*The Oxford Handbook of the History of Nationalism comprises thirty six essays by an international team of leading scholars, providing a global coverage of the history of nationalism in its different aspects - ideas, sentiments, and politics. Every chapter takes the form of an interpretative essay which, by a combination of thematic focus, comparison, and regional perspective, enables the reader to understand nationalism as a distinct and global historical subject. The book covers the emergence of nationalist ideas, sentiments, and cultural movements before the formation of a world of nation-states as well as nationalist politics before and after the era of the nation-state, with chapters covering Europe, the Middle East, North-East Asia, South Asia, Southeast Asia, sub-Saharan Africa, and the Americas. Essays on everyday national sentiment and race ideas in fascism are accompanied by chapters on nationalist movements opposed to existing nation-states, nationalism and international relations, and the role of external intervention into nationalist disputes within states. In addition, the book looks at the major challenges to nationalism: international socialism, religion, pan-nationalism, and globalization, before a final section considering how historians have approached the subject of nationalism. Taken separately, the chapters in this Handbook will deepen understanding of nationalism in particular times and places; taken together, the reader to see nationalism as a distinct subject in modern world history.*

The 7th Edition of Global Marketing Management prepares students to become effective managers overseeing global marketing activities in an increasingly competitive environment. The text's guiding principle, as laid out concisely and methodically by authors Kotabe and Helsen, is that the realities of international marketing are more "multilateral." Suitable for all business majors, the text encourages students to learn how marketing managers work across business functions for effective corporate performance on a global basis and achievement of overall corporate goals. Global Marketing Management brings timely coverage in various economic and financial as well as marketing issues that arise from the acutely recessionary market environment.

Horse Pasture Management begins with coverage of the structure, function and nutritional value of plants, continuing into identification of pasture plants. Management of soil and plants in a pasture is covered next, followed by horse grazing behavior, feed choices of horses, management of grazing horses, and how to calculate how many horses should be grazing relative to land size. Equine management of hay and silage are included, since year-round grazing is not possible on many horse farms. A number of chapters deal with interactions of a horse farm with the environment and other living things. As an aid in good pasture management, one chapter explains construction and use of fencing and watering systems. Contributions are rounded out with a chapter explaining how the University of Kentucky helps horse farm managers develop their pasture management programs. The purpose of the book is to help people provide a better life for horses Provide the basic principles of pasture management for those involved in equine-related fields and study Covers a variety of strategies for managing the behavior, grouping, environmental, and feeding needs of grazing horses to ensure high levels of welfare and health Includes information on environmental best practices, plant and soil assessment, and wildlife concerns Explains pasture-related diseases and toxic plants to be avoided Includes links to useful resources and existing extension programs

Developments such as the demand for minimally-processed foods have placed a renewed emphasis on good hygienic practices in the food industry. As a result there has been a wealth of new research in this area. Complementing Woodhead's best-selling Hygiene in the food industry, which reviews current best practice in hygienic design and operation, Handbook of hygiene control in the food industry provides a comprehensive summary of the key trends and issues in food hygiene research. Developments go fast: results of the R&D meanwhile have been applied in print. Part one reviews research on the range of contamination risks faced by food processors. Building on this foundation, Part two discusses current trends in the design both of buildings and types of food processing equipment, from heating and packaging equipment, to valves, pipes and sensors. Key issues in effective hygiene management are then covered in part three, from risk analysis, good manufacturing practice and standard operating procedures (SOPs) to improving cleaning and decontamination techniques. The final part of the book reviews developing hygiene control and surface cleanliness to sampling techniques and hygiene auditing. Like Hygiene in the food industry, this book is a standard reference for the food industry in ensuring the highest standards of hygiene in food production. Standard reference on high hygiene standards for the food industry Provides a comprehensive summary of the key trends in food hygiene research Effective hygiene management strategies are explored

Meeting the Challenges of Data Quality Management outlines the foundational concepts of data quality management and its challenges. The book enables data management professionals to help their organizations get more value from data by addressing the five challenges of data quality management: the meaning challenge (recognizing how data represents reality), the process/quality challenge (creating high-quality data by design), the people challenge (building data literacy), the technical challenge (enabling organizational data to be accessed and used, as well as analyzed), and the governance challenge (ensuring organizational leadership treats data as an asset). Organizations that fail to meet these challenges get less value from their data than organizations that address them directly. The book describes core data quality management capabilities and introduces new and experienced DQ practitioners to practical techniques for getting value from activities such as data profiling, DQ monitoring and DQ reporting. It extends these ideas to the management of data quality within big data environments. This book will appeal to data quality and data management governance, across a wide range of industries, as well as academic and government organizations. Readership extends to people higher up the organizational ladder (chief data officers, data strategists, analytics leaders) and in different parts of the organization (finance professionals, operations managers, IT leaders) who want to leverage their data and their organizational capabilities (people, processes, technology) to drive value and gain competitive advantage. This will be a key reference for graduate students in computer science programs which normally have a data quality management is an often-overlooked aspect of data management courses. Describes the importance of high-quality data to organizations wanting to leverage their data and, more generally, to people living in today's digitally interconnected world Explores the five challenges in relation to organizational data, including "Big Data," and proposes approaches to meeting them Clarifies how to apply the core capabilities required for an effective data quality management program (data standards definition, data quality assessment, monitoring and reporting, issue resolution)

