Today history of human race is at cross roads. We know for certain that our planet is 300 crores of years old. Compared to this age of planet our religious philosophies are of very recent origin. All religious Islam. All these religions were created for the living conditions in the desert. Least common denominator of all the above religion and science became a fact of life. Space in the human mind got converted into two parts, one occupied by the philosophers trying to interconnect between these two parts. Finally humanity arrived in two lay religions namely communism and capitalism. The capitalism stresses on the creation of wealth. Through a strange twist of history the humanity is in the midst of globalization and creation of the end of the history of human race? Three possibilities are forthcoming. A nuclear war in the Middle East can play havoc. Humanity is now riding on a ship floating on a ship floati to sink. Environmental pollution is causing growing concern about global warming. Situation is alarming. It is time for the world leaders to think aloud and take concrete steps to prevent a disastrous calamity engulfing the human race.

The world is fast speeding toward its total annihilation. Peace has disappeared from the face of this planet earth. It seems all the forces of evil have climbed up out of the hades to destroy this world completely. Love, kindness, charity, honesty, integrity are no more seen among masses. Nobody cares for anybody. They are all experts at doing evil, as the 5th century BC prophet Micah has observed. One can not confide inner secrets to one's life partner. Very horrible hard times have fallen on humanity. The lead figure, Walker Good man, goes researching the mysteries of this universe, starting with Socrates . He comes to the conclusion that historical God-man Jesus Christ is coming again to lift his saints to his heavenly Kingdom.

All others will perish in the everlasting hell fire and burning brimstone. Study conducted at Dharmapuri and Theni districts of Tamil Nadu, India.

The World Sustainable Development Outlook series has been developed to provide an overview of sustainable development, to discuss why it is important and to provoke forward thinking on the development of a more coherent approach is used to critically examine the interrelationship between the natural, governmental, economic and social dimensions of our world and how science and technology can contribute to solutions. Rapid innovation in information and 40-50% of all new jobs will be IT-driven. Education and knowledge are the chief currencies of the modern age, and can also be a strategic resource and a lifeline for sustainable development. Yet, in Africa, millions of people have never made a telephone call. The technological gulf between development and the speedy transition to digitalisation in the West. The impacts on DCs may include an increase in the so-called brain drain drain and growing dependence on foreign aid of a different kind - knowledge aid. There are fears that knowledge imperialism is already with us. What is clear is that most of the most disadvantaged. The interest of industrialised countries in the use of ICTs in DCs has largely been more concerned with the profitability of their own business enterprises than with any broader goals concerning the development of the host countries. DCs face the challenge of either becoming an integral part of the knowledge-based global economy or the wrong side of the knowledge and opportunities of this information revolution while at the same time fostering sustainable development. Adopting a holistic approach, this book aims to critically examine the interrelationship between these different issues in order to reach solutions and a consensus for a better future, taking into account a variety of international, institutional and intellectual perspectives. It uses case and country studies in technological innovation and experience so that lessons in effective management of ICTs can be

Routledge Handbook of Gender in South Asia

Providing a comprehensive overview of the study of gender in South Asia, this Handbook covers the central contributions that have defined this area and captures innovative and sexuality. Chapters are organised thematically in five major sections: Historical formations of gender and the significance of colonialism and the State This timely survey is essential reading for scholars who research and teach on South Asia as well as for scholars in related interdisciplinary fields that focus on women and gender from comparative and transnational perspectives.

Anchoring himself firmly on the ever-contested space of Indian Law and Legal Processes, and drawing substantive support from his rich and varied experience as a Law Enforcement Officer in the Police Officers, Advocates, Judicial Officers, Social Activists and the general public. The Author's utopian ideal that no innocent person should be punished and no offender should go unpunished is the dominant message of the book. For this purpose, the Author has given a balanced treatment of the whole problem of crime and the succeeding chapters and 4 Annexures. For example, the 1st Chapters and 4 Annexures and the origin, growth and seizure, examination of witnesses, arrest, are the conduct of investigation. The book contains 27 Chapters and the duties of police, dying declaration, inquest, search and seizure, examination of witnesses, arrest, and the duties of police, the conduct of investigation. The book contains 27 Chapters and the duties of police, the conduct of investigation, the first information report, the jurisdictional limitations of police, dying declaration, inquest, search and seizure, examination of witnesses, arrest, and the duties of police, the conduct of investigation. The book contains 27 Chapters and the duties of police, the conduct of investigation. The book contains 27 Chapters and the duties of police, the conduct of investigation are the conduct of investigation. The book contains 27 Chapters and the duties of police, the conduct of investigation are the conduct of inve interrogation, confession, bail, remand and custody, test identification parade, tender of parado to approver, letter rogatory, extradition, burden of proof and presumptions, Police diaries, final report, further investigation and maintenance of Police records. The comparative chart given to aid the Police while conducting investigation will be of immense use with scientific accuracy. Another Chart provided indicating the procedural steps starting from the collection of evidence through the final analysis of the whole crime and its commission would surely empower the investigation. A most praise-worthy feature of the book is of immense use as a ready- reckoner, especially annexure I and II by which a Police Officer may easily find whether a particular offence in any of the most frequently used special enactment is cognizable, bailable etc. The Author has fulfilled the needs of the investigating Officers in the epilogue by providing 47 points which may go against the prosecution, and therefore, that the readers would find the book highly informative to have a statutorily authorised answer to any doubt in a given situation in any of the investigative procedures. The citation of 785 landmark judgements of various High Courts and the Supreme Court for the period 1965-2008 in the appropriate chapters is another outstanding feature of the book, making it vade mecum for Police Officers, Advocates, Officers of Law and Courts and also for NGOs, Social Activists and Persons of Public Interest.

