

Mann Of His Time 2002 288 Pages Ed Youngblood

Provides a comprehensive, reader-friendly introduction to literacy teaching and learning, exploring both theoretical underpinnings and practical strategies.

The Beginnings of Behavioral Economics: Katona, Simon, and Leibenstein's X-Efficiency Theory explores the mid-20th century roots of behavioral economics, placing the origin of this now-dominant approach to economic theory many years before the groundbreaking 1979 work on prospect theory by Daniel Kahneman and Amos Tversky. It discusses the work of Harvey Leibenstein, Herbert Simon, George Katona, and Frederick Hayek, reintroducing their contributions as founding pillars of the behavioral approach. It concentrates on the work of Leibenstein, reviewing his nuanced introduction of X-efficiency theory. Building from these foundations, the work explores the body of empirical research on market power and firm behavior - XE relationship. This book is a tremendous resource for graduate students and early career researchers in behavioral economics, experimental economics, organizational economics, social and organizational psychology, labor market economics and public policy. Reviews the powerful, but neglected contributions of mid-20th century scholars, like Leibenstein and Katona in building the roots of behavioral economic theory Amalgamates and reviews 50 years of empirical research and over 200 empirical papers on X-efficiency theory Establishes how X-efficiency can aid modern behavioral economics in further developing firm theory and understanding efficiency wages

In this full-scale critical biography of Horace Mann, Jonathan Messerli has provided the first comprehensive portrait of the humanitarian reformer who helped lay the basis for the American public school system. Looking behind the father-of-the-system legend, Jonathan Messerli shows us the man himself in the context of his era, with its tensions and fears for the future of society. Mann's legal and political careers involved him in virtually every reform movement of his time -- a period when the poor, the intemperate, the enslaved, the illiterate, the imprisoned, the insane were seen by reformers not merely as objects of pity and benevolence, but as distressing challenges to the growing optimism of "the American way of life." Mr. Messerli shows Horace Mann on a one-man crusade to modify human nature through moral indoctrination of the young and systematic training in literacy and citizenship. Writing voluminously, lecturing across the country, Mann worked tirelessly to establish a public-based system of education that he would, he hoped, usher in a millennium of enlightened ethics, patriotism, brotherhood, and affluence. -- From publisher's description. Marvel Studios takes readers behind the scenes of one of the most eagerly anticipated films of all time in AVENGERS: THE ART OF MARVEL'S THE AVENGERS. This keepsake volume is an experiential journey through the entire film from beginning to end – featuring stunning concept art; full-color photographs from the set, as well as the finished film; excerpts from the script; and exclusive interviews with the cast and crew, including writer/director Joss Whedon, producer Kevin Feige and, of course, the Avengers themselves. From costume and production design to visual effects and creature creation, AVENGERS: THE ART OF MARVEL'S THE AVENGERS is a lavish showcase of all the artistry and creativity that brings the Marvel Cinematic Universe to life onscreen. India II: Climate Change Impacts, Mitigation and Adaptation in Developing Countries

IT WAS ONLY A MATTER OF TIME.... Once widely considered an impossibility—the stuff of science fiction novels—time travel may finally be achieved in the twenty-first century. In Breaking the Time Barrier, bestselling author Jenny Randles reveals the nature of recent, breakthrough experiments that are turning this fantasy into reality. The race to build the first time machine is a fascinating saga that began about a century ago, when scientists such as Marconi and Edison and Einstein carried out research aimed at producing a working time machine. Today, physicists are conducting remarkable experiments that involve slowing the passage of information, freezing light, and breaking the speed of light—and thus the time barrier. In the 1960s we had the "space race." Today, there is a "time race" involving an underground community of working scientists who are increasingly convinced that a time machine of some sort is finally possible. Here, Randles explores the often riveting motives of the people involved in this quest (including a host of sincere, if sometimes misguided amateurs), the consequences for society should time travel become a part of everyday life, and what evidence might indicate that it has already become reality. For, if time travel is going to happen—and some Russian scientists already claim to have achieved it in a lab—then its effects may already be apparent.