processes and as integral components of projects and operations Provides Data Quality practitioners with ways to communicate consistently with stakeholders A concise guide to the care of small mammals, Ferrets, Rabbits, and Rodents: Clinical Medicine and Surgery covers the conditions seen most often in veterinary practice. The book emphasizes preventive medicine along with topics including disease management, ophthalmology, dentistry, and zoonosis. More than 400 illustrations demonstrate key concepts related to radiographic interpretation, relevant anatomy, and diagnostic, surgical, and therapeutic techniques. Now in full color, this edition adds coverage of more surgical procedures and expands coverage of Quesenberry and James W. Carpenter, along with a team of expert contributors, the "Pink Book" provides an authoritative, single source of information that is hard to find elsewhere. A logical organization makes it quick and easy to find important information, with each section devoted to a single animal and chapters within each section organized by body system. Over 400 photographs and illustrations highlight key concepts such as radiographic interpretation and the main points of diagnostic, surgical, and therapeutic techniques. A chapter on ophthalmology covers rabbits, rodents, and other small mammals. Coverage of preventive medicine includes basic biology, husbandry, and routine care of the healthy animal. The drug formulation supplies dosage instructions for ferrets, rabbits, guinea pigs, chinchillas, hamsters, rats/mice, prairie dogs, hedgehogs, and sugar gliders. Chapter outlines offer at-a-glance overviews of the contents of each chapter. Handy tables and charts make it easy to find key information. Expanded Zoonotic Diseases chapter adds more depth along with the latest information on the rising potential for disease

more popular. Additional surgical procedures for each species are included, some with step-by-step instructions accompanied by color photographs and line drawings. Full-color images show the sometimes minute structures of these small animals and make accurate diagnoses easier, especially for lymphoproliferative diseases of rabbits, endoscopy, cytology, and hematology.

This book, a comprehensive study of twelve of the economies of key countries of the Arab world, has three main objectives: to record the developmental achievements and failings of each country; to examine the main issues arising in the drive for development; and to assess the future outlook for development for each country. Managerial styles are influenced by habit, familiarity, and workplace culture. It's no wonder that well-intentioned professionals doing their best to be good organizational leaders often repeat unhelpful supervisory practices experienced in their early careers, even if they disliked them at the time. In the DUHI Book of Management and Supervision, the author disagrees with many accepted leadership principles (unabashedly referring to them as myths) and makes new and different approaches easier to imagine. Her challenging and controversial concepts illustrated with poignant stories suggest common-sense and immediately applicable alternatives more suitable in today's workplace.

Nineteen Arab women journalists speak out about what it's like to report on their changing homelands in this first-of-its-kind essay collection, with a foreword by CNN chief international correspondent Christiane Amanpour "A stirring, provocative and well-made new anthology . . . that rewrites the hoary rules of the foreign correspondent playbook, deactivating the old clichés." —Dwight Garner, The New York Times A growing number of intrepid Arab and Middle Eastern sahfyyat—female journalists—are working tirelessly to shape nuanced narratives about their changing homelands, often risking their lives on the front lines of war. From sexual harassment on the streets of Cairo to the difficulty of traveling without a male relative in Yemen, their challenges are unique—as are their advantages, such as being able to speak candidly with other women at a Syrian medical clinic or with men on Whatsapp who will go on to become ISIS fighters, rebels, or pro-regime soldiers. In *Our Women on the Ground*, nineteen of these women tell us, in their own words, about what it's like to report on conflicts that (quite literally) hit close to home. Their daring and heartfelt stories, told here for the first time, shatter stereotypes about the region's women and provide an urgently needed perspective on a part of the world that is frequently misunderstood. **INCLUDING ESSAYS BY:** Donna Abu-Nasr, Aida Alami, Hannah Allam, Jane Arraf, Lina Attalah, Nada Bakri, Shamael Elnoor, Zaina Erhaim, Asmaa al-Ghoubi, Hind Hassan, Eman Helal, Zeina Karam, Roula Khalaf, Nour Malas, Hwaida Saad, Amira Al-Sharif, Heba Shubani, Lina Sinjab, and Natacha Yazbeck

This book attempts to demonstrate that secular Arabic thought is not a novelty. Although much of what is being written in the Arab world today is of a religious and traditional nature, the beginnings of secularism can be traced back to the writings of various thinkers, mainly from Egypt, Lebanon, and Syria. This study spans the period from the mid-19th century – when the first Arab intellectuals came into contact with Western thought and civilization – to the mid-20th century when secularism became part of the political, social and educational systems in many Arab countries.

The Arab region has been and continues to be a focus of the world for its economic, political, and social importance. However, reality indicates that the performance of many Arab states in terms of education, literacy, health, employment, and welfare generally fall behind many countries of other regions. Strategic Thinking, Planning, and Management Practice in the Arab World is an essential reference source that investigates the status of current strategic practice in the Arab world as well as the need to promote awareness of effective development strategies. Featuring research on topics such as social justice, practical entrepreneurship, and crisis management, this book is ideally designed for high-caliber strategists, academic scholars, and postgraduate research students.
