

Macam Macam Metode Pembelajaran Belajarpsikologi Com

Adanya tatanan dunia baru dalam era digital ini agaknya memengaruhi sikap, karakter, serta kecenderungan personal bahkan psikologis generasi muda yang sebagian besar berada pada usia sekolah baik pada level dasar, menengah, atas maupun perguruan tinggi. Sikap, karakter, serta kecenderungan personal generasi muda usia sekolah ini berperan besar dalam munculnya berbagai isu problem belajar di sekolah mulai dari motivasi, bahan ajar, dan media ajar. Sebagai contoh problem motivasi belajar siswa khususnya Generasi Z kerap dijumpai karena derasnya gempuran media sosial berikut segenap atributnya seperti influencer, gamer, youtuber dan sebagainya. Banyak anak-anak sekolah lebih termotivasi mendapatkan popularitas seperti role model mereka masing-masing di media sosial dibanding prestasi akademik karena umumnya penggiat media sosial memang tidak mengangkat tema akademis. Hal tersebut pada dasarnya bukan hal yang bersifat negatif mengingat di era digital ini bahkan keterampilan mengelola media sosial dapat menjadi aset yang sangat berharga. Akan tetapi, hal ini banyak disalah artikan oleh Generasi Z sehingga menurunkan motivasi belajar dan menimbulkan problem bagi sekolah, guru, maupun orangtua.

Perubahan kurikulum tentu saja berpengaruh pada sistem pembelajaran. Menyadari hal tersebut kami berusaha mempersembahkan Model Pembelajaran Budi Pekerti Berbasis Budaya Batak Toba yang dapat membentuk karakter siswa dan juga efektif untuk meningkatkan hasil belajar siswa. Dalam Model Pembelajaran Budi Pekerti Berbasis Budaya Batak ini kami lebih menekankan pada aspek kognitif, afektif, dan psikomotorik secara seimbang yang berorientasi pada pembelajaran Berbasis Budaya Batak Toba. Model Pembelajaran Budi Pekerti Berbasis Budaya Batak ini dipergunakan untuk memenuhi kebutuhan media belajar yang mengacu pada standar Kurikulum yang berlaku. Selain sesuai dengan standar pembelajaran yang berlaku saat ini, penyajian materi buku ini juga kami sajikan secara sistematis, sederhana, dan komunikatif sehingga mudah dimengerti. Model Pembelajaran Budi Pekerti Berbasis Budaya Batak ini disusun dengan mengacu pada pendekatan Saintifik. Model Pembelajaran Berbasis Budaya Batak Toba ini memandang sebagai kegiatan manusia dan harus dikaitkan dengan realitas. Budaya Batak Toba harus dekat dan relevan dengan kehidupan siswa sehari-hari. Model Pembelajaran Budi Pekerti Berbasis Budaya Batak dikemas sebagai proses “ memberikan masalah nyata yang terbimbing ” . Di sini siswa dapat mengalami proses yang sama dengan proses penemuan ide dan konsep Pembelajaran Budi Pekerti Berbasis Budaya Batak Toba. Proses penemuan kembali ide dan konsep Pembelajaran Budi Pekerti Berbasis Budaya Batak Toba ini dilakukan melalui Pembelajaran secara horizontal dan vertikal. Penyusun berharap dengan menggunakan model ini dapat membentuk karakter siswa dan efektif meningkatkan hasil belajar siswa. Dalam pengelolaan pembelajaran dengan menggunakan model ini diharapkan dapat menjadi lebih baik dan membantu profesionalisme guru sebagai tenaga pengajar.

The Visual Dictionary of Graphic Design is a comprehensive guide to the numerous terms used within graphic design and associated disciplines. Over 250 terms are explained and contextualized, with concise definitions accompanied by illustrations and examples taken from historical and contemporary graphic design. The dictionary covers traditional practice and process terms as well as modern terminology. It also defines a wide variety of practical terms, such as Perfect binding, Deboss and Strikethrough, as well as movements and styles including Surrealism, Psychadelia and Postmodernism.

