Beginning with the claim that the popularization of Buddhism in the medieval period was a phenomenon of visual culture, Explaining Pictures reexamines the history (and historiography) of medieval Japanese Buddhism. With theoretical sophistication and a full appreciation of the power of imagery to convey and control religious meaning, it investigates a range of aspects of etoki, including the particularly active role of itinerant nuns, whose performances were especially edifying to female audiences, as well as the visual hagiography of the reputed founder of Japanese Buddhism, the pictorial projections of Buddhist paradise and hell, and the explanation, through visual imagery, of sacred mountains. Explaining Pictures is the first book-length study in English devoted to the phenomenon of Buddhist art as religious propaganda and pictorial storytelling as a form of popular culture in medieval Japan. A truly interdisciplinary study, it suggests fruitful avenues of discussion between art historians and historians of Japanese Buddhism. Scholars and students with an interest in Japanese Buddhism, art, and social and cultural history will find its examination of significant issues fresh and stimulating. It will also find an appreciative audience among those concerned with the relationship between art and religion, the mechanics of proselytization, and Asian visual culture.

The human brain is arguably the most complex system we know of. Over the past few decades, scientists have developed several methods and theories for studying the functional organization of the brain, and how cognitive/perceptual/emotional processes might arise from the brain's electro-chemical-computational dynamics. These methods facilitated and inspired large literatures on brain-behavior links, and yet there remains a seemingly endless chasm between our simple impoverished models and the unfathomable complexity of the human brain. The purpose of this Research Topic is to ask the question: Are we thinking about thinking about the brain in the right way? In most scientific publications, researchers describe a broad and established theoretical framework and briefly describe new experimental results consistent with that framework. Here, we encourage authors to express ideas that might be radical, controversial, or different from established theories or methodological approaches. Supportive data are highly encouraged. The aim is to spark discussions about the validity and usefulness of current methodological/theoretical approaches in human cognitive neuroscience, with the goal of inspiring new approaches and ways of thinking. Neuroscience is a massive field with myriad methodological and theoretical approaches; we focus this Research Topic on approaches most commonly used in human neuroscience.

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Painting Nature for the Nation

The Illustrated London News

Award-winning photographer Matt Black traveled over 100,000 miles to chronicle the reality of today's unseen and forgotten America.

In *Painting Nature for the Nation*: Taki Katei and the Challenges to Sinoophile Culture in Meiji Japan, Rosina Buckland offers an account of the career of the painter Taki Katei (1830 – 1901). Drawing on a large body of previously unpublished paintings, collaborative works and book illustrations by this highly successful, yet neglected, figure, Buckland traces how Katei transformed his art and practice based in modes derived from China in order to fulfil the needs of the modern nation-state at large-scale exhibitions and at the imperial court.

From the beginning of the sound era until the end of the 1930s, independent movie-making thrived. Many of the independent studios were headquartered in a section of Hollywood called "Poverty Row." Here the independents made movies on the cheap, usually at rented facilities where shooting was limited to only a few days. From Allied Pictures Corporation to Willis Kent Production, 55 Poverty Row Studios are given histories in this book. Some of the studios, such as Diversion Pictures and Cresent Pictures, came into existence for the sole purpose of releasing movies by established stars. Others, for example J.D. Kendis, were early exploitation filmmakers under the guise of sex education. The histories include critical commentary on the studio's output and a filmography of all titles released from 1929

through 1940.

Software for Computer Control 1982

Software for Computer Control 1982 covers the proceedings of the Third IFAC/IFIP Symposium. The book discusses the state of software development for digital computer applications for science and control. With a total of 73 papers, the book covers topics such as real-time language and operating systems; man-machine communication software; software for robotics; C.A.D. of digital computer controls systems; algorithms for digital computer control; control software engineering and management; and industrial applications. Computer scientists, engineers, and I.T. professionals will find this book interesting, since it provides discussions on the various applications of computer programs.

