Machinist's Mate 3 & 2

The Practical Draughtsman's Book of Industrial Design,  
and Machinist's and Engineer's Drawing Companion:  
Forming a Complete Course of Mechanical, Engineering,  
and Architectural Drawing

This book traces the interpretive career of Leviticus 18:3, a verse that forbids Israel from imitating its neighbors. Beth A. Berkowitz shows that ancient, medieval and modern exegesis of this verse provides an essential backdrop for today's conversations about Jewish assimilation and minority identity more generally. The story of Jewishness that this book tells may surprise many modern readers for whom religious identity revolves around ritual and worship. In Leviticus 18:3's story of Jewishness, sexual practice and cultural habits instead loom large. The readings in this book are on a micro-level, but their implications are far-ranging: Berkowitz transforms both our notion of Bible-reading and our sense of how Jews have defined Jewishness.

and machinist's and engineer's drawing companion:  
forming a completed course of mechanical, engineering,  
and architectural drawing.

The Linotype Bulletin

Public Personnel Studies

This volume, originally published in 1958, contains a selection of the most important and interesting articles by Knut Wicksell, which had hitherto only been published in Swedish. They cover Wicksell's views on Economics and monetary theory, his theory of production and distribution, some review articles on the works of Pareto, Böhm-Bawerk, Carl Menger and Bowley and some papers on foreign trade problems, written after the First World War. Erik Lindahl's introductory essay gives a picture of Wicksell the social reformer, whose radical opinions often brought him into conflict with the authorities and the general public.

From Antiquity to the Present

Report of the Commissioner of Education [with  
Accompanying Papers].

The New American State Papers: Science and  
Technology

The Machinist

Forming a Complete Course of Mechanical,  
Engineering, and Architectural Drawing

Describes the working conditions, training,

earnings, and employment outlook for machinists, provides samples of the Civil Service exam, and explains how to prepare for the test

Machinists Monthly Journal

The Practical Mathematics of the Machinist's Trade

**Effective Communication and Soft Skills provides**

**a clear understanding of the attributes of good communication vis-a-vis soft skills and hard skills. It offers practice and assessment modules to sharpen learning, while covering all the four tenets of language learning (listening, speaking, reading and writing). It covers all essential topics for teachers and students of BCom, BBA and MBA and mass communications, as well as professionals in all industries and is a comprehensive resource for inter-personal communication in the professional world.**

**Typographical Journal**

**For Superintendents, Engineers and Operators of Power and Electric Plants, and All Machinery**

**Machinists and Blacksmiths International Journal**

**Machinist's Mate 1 & C**

**Devoted to Machinery and Machine Tools**

*The years 1898-1902 were prosperous for the U.S., marked by economic growth and industrial expansion, a rising material standard of living, and low unemployment.*

*The period was one of unprecedented growth for the American Federation of Labor (AFL), and it found Samuel Gompers continuing to advocate the organization of all workers and focusing his efforts on establishment of local and national trade unions, central labor bodies, and state federations, and on the affiliation of these organizations with the AFL. From reviews of earlier volumes "This collection belongs on the shelf of anyone teaching American labor history, but it also should prove useful to scholars with related interests." -- James Grossman, Illinois Historical Journal*

*"Distinguished and invaluable. . . . Labor historians would be well advised to clear shelf space for it." -- Bruce Laurie, Industrial and Labor Relations Review*