This volume explores the transition from colonial to constitutional rule in India, and the assumptions it further makes about what it can, or has to, become in the particular situation of India. The book locates these questions in the reconfiguration of society, power, and the consequent moulding of the citizens, this book emphasises continuity and change in the context of the

movement from the colonial to the constitutional order. It will be of interest to those in politics, history, South Asian studies, policy studies, and sociology.

Advances in the biomedical sciences have raised pertinent, and often paradoxical, questions concerning the Fourth Session of the International Bioethics Committee (IBC), presents the experience of field workers and actors in areas as diverse as health, legal affairs, governance, education and psychology. It takes into account both the various stages of the biological life span and the insertion of women in a particular socio-economic and cultural context. Although the book does not claim to be exhaustive, it shows to what extent the specificity of issues related to women in relation to bioethical issues has sometimes been underestimated. Based on numerous socio-cultural experiences throughout the world, it also provides a useful general view for readers who wish to pursue research or studies in this field. [UNESCO website]

Caste, as it is experienced in everyday life, is the pièce de résistance of this book. Thirty-two voices narrate how from childhood to adulthood, caste in truded upon their lives—food, clothes, games, gait, love, marriage and every aspect of one 's existence including death. Like the editor Perumal Murugan says, caste is like god, it is omnipresent. The contributors write about the myriad ways in which they have experienced caste. It may be in the form of forgoing certain kinds of food, or eating food at secluded corners of a household, or drinking tea out of a crushed plastic cup, or drinking black coffee in a coconut shell or water poured from above into a cupped hand. Such experiences may also take the form of forbidden streets, friends disapproved of and love denied. And when one leaves behind the fear of caste while living one 's life, there is still death to deal with. Celebrating 60 years of the Indian Republic, we bring you Indian Essentials, a light-hearted, tongue-in-cheek ode to India. Dip into this collection and join us to find out what it means to be Made in India. Secret Wars is the first book to systematically analyze the ways powerful states covertly participate in foreign wars, showing a recurring pattern of such behavior stretching from World War I to U.S.-occupied Iraq. Investigating what governments keep secret during wars and why, Austin Carson argues that leaders maintain the secrecy of state involvement as a response to the persistent concern of limiting war. Keeping a war contained. Carson shows that covert interventions can help control escalation, but they are almost always detected by other major powers. However, the shared value of limiting war can lead adversaries to keep secret the interventions that have become an open secret. From Nazi Germany 's role in the Spanish Civil War to American covert operations during the Vietnam War, Carson presents new insights about some of the most influential conflicts of the twentieth century. Parting the curtain on the secret side of modern war, Secret Wars provides important lessons about how rival state powers collude and compete, and the ways in which they avoid outright military confrontations.

Menon shares the stories and events of his life in India and Canada - from heart-rending to hilarious - all done in a compelling manner that takes the reader on a

delightful journey through time and place. A rationalist at heart, he relates dispassionately experiences that border on the paranormal, including a roguish ghost, the mystery of a haunting, and uncanny predictions that materialized. And also, in spite of the struggle of being raised between two households separated by alcoholism and infidelity, he progressively becomes aware of the reality of providence guiding his life through unexpected success. And just when it seems he 's finally on a pinnacle, a shocking experience brings him to a powerful epiphany that alters forever his understanding of karma, and takes him beyond binary notions of happiness and unhappiness. In an engaging and sparkling style, Menon tracks the thread of spirituality running through the tapestry of his life, culminating in a profound awareness of the seminal role played by the inner divinity in each individual 's life.

What is it like to travel with others for adventure, lust and god? This delightful travelogue, in which Srinath Perur embarks upon ten conducted tours, is full of rich experiences: hanging on to a camel in the Thar Desert, joining thousands on a pilgrimage in Maharashtra, crossing living root bridges near Cherrapunji, rediscovering music while on the trail of Kabir, and a lot more. As much about people as it is about places, the book is also a reflection of the nature of popular travel to economies and compulsive picture-taking. How this influences tourists comes across vividly: in their creation of a mini India on a bus as they race through treasured sights in Europe; in their creation of a mini India on a bus as they race through treasured sights in Europe; in their perfunctory devotion as they hop from temple to temple in Tamil Nadu; and in their 'enjoying' with sex workers far away from home. Ironic, and often comic, If It's Monday It Must Be Madurai is an idiosyncratic portrait of India and her people. The Indian village of Deorala in Rajasthan, the northwestern Indian state that borders Pakistan, is neither remote nor feudal in the center of a furor that awoke age-old conflicts in Indian society. Before a crowd of several thousand her husband's funeral pyre. The apparent revival of an ancient tradition opened old wounds in India in 1829, and sati was widely believed to have died out. The fate of 18-year-old Roop Kanwar changed that perception. Mala Sen explores the illuminating and terrifying. The book is part journey through the India that the author knows and loves, and part exploration of the enigma that India still remains in the minds of many. Starting with Kanwar, Sen enters the worlds of three women: a goddess, a burned bride, and a woman accused of killing her daughter, and shows how, in this society in which ancient and modern apparently co-exist comfortably, there is increasingly cause for real alarm. Frontline This book documents the various phases of fertility transition in India. It argues that this transition is best understood as the cumulative effect of behavioural changes - such as delay in marriage and use of contraceptives - which over time has altered social perceptions on fertility. The authors argue that going beyond the formal tools of demography and adopting a qualitative approach would help in understanding the social mechanisms that sustain the diffusion of new family norms. A strength of the book is its development of an original geographical information system based on the census data from the micro-level. This system maps variations across regions within South India and within each state. Christophe Z Guilmoto is Senior Fellow at the French Research Institute for Development (IRD), Paris.