INSTANT NEW YORK TIMES BESTSELLER "My Body offers a lucid examination of the mirrors in which its author has seen herself, and her indoctrination into the cult of beauty as defined by powerful men. In its more transcendent passages . . . the author steps beyond the reach of any 'Pygmalion' and becomes a more dangerous kind of beautiful. She becomes a kind of . . . —Melissa Febos, *The New York Times* Book Review A "MOST ANTICIPATED" AND "BEST OF FALL 2021" BOOK FOR "VOGUE" "TIME" "ESQUIRE" "PEOPLE" "USA TODAY" "CHICAGO TRIBUNE" "LOS ANGELES TIMES" "SHONDALAND" "ALMA" "THRILLIST" "NYLON" "FORTUNE" A deeply honest investigation of what it means to be a woman and a commodity from Emily Ratajkowski.

the archetypal, multi-hyphenate celebrity of our time Emily Ratajkowski is an acclaimed model and actress, an engaged political progressive, a formidable entrepreneur, a global social media phenomenon, and now, a writer. Rocketing to world fame at age twenty-one, Ratajkowski sparked both praise and furor with the provocative display of her body as an unapologetic subsequent evolution in her thinking about our culture's commodification of women is the subject of this book. My Body is a profoundly personal exploration of feminism, sexuality, and power, of men's treatment of women and women's rationalizations for accepting that treatment. These essays chronicle moments from Ratajkowski's life while investigating the cult

of its obsession with and contempt for women's sexuality, the perverse dynamics of the fashion and film industries, and the gray area between consent and abuse. Nuanced, fierce, and incisive, My Body marks the debut of a writer brimming with courage and intelligence.

Like many other cultural commodities, films and TV shows tend to work in such a way as to obscure the conditions under which they are produced, a process that has been reinforced by dominant trends in the practice of Film and Television Studies. This collection places the workplace experiences of industry workers at centre stage. It looks at film and television production in a variety of social, economic, political, and cultural contexts. The book provides detailed analyses of specific systems of production and their role in shaping the experience of work, whilst also engaging with the key theoretical and methodological questions involved in film and television production. Drawing together the work of historians, film scholars, and anthropologists, it looks at film and television production not only in Hollywood and Western Europe but also in less familiar settings such as the Soviet Union, India, Nigeria, and the Democratic Republic of Congo. Chronologically wide-ranging, interdisciplinary and international in scope, it is a unique introduction, critical for all students of the film industries and film production.

The Development of Settings in the English Novel

Animal Wisdom, digital imaging guru John Lund is back with the magic of photo manipulation that reveals what animals are really doing. From dogs and cats playing twister to ducklings doing the can-can, readers will laugh out of these animals' antics and gain wisdom as well!

Cinema both reflects life and contours life—that is its psychological power. And for decades, clinicians and educators have recognized the value of this power, using it to respectively heal in therapy and educate in the classroom. The Cinematic Mirror for Psychology and Life Coaching mines the illustrative value of cinema, offering therapists and life coaches access to ideas that can motivate and enlighten clients. Although many movie guides exist, this volume complements the available literature by adding positive psychology, mental health, and wellness perspectives to the clinical/educational/coaching mix. The serious intent to cull from cinema its underlying psychological value has motivated noted clinicians, life coaches, and cultural critics to offer science-based analysis and intervention strategies. Readers may add their own movie insights and professional expertise to this rich foundation. The volume covers international as well as domestic cinema in a variety of genres, providing a range of film choices relevant to clients' lives. Beyond this, it expands on universal concepts of strengths, capabilities, and coping methods. Chapters in The Cinematic Mirror: analyze how movies can create and relieve trauma, challenge Hollywood's portrayal of the American family, overview the use of movies to examine relationships in therapy, explore the acclaimed Up television cinema verite series as studies in personal growth and social change, reinterprets images of disability in terms of positive psychology, examines models, or the lack thereof, for the American adolescent rite of passage, traces the history of mental illness stereotypes in film. The collective wisdom found in The Cinematic Mirror for Psychology and Life Coaching will bring professionals involved in healing, coaching, counseling, education, and mentoring not only new applications but also new appreciation for the transformative power of film. That power already exists. Readers just have to "SEE" it.