An essential resource for understanding the main principles, concepts, and research findings of key theories of learning-especially as they relate to education-this proven text blends theory, research, and applications throughout, providing readers with a coherent and unified perspective on learning in educational settings.

Key features of the text include: Vignettes at the start of each chapter illustrating some of the principles discussed in the chapter, examples and applications throughout the chapters, and separate sections on instructional applications at the end of each chapter. A new chapter on Self-Regulation (Chapter 9). Core chapters on the neuroscience of learning (Chapter 2), constructivism (Chapter 6), cognitive learning processes (Chapter 7), motivation (Chapter 8), and development (Chapter 10) all related to teaching and learning. Updated sections on learning from technology and electronic media and how these advancements effectively promote learning in students (Chapters 7 & 10) Detailed content-area learning and models of instruction information form coherence and connection between teaching and learning in different content areas, learning principles, and processes (Chapters 2-10). Over 140 new references on the latest theoretical ideas, research findings, and applications in the field.

Buku ajar ini penulis tulis sebagai salah satu rujukan bagi mahasiswa Program Studi Pendidikan Guru Sekolah agar dengan mudah untuk mengetahui serta memahami tentang pengelolaan kelas di sekolah dasar.

Psikologi merupakan ilmu yang mempelajari tingkah laku manusia. Tingkah laku di sini diartikan secara luas ialah segala kegiatan, tindakan perbuatan manusia yang kelihatan maupun yang tidak kelihatan, yang disadari maupun tidak disadarinya. Termasuk di dalamnya: cara berbicara, berjalan, berpikir atau mengambil keputusan, cara ia mengambil sesuatu, caranya beraksi terhadap segala sesuatu yang datang dari luar dirinya maupun dari dalam dirinya. Psikologi pendidikan adalah cabang dari ilmu psikologi yang mengkhususkan diri pada cara memahami pengajaran dan pembelajaran dalam lingkungan pendidikan.

Buku ini disusun dengan judul Psikologi Pendidikan mampu membantu menambah bahan ajar dan mahasiswa dalam mempelajari psikologi dan untuk mempermudah mempelajari materi psikologi pendidikan. Psikologi Pendidikan ini diterbitkan oleh Penerbit Deepublish dan tersedia juga dalam versi cetak.

Provides a collection of teaching models that can be incorporated into a curriculum.

An Introduction for Students of Education

Educating for Character

(by) Edward L. Thorndike. Ed. and Abridged by Geraldine Joncich Clifford

PSIKOLOGI PENDIDIKAN DAN PEMBELAJARAN

A Systematic Approach to Education

What It Is and Why It's Here to Stay

Now in its fourth edition, Communication and Human Behavior continues to offer students a broad introduction to the study of communication which is expansive yet integrated, that links theory to practice, and that is rigorous yet readable. Neither a watered-down treatment of the subject nor a how-to text, this volume presumes that the study of communication in human affairs is a complex phenomenon with important and far-reaching effects. Employing a thorough description of a variety of approaches and using the cohering insights of systems theory, the text presents to students the broad and colorful landscape of the field, outlines the history of communication study, and focuses on communication as a basic life process. Further, it develops an awareness of verbal and nonverbal codes used in sending and receiving messages, and examines the role of media in multiple contexts of human life.

The Psychology of Learning: An Introduction for Students of Education provides a comprehensive coverage of educational psychology. The title tackles various psychological variables that play a critical role in education. The text first deals with learning theories, such as classical conditioning, operant conditioning, and the Gestalt theory. Next, selection deals with the concept of memory, which includes perception, short- and long-term memory, and forgetting. The text also talks about motivation, along with skills and language. Chapter 7 covers thinking and problem-solving, while Chapter 8 tackles intelligence and ability. The coverage of the title also includes personality and morality. The book will be of great use to student teachers, instructors, and behavioral scientists.