Michael Mann has been making movies for almost four decades. His signature protagonist is usually a male professional on either side of the law. From solitary experts, over doppelgangers, to antagonists off kilter, Mann explores the topos of professionalism in different genres and epochs. To achieve a thorough understanding of Mann's professional, Ingo Stelte analyzes the recurring specialist in the five movies Thief, Manhunter, The Last of the Mohicans, Heat, and Collateral and combines cultural and cinematic readings. He lays bare the underlying hallmarks of professionalism in the US that have never been clearly defined. Starting with the Puritan work ethic, over Benjamin Franklin's virtues, to professionals in American literary and cinematic classics, this treatise reveals characteristics of professionalism that are consistent over time. Against the backdrop of these notions of professionalism, Stelte discovers Mann's protagonists to follow enduring historical, cultural, and generic traditions. His astute analyses of the five films achieve an in-depth look into Mann's filmic cosmos that is rounded off with detailed assessments of the movies' aesthetics. Focusing on Mann's signature protagonist, Stelte grants illuminating insight into the filmmaker's oeuvre.

Tom Mann is an American original. Growing up in Depression-era Alabama, for him fishing was more than a recreational activity-it was a way of putting dinner on the table. Following his father's simple advice, "to catch fish, you have to find fish," six-year-old Tom came up with an innovative way of finding the drop-offs in a creek where fish seek refuge from predators. As a young teenager, he began to design and craft special lures, always with an eye toward tricking the freshwater dean of the deep-the largemouth bass. Tom's innate talent in outsmarting the competition above and below the waterline quickly took him from local hero to three-time national fishing champion to living legend. He also tapped into his skill for designing lures, building a multi-million-dollar enterprise that has sold over one billion lures to date in major sporting goods and fishing retailers around the world, all with his smiling face on the packages. Yet despite the prestige and fame of a forty-year career, he still resides where it all began-deep in the heart of the South. Filled with touching childhood stories and hilarious down-home fisherman's lore, "Think Like a Fish reveals how Mann quite literally learned to "think like a fish." He explains the technique and mindset that enable him to lure a fish from thirty yards away into a circle the size of a hula hoop; how he "trains" bass to jump right into his boat; and how he purportedly managed to lure a shark to shore with rod and reel. But in addition to the fishing techniques and words of wisdom, Mann explores the path that got him where he is today-a poignant story of determination, Southern grit, and good-ole-boy charm. Full of gentle humor andwit, this book brings to life the allure of the South and one of its favorite pastimes.

Presents research results related to various aspects of palladium emissions in the environment, as well as an assessment of their effects on the environment and health. This book focuses on the following topics: analytical methods; sources of palladium emissions; occurrence, chemical behaviour and fate in the environment; and more.

Mann of His TimeEcho Point Books & Media

A synthesis of the authors' groundbreaking econometric research on automatic model selection, which uses powerful computational algorithms and theory evaluation. Economic models of empirical phenomena are developed for a variety of reasons, the most obvious of which is the numerical characterization of available evidence, in a suitably parsimonious form. Another is to test a theory, or evaluate it against the evidence; still another is to forecast future outcomes. Building such models involves a multitude of decisions, and the large number of features that need to be taken into account can overwhelm the researcher. Automatic model selection, which draws on recent advances in computation and search algorithms, can create, and then empirically investigate, a vastly wider range of possible models than the greatest expert. In this book, leading econometricians David Hendry and Jürgen Doornik report on their several decades of innovative research on automatic model selection. After introducing the principles of empirical model discovery and the role of model selection, Hendry and Doornik outline the stages of developing a viable model of a complicated evolving process. They discuss the discovery stages in detail, considering both the theory of model selection and the performance of several algorithms. They describe extensions to tackling outliers and multiple breaks, leading to the general case of more candidate variables than observations. Finally, they briefly consider selecting models specifically for forecasting.

