Life is such a funny, amusing journey-when you learn to laugh at yourself and the antics of others. Hello! I am Robyn my pen name is Robyna Smith-Keys. I started working weekends and school holidays in the family salons when I was 5. In 1962 I began my apprenticeship. After a break from the industry to have my babies, I wanted to read all that I could to update my skills. The few books available at that time were over \$300 . In the late 1970s that was a lot of money. In the 1990s I realised, students were not

remembering all they were learning at Beauty School. That is when I started a protocol book for our salons. The books contained all procedures with step by step instructions. My protocol notes are now training manuals for the industry. In the 1990s I was asked to assist with the Australian Standards rewrite and again 2007-2014 to assist with the International Beauty Industry Standards -Training Packages. This is your guarantee when purchasing my books, that the information meets the highest of industry standards. Not everyone has a wonderful Mum, Aunty or Grandmother to hand down their skills. I pray that my books are your loving grandmother handing down her skills with love to you. I also pray that you expand on my skills and become better than me. All my Beauty School Books manuals give you ideas on

Understanding Color and Light for Beauty and Special Effects analyzes and explains traditional color theory for fine artists and applies it to the make-up artist. This book is suitable for both professionals and beginners who wish to train their eye further to understand and recognize distinctions in color. It explains why we see color, how to categorize and identify color, relationships between colors, and it relates these concepts to beauty and special effects make-up. The book teaches the reader how to mix flesh tones by using only primary colors, and explains how these colors in paints and make-up are sourced and created. It also discusses the reason for variations in skin colors and undertones, and how to identify and match these using make-up, while choosing flattering colors for the eyes,

Ideas and techniques are also described for painting prosthetics, in addition to using color as inspiration in make-up designs. The book also discusses how lighting affects color on film, television, theater, and photography sets, and how to properly light a workspace for successful applications.
