**Seeing Social Problems: The Hidden Stories Behind Contemporary Issues** shows students how to think about social problems in a new way, by carefully analyzing headline-making issues they are already familiar with and illustrating the connection between individual problems and larger social forces. Each chapter engages students in thinking about the world sociologically by focusing on a specific case study that represents a more general social problem. The chapters always start with the knowledge, beliefs, attitudes, and personal experiences that students bring to the case—what author Ira Silver refers to as the conventional wisdom—and effectively demonstrate to them the “first wisdom” of sociology: “things are not what they seem.” In each instance, Silver shows how sociologists ask questions, gather empirical data, use multiple perspectives, and consider larger social forces to discover the “hidden stories” behind individual behavior.

A. Javier Treviño, working with a panel of experts, thoroughly examines all aspects of social problems, providing a contemporary and authoritative introduction to the field. Each chapter is written by a specialist on that particular topic and the unique, contributed format ensures that the research and examples provided are the most current and relevant

John shares his enthusiasm, excitement, and teaching experience through a clear and engaging writing style and emphasis on sociology's relevance to everyday life.

Frames social problems and solutions through politics Macionis's book is the only social problems text that explains how society frames social problems and solutions through politics. The text analyzes social issues and policies, using the concepts of sociological theory and the everyday language of politics. It also helps students understand the attitudes and values that define the political spectrum in the United States. Once students know how social problems are defined by our society through politics, and how the policies to solve these problems are developed, they can become involved in solving social problems through activism and political involvement.