With its hallmark ASSURE technology integration model and classroom cases, this renowned text places you squarely in the classroom while providing a framework that teaches you to apply what you learn about computers, multimedia, Internet, distance learning, and audio/visual technologies to the 21st Century classroom instruction. Filled with examples drawn from authentic elementary and secondary education situations, this text paints a vivid picture of technology and media enhancing and supporting teaching and learning. The ASSURE cases are supported by video, guided reflection prompts, and lesson plans that demonstrate strong technology integration and lesson planning. In addition to preparing educators with best practices to incorporate technology and media to meet the needs of 21st Century learners, the book includes strong coverage of copyright concerns, free and inexpensive media resources, as well as learning theory and instructional models. The tenth edition updates reflect the accelerating trend toward digitizing information and school use of technologies, especially in the Web 2.0 era. The tenth edition also addresses the interaction among the roles of teachers, technology coordinators, and school media specialists, all complementary and interdependent teams within the school. Associated online resources sold seperately Fall 2011 at www.myeducationkit.com. Experiential learning is a singularly powerful approach to teaching and learning that is based on the fact that people learn best through experience. In this extensively updated book, the author offers the most complete and up-to-date statement of the theory of experiential learning and its modern applications in education, work, and adult development.

Discover how today's corporations are benefiting from accelerated learning to speed training time, improve results, and reduce costs. Accelerated learning is the use of music, color, emotion, play, and creativity to involve the whole student and enliven the learning experience. The Accelerated Learning Handbook is the first definitive book to explain state-of-the-art accelerated learning techniques to trainers and teachers, and features 40 techniques designed to save money while producing far better results. Leading expert Dave Meier provides an overview of the background and underlying principles of accelerated learning, and reviews the latest supporting research results. Training professionals will look to The Accelerated Learning Handbook to: Improve the long-term value of training Cut course development time by half Discover tips for music- and computer-based learning Uses the theories of Howard Gardner to discuss the integration of the multiple intelligences approach into teaching reading and writing. This sixth edition provides an essential introduction to the major theoretical approaches in counselling and psychotherapy today. Comprehensive and accessible, it now includes two brand new chapters on Mindfulness and Positive Therapy, as well as additional content on ethics, on new developments in each approach, including the latest research and updated references. Following a clearly-defined structure, each chapter describes the origin of the therapeutic approach, a biography of its originator, its theory and practice, discusses case material and further developments, and suggests further reading. Each chapter also contains review and personal questions. Richard Nelson-Jones' authoritative and practical textbook is the ideal companion for students on introductory courses and those embarking on professional training.

Experiential Learning

Making the Words Come Alive

What do we mean by literacy, why it matters and what happens if we don't get it right?

We live in an era when the unprecedented speed of change means: The only certainty is uncertainty; you can't predict what skills will be useful in ten years time; in most professions knowledge is doubling every two or three years; and no job is forever--so being employable means being flexible and retraining regularly. Accelerated Learning into the 21st Century contains a simple but proven plan that delivers the one key skill that every working person, every parent and student must master, and every teacher should teach: it's learning how to learn. The theory of eight multiple intelligences (linguistic, logical-mathematical, visual-spatial, kinesthetic, musical, interpersonal, intrapersonal, and naturalist) developed by Howard Gardner at Harvard University provides a foundation for the six-step MASTER-Mind system to facilitate learning (an acronym for Mind, Acquire, Search, Trigger, Exhibit, and Review), and is enhanced by the latest findings on the value of emotion and memory on the process of learning. Combined with motivational stories of success applying these principles, and putting forth a clear vision of how the United States can dramatically improve the education system to remain competitive in the next century, Accelerated Learning into the 21st Century is a dynamic tool for self-improvement by individuals as diverse as schoolchildren and corporate executives. When asked to define the ideal leader, many would emphasize traits such as intelligence, toughness, determination, and vision—the qualities traditionally associated with leadership.