The Process of Ideological Radicalization

Mann's Surgery of the Foot and Ankle E-Book

How Universities Indoctrinate America's Youth

How Misinformation, Disinformation, and Arrogance Led America Into Iraq

The Beginnings of Behavioral Economics

Wealth, Empire, and the Future of America

This book is about the politics of Myanmar under the reformist president Thein Sein. After taking office in March 2011, Thein Sein initiated the bloodless Myanmar Spring. He was able to transform Myanmar into a more transparent and dynamic society, bring Aung San Suu Kyi and other opposition and reformist political groups to power, initiate a peace process with the ethnic armed organizations, reintegrate Myanmar into the international community after five decades of isolation, and, most importantly, for the first time since the country regained independence in 1948, he was able to enact the peaceful transfer of power from one elected government to another. But Thein Sein also lost opportunities to deliver what the people anticipated, and he failed to bring his USDP party to victory in the 2015 election. This book is not about the successes of the Thein Sein administration. Rather, it examines the reasons behind the lost opportunities in the transition to democracy. It draws on the author's experiences as a member of Thein Sein's cabinet as well as on extensive interviews with other cabinet members and politicians involved in the crucial events that took place between 2010 and 2016. The book is a must-read for anyone interested in this critical period of change for Myanmar.

Presents an account of how the Bush administration manipulated Congress and the media to gain support for the invasion of Iraq.

Few other contemporary Hollywood filmmakers fit the category of 'genre stylist' as well as Michael Mann, the director of such films as Heat, The Insider, Ali, Collateral, Manhunter, Thief, and Miami Vice. Mann's film style marks him as a director who chooses the iconographic backdrop of a genre as a canvas upon which he and his collaborators can craft a unique cinematic vision. The Cinema of Michael Mann traces the innovative and under-explored stylistic contours of Mann's work, the director's inflection upon and innovation within preexisting genre frameworks, and the relationship of both style and genre to issues of authorship and film criticism. Steven Rybin's critical study of Mann's cinema, and the importance of the filmmaker's themes to our contemporary world, is valuable for both film scholars and cinephiles alike.

Michael Mann first made his mark as a writer for such television programs as Starksy and Hutch, Police Story, and Vegas. In 1981 he made his feature film directing debut with the James Caan thriller Thief, and in the 1980s he served as a writer and executive producer for the groundbreaking programs Miami Vice and Crime Story. Though he has delved into other genres, Mann's career as a writer, producer, and director has consistently focused on criminal activity, from small-time hoods and professional thieves to corporate manipulators and serial killers. In Michael Mann: Crime and Authority, Steven Rybin looks at the television programs and films that Mann has stamped with his personal signature. This book closely examines the themes and techniques used in films such as Manhunter, Heat, The Insider, and Collateral and connects these elements to his work on the non-genre films The Last of the Mohicans and Ali. A revised and significantly expanded edition of The Cinema of Michael Mann (2007), this book includes new chapters on Public Enemies and the big screen version of Miami Vice, as well as Mann's work on the shows Crime Story and Luck. Covering Mann's entire career, this book will be of interest to fans of the writer/director's body of work as well as to scholars of both film and television.

Disrupting Pathways to Genocide

Michael Mann is one of the most important American filmmakers of the past forty years. His films exhibit the existential concerns of art cinema, articulated through a conspicuous and recognizable visual style and yet integrated within classical Hollywood narrative and genre frameworks. Since his beginnings as a screenwriter in the 1970s, Mann has become a key figure within contemporary American popular culture as writer, director, and producer for film and television. This volume offers a detailed study of Mann's feature films, from The Jericho Mile (1979) to Public Enemies (2009), with consideration also being given to parallels in the production, style, and characterization in his television work. It explores Mann's relationship with classical genres, his thematic concentration on issues of morality and masculinity, his film adaptations from literature, and the development and significance of his trademark visual style within modern American cinema.

Covering Central America, the United States, and Canada, this book not only provides an introduction to the history of North American Indians, but also offers a description of the material and intellectual ways that Native American cultures have influenced the life and institutions of people across the globe.

Highly Commended at the BMA Medical Book Awards 2015 Mann's Pharmacovigilance is the definitive reference for the science of detection, assessment, understanding and prevention of the adverse effects of medicines, including vaccines and biologics. Pharmacovigilance is increasingly important in improving drug safety for patients and reducing risk within the practice of pharmaceutical medicine. This new third edition covers the regulatory basis and the practice of pharmacovigilance and spontaneous adverse event reporting throughout the world. It examines signal detection and analysis, including the use of population-based databases and pharmacoepidemiological methodologies to proactively monitor for and assess safety signals. It includes chapters on drug safety practice in specific organ classes, special populations and special products, and new developments in the field. From an international team of expert editors and contributors, Mann's Pharmacovigilance is a reference for everyone working within pharmaceutical companies, contract research organisations and medicine regulatory agencies, and for all researchers and students of pharmaceutical medicine. The book has been renamed in honor of Professor Ronald Mann, whose vision and leadership brought the first two editions into being, and who dedicated his long career to improving the safety and safe use of medicines.

