My First Cupcake Decorating Book

Grab your bucket and join the search for all the cool bugs outside! This fun rhyming story lists all the bugs you can imagine—creep bugs, climb bugs, sticky-slime bugs! Discover the vast world of insects in this photo-filled book.

Journey through the mountain in this new pop-up title and discover nature's secrets while you explore each environment with rhymes, facts and beautiful artwork.

Enter the hilarious world of Billie Upton Green . . . The start of an exciting new series full of Billie's laugh-out-loud observations and doodles! There is a new girl at Billie's school, and Billie takes it upon herself to show her around, teach her the Biscuit Laws, and remind her that yes, two women can get married (after all, Billie's mums' wedding is the event of the year). But then suspicion sets in. The new girl seems very close to Billie's best friend Layla. And doesn't she know a little too much about the latest big school heist – the theft of Mrs Robinson's purse...?

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

In this book you will discover transforming caterpillars and architect arachnids as well as bodybuilding ants and industrious bees. You can build your own encyclopedia with A Ladybird Book: the collectable series for curious kids.

Pie Corbett ' s ground-breaking Talk for Writing approach has been successfully used by thousands of schools to teach writing creatively in an engaging way that motivates children. Now Pie and Julia take this multi-sensory approach to Early Years settings introducing a simple way to inspire young children ' s language development through storytelling.

Children learn language through memorable, meaningful repetition. The Talk for Writing approach enables children to internalise the language of story so that they can imitate it, innovate on it and create their own effective stories independently. Talk for Writing in the Early Years will show you how to put rhyme and story at the heart of your work with children and parents so that young learners language development and creativity flourishes. This multimedia resource shows you how to:
• Select a story or rhyme the children will enjoy and tell it engagingly, encouraging the children to join in
•Use a story map so they can picture what happens
•Use actions to reinforce meaning and emphasise key language patterns

•Help children build a bank of tales, developing their linguistic repertoire
The 2 OLCs contain:
1 Footage of Pie Corbett conferences with EY teachers showing Talk for Writing in action
2 Clips of nursery children engaged in the Talk for Writing approach
3 Advice on how to use the OLC and handouts to train all staff in the approach
4 Interviews with parents and nursery school teachers on the impact of Talk for Writing
5 21 stories with story maps

The ocean is the largest habitat on Earth. It covers over seventy per cent of the planet's surface and is home over 200,000 animal species. Sea Creatures takes readers from the coastline to the ocean depths. In this book, you'll visit mudflats, tropical coral reefs and icy Arctic waters to discover some of the amazing marine creatures that call the ocean home. You can build your own encyclopedia with A Ladybird Book: the collectable series for curious kids.

A Ladybird Book: Insects and Minibeasts

James and the Giant Peach

*Beautiful, simply written observations about the beetle, cicada, praying mantis, glow-worm, wasp, grub, cricket, locust and other creatures, describing how they hunt, build nests, feed families, and more.*

*Are you mad about space? From astronauts and asteroids to rockets and robots, this book is packed with fascinating facts and key information for all young space enthusiasts. Ladybird's Mad About series is all about giving its readers all the facts they could possibly need about their favourite subjects. Get ready to impress all your friends with all your new knowledge!*

*Enter the kingdom of bugs and their close relatives for a magical journey through the forest floor, down into the deepest caves, and even across the open ocean... Insects, arachnids, worms, and mollusks are crawling across the pages of this colorful bug book, which combines gorgeous illustrations and photos to help young animal enthusiasts spot and learn all the main bug groups. From dancing bees to cartwheeling spiders, from butterfly athletes to the beetles that eat poo, they'll learn all about the incredible secret world of creepy-crawlies. And they'll find out how bugs help to look after our planet too. The Book of Brilliant Bugs, written by insect expert Jess French and illustrated by Claire McElfrack, takes children on a fascinating journey of exploration, showing them just how amazing creepy-crawlies are, what they do for our planet, and how we can help them. It includes bug relatives such as slimy slugs, web-spinning spiders, and scuttling centipedes, plus amazing facts on how bugs pass on messages, compete for food, seek true love, and fill the air with buzzing wings.*

*Danger! Action! Trouble! Adventure! Introducing The DATA Set, a brand-new chapter book series for young readers. What would happen if your next-door neighbor were a mad scientist? Gabe, Laura, and Cesar live on a quiet cul-de-sac. They are the whiz kids of Newtonburg Elementary and each specializes in their own subject. In fact, everyone in town lovingly refers to them as the Data Set. However, their quiet days of learning take a sudden turn for the exciting when they meet Dr. Gustav Bunsen—a mad scientist who throws the kids into a wild spiral of adventures. When Dr. Bunsen’s latest invention, a growth ray, hits several tiny animal toys, the mini beasts don’t just grow, they come to life! The DATA Set love their new tiny pets...until they continue to grow. Now there’s an actual elephant in the room—not to mention a chimp, a giraffe, and a dinosaur. When the beasts wander off, it’s up to the DATA Set to track them down. But will they catch the mini beasts before they grow big enough to start trouble in town? With easy-to-read language and illustrations on almost every page, The DATA Set chapter books are perfect for beginning readers!*

