of Lotus and the Elan, Lotus Elan & Plus 2 Source Book provides a detailed originality guide to the Elan and Plus 2, identifying the design changes Lotus made to the models through their lifetimes. An 'owner's guide' provides detailed information on owning and maintaining the cars in tip-top condition, and gives details of common faults and upgrades. The restoration guide gives any potential restorer the information to carry out the tasks needed to bring one of these cars back from the dead. With anecdotes and experiences from current and previous owners of Elans and Plus 2's, along with many colour photographs the book provides a valuable insight into owning running and racing these iconic cars.*

*Lotus introduced the Type 75 Elite in 1974. Being a full four-seater coupe with an opening glass tailgate, it was designed to carry a family in comfort while retaining Lotus' trademark, excellent road holding and handling. Perhaps most importantly, it was the first - and succesful - step in Colin Chapman's plan to move upmarket and away from Lotus' kit car image. The Elite gave rise to two derivatives, the Eclat and the Excel. The Eclat was a restyled coupe version, sacrificing the Elite's unique rear styling and good rear passenger headroom for a more stylish exterior. With its conventional coupe styling, the Eclat was more mainstream than the Elite, and it was in the end the better seller. In turn, the Eclat spawned the Excel, the last of the Elite-inspired family. Matthew Vale looks at the history of these unusual Lotus models, and gives a thorough guide to buying and owning the cars today. Of interest to all motoring enthusiasts and Lotus owners in particular, it includes information on buying and owning the cars today, specifications, owner's experiences and technical information. Superbly illustrated with 130 colour photographs, both period and contemporary.*

*Lotus Europa - Colin Chapman's mid-engined masterpiece*

*S1, S2, Twin Cam & Special 1966 to 1975*

The Essential Guide to buying the Lotus Europa of your dreams, this book will guide you through all you need to know. Originally intended to be a cheap and basic Lotus Seven replacement, during its development the Lotus Europa morphed into a miniature supercar, described by Colin Chapman as a "working man 's GT40," which sat alongside the Elan in the Lotus line-up. Its mid engine configuration gave it exceptional balance, and its handling and roadholding were second to none. Initially produced for export to Europe in late 1966, the Renault-powered car evolved into the Series 2 in 1968 when it was released to the UK and US markets, and, in its final iteration, gained the Lotus' own Twin Cam engine in 1971. Production ended in 1975 with around 9200 cars completed. This book has been written to provide the prospective owner with all the information they need to establish if the car is for them, and what to look for when viewing an example. All aspects of the cars are examined, including paperwork, mechanical issues, bodywork and interior with many photos of example cars to assist in the assessment of many of the common problems that a car can exhibit. The author is a Lotus enthusiast, and has been working on and writing about classic Lotuses for a number of years.

Named after Elisa, the granddaughter of Lotus's owner at the time, Romano Artioli of Bugatti fame, the Lotus Elise was launched at the Frankfurt Show in 1995. In the subsequent twenty-five years it has not only established itself as the embodiment of what Lotus stands for, it retains a unique place in the international sports car market. No other manufacturer came up with a car to seriously rival the Elise, nor the Exige, in terms of handling dexterity on both road and racetrack, and it aptly characterizes the definition of a sports car. Written in Johnny Tipler's inimitable style this book includes a detailed evolution of the Elise and Exige, including full specification tables; interviews with key individuals involved in their design and development, including Richard Rackham, Gavan Kershaw, Neil Thomas, Russell Carr, Barney Hatt and Andy Pleavin; Elisa Artioli on her namesake, its past and future; motor sport adaptions and successes and finally, driving experiences on road and track. The production of the Elise and Exige was sustained through four corporate upheavals. Now in Geely ownership, the future for Lotus looks bright.

*The Lotus Europa was Colin Chapman and Lotus's first mid-engined road car, and was produced from 1966 through to 1975. Originally designed to slot into the Lotus range below the Elan as a low cost replacement for the Lotus 7, the Europa eventually sat alongside the Elan and Plus 2 as a comparable sports car in its own right. Starting with the design philosophy behind the development of the Europa, this book provides detailed technical descriptions of all the major versions of the model, starting with the Renault-powered Series 1 through to the Lotus Twin Cam powered Special. It looks at the cars on the road, and the racing Type 47 derived from the road cars which competed in the small capacity Group 6 class, as well as featuring in historic racing today. With owners' impressions and interviews with ex-Lotus employees, the book provides a valuable insight into owning, running, and racing these iconic cars.*

The Essential Guide to buying the Lotus Elan of your dreams, this book will guide you through all you need to know. The Lotus Elan and Plus 2 are the definitive classic Lotus Sports cars. Small, light, and powered by Lotus's own Twin Cam engine, these were and are fast, great handling sports cars with a Grand Prix winning pedigree. With a winning formula of glass fibre bodyshell, and simple sheet steel backbone chassis, the Elan was an affordable replacement for the expensive and exotic glass fibre monocoque Lotus Elite, and became the mainstay of the Lotus road car range throughout the 1960s and into the 1970s. First introduced as an open two-seater in 1962, and as a Coup é in 1966, the Elan was available as a do-it-yourself 'kit' car or in factory assembled form, and was refined through the 1960s, culminating in the famous Sprint models of 1971, with the big valve 130bhp Twin Cam engine. The widened and stretched 2+2 Elan with its vestigial rear seats - named, unsurprisingly, the Plus 2 - was introduced in 1967, followed by the higher-spec Plus 2S in 1969, which was the first Elan not available in kit form. The Plus 2S 130 gained the Sprint specification engine in 1971, and the final Elan was the Plus 2S 130/5 of 1972. Just over 9000 Elans were produced between 1962 and 1973, while just over 5000 Plus 2 were produced between 1967 and 1974. This book has been written to provide the prospective owner with all the information they need to establish if an Elan or Plus 2 is for them, and what to look for when viewing an example. All aspects of the cars are examined, including paperwork, mechanical issues, bodywork and interior with many photos of example cars to assist in the assessment of an individual car, and understand the implications of many of the common problems that a car can exhibit. The author is a Lotus enthusiast, and has been working on and writing about classic Lotuses for a number of years.

Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unsuccess through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

This engaging book follows the history of the Lotus 2+2 coupes from the Elan through to the Evora. The authors cover the Elan model history from start to finish of the range with details of the changes made through the years. They then follow the developments of the Elite through the Eclat to the Excel, including coverage of the attempt to break into the 'executive' market. The book finishes with the development and history of the Evora, including coverage of the return of Lotus to racing and the creation of its details of what to look out for on each model and where to find replacement parts along with estimates of time needed to complete restorations.Complete with original photography and tips and advice for current and potential owners, this book is a must for all Lotus fans.
