There is nothing interesting about Ray Eccles. He knows it himself. On the morning of his fortieth birthday, he goes for a walk because he's just learned of a dormant Second World War explosive offshore, and he's the kind of man who thinks a bomb might be good company. As he gazes at the sea, a woman in the distance suddenly turns to face him—and a dying seagull falls from the sky, knocking him unconscious. When Ray wakes up, he's inexplicably compelled to paint the woman's image, obsessively and repeatedly: initially on any paper he can find in his house, and thereafter on the walls, using any materials that come to hand, including food and bodily fluids. Discovered by a power couple of Outsider Art, he becomes one of the most celebrated artists of the century, and soon even small-town newspapers are covering his work—which is how Jennifer, the woman on the beach, discovers she's the subject of the paintings that have set the world on fire, leading her to wonder if a man she's never met is the only person who has ever really seen her. *Man with a Seagull on His Head* is a novel about the impossibility of ever really knowing anyone, and the electric charge that comes from real if unexpected connection. Beautiful, lyrical, and strangely moving, it heralds a wonderful and original new voice.

'One day, maybe five years from now, you'll look back and understand why this happened.' Vian and Nell are thrown together at the age of five when Vian's mother and Nell's father fall in love. At first wary of each other, they soon become the best of friends. But five years later, they are torn apart and Vian moves to the other side of the world. Fast-forward five more years to when Vian comes to visit, and Nell discovers that the boy she once knew is now 'Van' - a wild and carefree teenager. Chemistry crackles, but once again, they're separated. For the next two decades, Nell and Van meet every five years, but life and circumstance always intervene. Will they ever find true happiness? And will it be together?

For Better, for Worse

Two friends. A stolen car. A suitcase full of secrets . . .

After her marriage to Damien ended in disaster, Londoner Josie Flynn -- thirtysomething and single again -- is flying across the ocean to her American cousin's "big mistake" wedding. In her present "love stinks" frame of mind, the last person she expects to be seated next to on the flight is someone like Matt Jarvis. A recently divorced rock journalist, Matt is sensitive, good-looking, and remarkably attentive -- and before their plane touches down, Josie's smitten. So how can she hope to convince her cousin to cut and run when Josie is all ready to leap into love again -- with a stranger, no less, who might be just another Mr. Totally Wrong in Mr. Seductively Right's clothing? The point is rendered moot, of course, once they deplane and she and Matt go their separate ways. After all,

Josie's got prenuptial confabs to worry about and that dreaded lilac chiffon bridesmaid's dress to wear. But Dante himself couldn't have dreamed up the hell this wedding is proving to be -- and when her dream hunk reappears and throws himself into the mix, Josie finds herself wondering how she -- or any unattached modern woman, in fact -- can hope to survive the new romantic rules of the twenty-first century. Already a bestseller in the U.K., Carole Matthews's For Better, for Worse is a deliriously droll, dead-on tale of marriage, sex, monogamy, and modern love.

The story of the rise of the segregated suburb often begins during the New Deal and the Second World War, when sweeping federal policies hollowed out cities, pushed rapid suburbanization, and created a white homeowner class intent on defending racial barriers. Paige Glotzer offers a new understanding of the deeper roots of suburban segregation. The mid-twentieth-century policies that favored exclusionary housing were not simply the inevitable result of popular and elite prejudice, she reveals, but the culmination of a long-term effort by developers to use racism to structure suburban real estate markets. Glotzer charts how the real estate industry shaped residential segregation, from the emergence of large-scale suburban development in the 1890s to the postwar housing boom. Focusing on the Roland Park Company as it developed Baltimore's wealthiest, whitest neighborhoods, she follows the money that financed early segregated suburbs, including the role of transnational capital, mostly British, in the U.S. housing market. She also scrutinizes the business practices of real estate developers, from vetting homebuyers to

negotiating with municipal governments for services. She examines how they sold the idea of the suburbs to consumers and analyzes their influence in shaping local and federal housing policies. Glotzer then details how Baltimore's experience informed the creation of a national real estate industry with professional organizations that lobbied for planned segregated suburbs. *How the Suburbs Were Segregated* sheds new light on the power of real estate developers in shaping the origins and mechanisms of a housing market in which racial exclusion and profit are still inextricably intertwined.
