**This volume comprises twenty eight papers selected from the widely known work of K.A. Jayaseelan and R. Amritavalli on Dravidian. Collectively, these papers cover the entire area of Dravidian syntax: they range from broad questions such as sentence structure and word order to more particular questions such as the morphological basis of anaphora, the genesis of lexical categories, the morpho-syntax of quantifiers, and the syntax and semantics of questions. Important universalist claims are embedded in these essays; for this reason, this volume will be of interest also to a student of the general theory of syntax. No future discussion of Dravidian (or South Asian) languages is possible without taking into account the insightful analyses set forth in these pages.**

Recent developments in the generative tradition have created new interest in matters of argument structure and argument projection, giving prominence to the discussion on the role of lexical entries. Particularly, the more traditional lexicalist view that encodes argument structure information on lexical entries is now challenged by a syntactic view under which all properties of argument structure are taken up by syntactic structure. In the light of these new developments, the contributions in this volume provide detailed empirical investigations of argument structure phenomena in a wide range of languages. The contributions vary in their response to the theoretical questions and address issues that range from the role of specific functional heads and the relation of argument projection with syntactic processes, to the position of argument structure within a broader clausal architecture and the argument structure properties of less studied categories.

*This is Oscar Wilde's tale of the American family moved into a British mansion, Canterville Chase, much to the annoyance of its tired ghost. The family -- which refuses to believe in him -- is in Wilde's way a commentary on the British nobility of the day -- and on the Americans, too. The tale, like many of Wilde's, is rich with allusion, but ends as sentimental romance. . .*
