An exploration of why  
we play video games

# Download Free Macroeconomics Unit Test Answers

despite the fact that we are almost certain to feel unhappy when we fail at them. We may think of video games as being "fun," but in *The Art of Failure*, Jesper Juul claims that this is almost entirely mistaken. When we play video games, our facial expressions are

# Download Free Macroeconomics Unit Test Answers

rarely those of happiness or bliss. Instead, we frown, grimace, and shout in frustration as we lose, or die, or fail to advance to the next level. Humans may have a fundamental desire to succeed and feel competent, but game players choose to engage in an

# Download Free Macroeconomics Unit Test Answers

activity in which they are nearly certain to fail and feel incompetent. So why do we play video games even though they make us unhappy? Juul examines this paradox. In video games, as in tragic works of art, literature, theater, and cinema, it

# Download Free Macroeconomics Unit Test Answers

seems that we want to  
experience

unpleasantness even if  
we also dislike it.

Reader or audience  
reaction to tragedy is  
often explained as  
catharsis, as a purging  
of negative emotions.

But, Juul points out,  
this doesn't seem to be  
the case for video  
game players. Games

# Download Free Macroeconomics Unit Test Answers

do not purge us of unpleasant emotions; they produce them in the first place. What, then, does failure in video game playing do? Juul argues that failure in a game is unique in that when you fail in a game, you (not a character) are in some way inadequate. Yet games also

# Download Free Macroeconomics Unit Test Answers

motivate us to play more, in order to escape that inadequacy, and the feeling of escaping failure (often by improving skills) is a central enjoyment of games. Games, writes Juul, are the art of failure: the singular art form that sets us up for failure and allows

us to experience it and experiment with it.

The Art of Failure is essential reading for anyone interested in video games, whether as entertainment, art, or education.