Often left off the list are softer, more personal qualities—but they are also essential. Although a certain degree of analytical and technical skill is a minimum requirement for success, studies indicate that emotional intelligence may be the key attribute that distinguishes outstanding performers from those who are merely adequate. Psychologist and author Daniel Goleman first brought the term "emotional intelligence" to a wide audience with his 1995 book of the same name, and Goleman first applied the concept to business with a 1998 classic Harvard Business Review article. In his research at nearly 200 large, global companies, Goleman found that truly effective leaders are distinguished by a high degree of emotional intelligence. Without it, a person can have first-class training, an incisive mind, and an endless supply of good ideas, but he or she still won't be a great leader. The chief components of emotional intelligence—self-awareness, self-regulation, motivation, empathy, and social skill—can sound unbusinesslike, but Goleman found direct ties between emotional intelligence and measurable business results. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world—and will have a direct impact on you today and for years to come.

The Mentality of Apes

Quantum Learning

Sensible Religion

Introduction to Psychology

Science in the Classroom

Contextual Teaching and Learning is an examination of a holistic approach to education. The book provides its readers with a comprehensive definition of Contextual Teaching and Learning (CTL), discussing its origins and philosophy, its basis in psychology, neuroscience, modern physics and biology. While attitudes toward education are often shaped by popular views in science, author Elaine B Johnson outlines the importance of integrating modern scientific discoveries into current education practices. Contextual Teaching and Learning: What It Is and Why It's Here to Stay stresses interdependence, differentiation, and self-organization as the principals that form CTL, as opposed to the dualism between thought and action that plagues traditional views on education. Elaine B Johnson illustrates the relationship between brain functions, memory retention, and teaching methods, and the significance of incorporating real life examples in lesson plans.

Around the globe religion is under attack. Humanists, secularists and atheists depict believers as deluded and dangerous. The aim of this book is to challenge this perception. Sensible Religion defends the validity and emphasises the excitement of the religious quest across the faiths. It demonstrates that the practice of sensible religion is often a courageous path pitted against religious extremism and secularism. Written by committed believers from the major world's faiths, the book endorses the term 'sensible' as expressing religious reasonableness as well as sensitivity to criticism and new insights. Followers of the different traditions live ordinary lives in the mainstream of the world. This volume therefore addresses beliefs and the manner in which these convictions relate to social, political and ethical action. Countering the argument that religion is at root extremist and irrational, Sensible Religion brings together thoughtful and critical reflections by leading thinkers about humanity's spiritual quest.

"Model Pembelajaran Berbasis Budaya Batak" ini dipergunakan untuk memenuhi kebutuhan media belajar yang mengacu pada standar Kurikulum yang berlaku. Selain sesuai dengan standar pembelajaran yang berlaku saat ini, penyajian materi buku ini juga kami sajikan secara sistematis, sederhana, dan komunikatif sehingga mudah dimengerti. Model ini disusun dengan mengacu pada pendekatan Saintifik dengan pandangan kehidupan realitas budaya yang seharusnya dekat dan relevan dengan kehidupan siswa sehari-hari.

This indispensable handbook provides helpful strategies for dealing with both the everyday challenges of university teaching and those that arise in efforts to maximize learning for every student. The suggested strategies are supported by research and adaptable to specific classroom situations. Rather than suggest a "set of recipes" to be followed mechanically, the book gives instructors the tools they need to deal with the ever-changing dynamics of teaching and learning. Principles of Instructional Design

Freedom to Learn

Abstract: A reference text for professional educators presents guidelines and principles. Procedures of instructional design are related to the goals of various teaching models. The material is organized into 4 principal sections, including basic principles of instructional systems and their design; basic processes in learning and instruction, emphasizing the goals and outcomes of instruction and factors associated with the varieties of learning; guidelines and models for designing instruction; and various instructional delivery systems for group or individualized instruction, and methods for evaluating instruction efficacy. (wz).

