**In today's world, globalization bears intense interdependencies between countries, and the impact global business transactions have on society and economics is more palpable than ever. Despite this, many developing countries in the global market find themselves struggling to support perpetual population growth. These countries must find ways to attain sustainable development in the economic, social, and environmental sectors. International Perspectives on Socio-Economic Development in the Era of Globalization seeks to examine the existing variability of development in the global marketplace and to identify the catalysts responsible for this disparity of success. This title analyzes the economic frontiers, social norms, and infrastructural capabilities that factor into the socio-economic growth of the developing and under-developed world. This book will become a definitive text for policy makers, academics, students, and business executives.**
