"A page turner. With candor and clarity, Tony Wagner tells the story of his remarkable life and, in so doing, tells the story of our education system." —Angela Duckworth, Founder and CEO, Character Lab, and New York Times bestselling author of Grit One of the world's top experts on education delivers an uplifting memoir on his own personal failures and successes as he sought to become a good learner and teacher. Tony Wagner is an eminent education specialist: he has taught at every grade level from high school through graduate school; worked at Harvard; done significant work for the Bill & Melinda Gates Foundation; and speaks across the country and all over the world. But before he found his success, Wagner was kicked out of middle school, expelled from high school, and dropped out of two colleges. Learning by Heart is his powerful account of his years as a

student and teacher. After struggling in both roles, he learned to create meaningful learning experiences despite the constraints of conventional schooling--initially for himself and then for his students--based on understanding each student's real interests and strengthening his or her intrinsic motivations. Wagner's story sheds light on critical issues facing parents and educators today, and reminds us that trial and error, resilience, and respect for the individual, are at the very heart of all teaching and learning.

Academia and Children's Literature

Teaching Language and Literature in Elementary Classrooms

Gratitude Prayers

How is academia portrayed in children's literature? This Element ambitiously surveys fictional professors in texts marketed towards children, who are overwhelmingly white and male, tending to be elderly scientists. Professors fall into three stereotypes: the vehicle to explain scientific facts, the baffled genius, and the evil madman. By the late twentieth century, the stereotype of the male, mad, muddlehead, called Professor SomethingDumb, is formed in humorous yet pejorative fashion. This Element provides a publishing history of the role of academics in children's literature, questioning the book culture which promotes the enforcement of stereotypes regarding intellectual expertise in children's media. This title is also available, with additional material, as Open Access.

Slowly, his soft habits disappear as he forages for food, fashions a warm nest in a hollow log, models clay statues of his family for company, and continues to brood on the problem of how to get across the river--and home. Abel's time on the island brings him a new understanding of the world he's separated from.