"Scott's brilliantly perceptive account of the underpinnings of American governmental authority should be made required reading. The book vividly depicts the political forces that have pushed this country toward an abyss, threatening constitutional democracy at home and world peace abroad. Its central message can be understood as an urgent wake-up call to everyone concerned with the future of America."—Richard Falk, author of The Great Terror War "Peter Dale Scott is one of that tiny and select company of the most brilliantly creative and provocative political-historical writers of the last half century. The Road to 9/11 further secures his distinction as truth-teller and prophet. He shows us here with painful yet hopeful clarity the central issue of our time-America's coming to terms with its behavior in the modern world. As in his past work, Scott's gift is not only recognition and wisdom but also redemption and rescue we simply cannot do without."—Roger Morris, former NSC staffer "The Road to 9/11 is vintage Peter Dale Scott. Scott does not undertake conventional political analysis; instead, he engages in a kind of poetics, crafting the dark poetry of the deep state, of parapolitics, and of shadow government. As with his earlier work Deep Politics and the Death of JFK, Scott has no theory of responsibility and does not name the guilty. Rather, he maps out an alien terrain, surveying the topography of a political shadow land, in which covert political deviancy emerges as the norm. After reading Scott, we can no longer continue with our consensus-driven belief that our so-called 'liberal' order renders impossible the triumph of the politically irrational."—Eric Wilson, Senior Lecturer of Public International Law, Monash University, and co-editor of Government of the Shadows "Peter Dale Scott exposes a shadow world of oil, terrorism, drug trade and arms deals, of covert financing and parallel security structures—from the Cold War to today. He shows how such parallel forces of the United States have been able to dominate the agenda of the George W. Bush Administration, and that statements and actions made by Vice President Cheney and Defense Secretary Rumsfeld before, during and after September 11, 2001, present evidence for an American 'deep state' and for the so-called 'Continuity of Government' in parallel to the regular 'public state' ruled by law. Scott's inflection upon and innovation within preexisting genre frameworks, and the relationship of both style and genre to issues of authorship and film criticism. Steven Rybin's critical study of Mann's cinema, and the importance of the filmmaker's themes to our contemporary world, is valuable for both film scholars and cinephiles alike.

"The America we knew and loved. Can it be saved? That question opens this book, and getting to the answer called for the honed intellect of a scholar and the sensitivity of a poet. Peter Dale Scott has both, in spades, and here gives us much, much more than a book about 9/11. In a time of fear, he speaks for sanity and freedom."—Anthony Summers, author of The Arrogance of Power

This book looks at the sources and composition of the atmosphere and rainfall, with particular attention on acidifying components and those that affect ecosystems. It further widens the subject to look at trace metals. It includes papers on the impact of deposition on soils and forests and the recovery of the natural environment. Work on critical loads makes a contribution to understanding the degree to which deposition must be reduced to limit its impact.

Abstract:

Ed Youngblood provides a gripping portrait of American motorcycle racer Dick Mann, a true legend of the sport. Thoroughly researched and based on numerous interviews, this richly detailed history covers Mann's life and career, chronicles the growth of the racing industry, and illustrates how Mann helped shape racetrack safety and industry policy.

How does ideology in some states radicalise to such an extent as to become genocidal? Can the causes of radicalisation be seen as internal or external? Examining the ideological evolution in the Armenian genocide, the Holocaust and during the break up of Yugoslavia, Elisabeth Hope Murray seeks to answer these questions in this comparative work.

This book provides the only compendium of the research efforts of the German Federal Republic for the development of offshore wind energy that summarizes the main findings of German accompanying research. The main objective of the book is to show the relevance of the new results and realizations of the research projects for the planning and permission process for offshore wind energy plants. Presents a detailed history of major league baseball's most successful franchise, examining the management strategies, economic forces, social changes, political and legal pressures, and other decisions that shaped the Yankees.