Are you mad about dinosaurs? From food and fossils to herds and horns, this book is packed with fascinating facts and key information for all young dinosaur enthusiasts. Ladybird's Mad About series is all about giving its readers all the facts they could possibly need about their favourite subjects. Get ready to impress all your friends with all your new knowledge! Get ready to roar with this updated edition of DK's beloved Big Book of Dinosaurs Dinosaurs fascinate young children, and this colorful catalog of those mysterious creatures from the past will keep even toddlers entertained for hours. Children will love spotting and learning to name all the different dinosaurs--from the fierce, meat-eating Tyrannosaurus and the long to the armor-plated Stegosaurus and the tiny, hen-sized Compsognathus.

Our highly seasonal world restricts insect activity to brief portions of the year. This feature necessitates a sophisticated interpretation of seasonal changes and enactment of mechanisms for bringing development to a halt and then reinitiating it when the inimical season is past. The dormant state of diapause serves to bridge the unfavourable seasons, and its timing for synchronizing insect development. This book explores how seasonal signals are monitored and used by insects to enact specific molecular pathways that generate the diapause phenotype. The broad perspective offered here scales from the ecological to the molecular and thus provides a comprehensive view of this exciting and vibrant research field, offering insights into diapause management, evolution, speciation, climate change and disease transmission, to human health, as well as analogies with other forms of invertebrate dormancy and mammalian hibernation.

Katie's visit to the natural history museum turns into an adventure when she steps through a door and finds herself in a land of real live dinosaurs, one of whom is lost and needs her help to find his way home.

Graphic design for fashion must represent the core values of the brand while pushing boundaries and expectations. Often seen as a showcase relationship for a design studio, the seasonal nature of the end product provides a limitless testing ground for new ideas and innovative production solutions. This visually led book contains a global selection of the best graphic design studios' work within the fashion industry – from packaging and lookbooks to swing tags and invitations – with exclusive insights from both clients and designers. The book features not simply the visual identities of big budgets and luxury brands, but showcases the creative processes of the world's leading design studios. The result is a visually diverse collection of graphic design, which is a rich source of inspiration for new and groundbreaking production techniques and a perfect reference point for those across the creative industries.

Presents an account of a key period in American graphic design as it manifested itself in various media, covering major historical influences and significant works.

Budding bakers will love these 35 recipes for making super-cute cakes! You'll learn how to make delicious cupcakes, cookies, cake pops and more - and transform them into fantastic creations. In Cool Cupcakes, make pink piggy cupcakes, classic butterfly cakes, pretty spotty cupcakes and more. The next chapter, Crazy Cookies, gives you ideas for creating ladybird cookies and pretty star cookies, as well as for gingerbread - including gingerbread families, animals and a village. Then have a go at the Brilliant Brownies and Cake Pops - from adorable penguin pops to delicious brownie pops and cute brownie owls. Finally, take your pick from the Novelty Cakes, where there are super snowmen, under the sea mini cakes and honey flake crunchies. There are basic recipes so that you can make the cakes in any flavour you want, and a techniques section that will teach you all you'll need to know, such as how to pipe icing and how to make shapes out of marzipan. All the projects are easy to follow with adorable artworks to guide you along the way; plus, each one has a grade so you can start with the easiest and then move on as your decorating skills improve.

From the World's No. 1 Storyteller, James and the Giant Peach is a children's classic that has captured young reader's imaginations for generations. One of TIME MAGAZINE's 100 Best Fantasy Books of All Time After James Henry Trotter's parents are tragically eaten by a rhinoceros, he goes to live with his two horrible aunts, Spiker and Sponge. Life there is no fun, until James accidentally drops some magic crystals by the old peach tree and strange things start to happen. The peach at the top of the tree begins to grow, and before long it's as big as a house. Inside, James meets a bunch of oversized friends—Grasshopper, Centipede, Ladybug, and more. With a snip of the stem, the peach starts rolling away, and the great adventure begins! Roald Dahl is the author of numerous classic children's stories including Charlie and the Chocolate Factory, Matilda, The BFG, and many more! James and the Giant Peach remains a favorite among kids and parents alike nearly 60 years after it was first published, thanks to its vivid imagery, vibrant characters and forthright exploration of mature themes like death and hope.