Psikologi pendidikan dan pembelajaran menawarkan sejumlah gagasan segar untuk memberikan daya rangsang bahwa, psikologi pendidikan Islam merupakan bagian yang tidak terpisahkan dalam kehidupan sehari-hari, di manapun dan kapanpun berada. Karena dengan mempelajari dan mendalami dengan seksama, kita akan terbawa arus, menjadikan hidup kita akan teratur karena dipengaruhi oleh mindset apa yang sedang kita baca, kita pikirkan, dan kita rasakan akan menjadi habit, yakni tindakan yang kita lakukan secara berulang-ulang, baik itu sadar ataupun tidak sadar, akan menjadi kebiasaan dalam hidup dimanapun dan kapanpun. Saat kita melihat seorang mahasiswa katakanlah mahasiswa A. Ia selalu rajin mengerjakan tugas, tidak pernah terlambat, kuta bisa kagum padanya. Tetapi apa yang dikatakan Aristoteles, bahwa itu bukan keunggulan perbuatan, tapi karena ia terbiasa

melakukannya, bisa juga dikatakan, mereka yang melakukan hal-hal yang luar biasa berulang kali sehingga yang tampak hebat di mata kita adalah yang biasa di mata mereka, karena terbiasa melakukannya. Begitu pula sebaliknya. Di sini Habit juga selalu dipengaruhi oleh apa, dan dari mana konsumsi yang kita makan, dengan demikian kondisi mindset kita juga akan terpancar dari sumbernya, kalau sumber nutrisi yang di makan tidak sesuai dengan hati nurani, maka habit yang ada adalah mengarah pada hal-hal yang tidak sesuai dengan hati nurani, namun apabila sumber nutrisi itu sesuai dengan hati nurani, maka habit yang keluar pun sesuai dengan habit dari hati nurani, seperti apa yang dibaca, dipikir, dirasa, diucapkan sama dengan apa yang dilakukan dalam kehidupan sehari-hari, begitu pula sebaliknya. Oleh karena itu, dalam berbagai aktifitas tidak terlepas dari proses psikologi pendidikan dan pembelajaran, menjadikan insan-insan menjadi lebih baik dan lebih teratur, karena tahu makna dibalik belajar psikologi pendidikan dan pembelajaran untuk membiasakan belajar secara baik dan benar.

Calls for renewed moral education in America's schools, offering dozens of programs schools can adopt to teach students respect, responsibility, hard work, and other values that should not be left to parents to teach.

How Students Learn: Science in the Classroom builds on the discoveries detailed in the best-selling How People Learn. Now these findings are presented in a way that teachers can use immediately, to revitalize their work in the classroom for even greater effectiveness. Organized for utility, the book explores how the principles of learning can be applied in science at three levels: elementary, middle, and high school. Leading educators explain in detail how they developed successful curricula and teaching approaches, presenting strategies that serve as models for curriculum development and classroom instruction. Their recounting of personal teaching experiences lends strength and warmth to this volume. This book discusses how to build straightforward science experiments into true understanding of scientific principles. It also features illustrated suggestions for classroom activities.

Belajar adalah suatu kata yang sudah akrab dengan semua lapisan masyarakat. Masalah pengertian belajar ini, para ahli psikologi dan pendidikan mengemukakan rumusan yang berlainan sesuai dengan bidang keahlian mereka masing-masing. James O. Whittaker, misalnya, merumuskan belajar sebagai proses di mana tingkah laku ditimbulkan atau diubah melalui latihan atau pengalaman. Cronbach berpendapat bahwa learning is shown by change in behavior as a result of experience. Belajar sebagai suatu aktivitas yang ditunjukkan oleh perubahan tingkah laku sebagai hasil dari pengalaman.
