

## Lumber Manufacturing Accounts

Detailed records of lumber production in the United States are scattered in about 50 publications, most of which are out of print and generally unavailable (except in libraries) to foresters, lumbermen, economists, and others interested in the lumber industry.

Lumber World Review

Excerpt from California's Timber Industries: Some Facts and Figures This production accounts for many millions of dollars worth of commodities each year. In 1955, value added by manufacture in these industries (lumber, paper, furniture, and allied products) totaled 879 million dollars (fig. Industries wholly or partially dependent on the timber resource accounted for 9 percent of the total value added by manufacture in the State. Forest industries ranked third, behind transportation equipment and food products. Forest products also account for a sizable share of the State's jobs. In 1955, manufacturing facilities for converting wood to finished products furnished employment for 10 percent of all workers engaged in manufacturing in California and accounted for about 10 percent of the annual payrolls of manufacturers. Forest industries provide 106,000 jobs and furnish the major means of livelihood for close to 400,000 persons. Even though employment in forest industries is often seasonal, particularly in logging operations, average annual earnings compare favorably with incomes in other manufacturing industries in California. In 1955, the average annual income of employees in the lumber and wood products industries was \$5,144. Figure 2 Location of major forest industries in California, 1956. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Lumber Accounts

*Excerpt from Lumber Manufacturing Accounts The operations of the sash and door factory, bending works, veneer works, and other subsidiary plants, except as they affect the general operations of the sawmill, have not been dealt with. These involve more or less elaborate systems of cost accounting, and therefore merit separate treatment. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