The New Bridge Companion to World Cinema explores and examines a global range of films and filmmakers, their movements and audiences, comparing their cultural, technological and political dynamics, identifying the impulses that constantly reshape the form and function of the cinemas of the world. Each of the forty chapters provides a survey of a topic, explaining why the issue or area is important, and critically discussing the leading views in the area. Designed as a dynamic forum for forty-three world-leading scholars, this companion contains significant expertise and insight and is dedicated to challenging complacent views of hegemonic film cultures and replacing outmoded ideas about production, distribution and reception. It offers both a survey and an investigation into the condition and activity of contemporary filmmaking worldwide, often challenging long-standing categories and weighted—often politically motivated—value judgements, thereby grounding and aligning the reader in an activity of remapping which is designed to prompt rethinking.

Brainwashed is the explosive exposé e of the leftist agenda at work in today's colleges, revealed by firebrand Ben Shapiro, a recent UCLA graduate, syndicated columnist, and one of today's most exciting new conservative voices, who's been on the front lines of the battle for America's young minds. This book proves once and for all that so-called higher education continues to sink lower and lower into the depths of liberal madness as close-minded professors turn their students into socialists, atheists, race-baters, and sex-crazed narcissists. "Ben Shapiro's writing is smart, informative, and incisive. He is wise beyond his years without losing the refreshing fearlessness of youth." ?Ann Coulter, best-selling author of High Crimes and Misdemeanors, Slander, and Treason "In Brainwashed, Shapiro tells the truth?that universities are forums of left-liberal indoctrination, where dissent is discouraged and penalized, with more restrictions on free speech rather than any other part of American society. Parents who are paying for tuition might want to take note, and see what their hard-earned money is paying for." ?Michael Barone, U.S. News & World report and co-author of The Almanac of American Politics "Welcome to P.C. 101. In this trenchant insider's expose, Ben Shapiro bears witness to the modern American campus freak show. You'll get up close and personal with the Marxist loons, moral relativists, multicultural zealots, and American-haters who are corrupting young minds. Brainwashed reveals the ignominious lows to which higher education has sunk. Get deprogrammed.

Buy this book? ?Michelle Malkin, nationally syndicated columnist and author of Invasion "Sharp thinking, tight writing, crazy-but-true stories. Ben Shapiro sees campus brainwashing and raises a national protest. This is a good book to give both freshmen who need warning and voters/alumni who need to take action." ?Dr. Marvin Olasky, University of Texas professor and editor-in-chief of World magazine "A worthy successor to God and Man at Yale and Harvard Hates America in exploring the bely of the academic beast." ?David Horowitz, founder of Students for Academic Freedom and author of Radical Son and Left Illusions "What Animal House did for the toga party, Brainwashed should do for American resistance to campus radicalism." ?Rusty Humphries, nationally syndicated radio talk show host

Mann of His Time

Horace Mann

Think Like a Fish

Theory, Research, and Implications for Practice

Mann's Pharmacovigilance

A history of the Maya Indians in the city of Tikal, founded in 800 B.C.

The burnt-red badlands of Montana's Hell Creek are a vast graveyard of the Cretaceous dinosaurs that lived 68 million years ago. Those hills were, much later, also home to the Sioux, the Crows, and the Blackfeet, the first people to encounter the dinosaur fossils exposed by the elements. What did Native Americans make of these stone skeletons, and how did they explain the teeth and claws of gargantuan animals no one had seen alive? Did they speculate about their deaths? Beginning in the East, with its Ice Age monsters, and ending in the West, where dinosaurs lived and died, this richly illustrated and elegantly written book examines the discoveries of enormous bones and uses of fossils for medicine, nursing magic, and spells. Well before Columbus, Native Americans observed the mysterious petrified remains of extinct creatures and sought to understand their transformation to stone. In perceptive creation stories, they visualized the remains of extinct mammoths, dinosaurs, pterosaurs, and marine creatures as Monster Bears, Giant Lizards, Thunder Birds, and Water Monsters. Their insights, some so sophisticated that they anticipate modern scientific theories, were passed down in oral histories over many centuries. Drawing on historical sources, archaeology, traditional accounts, and extensive personal interviews, Adrienne Mayor takes us from Aztec and Inca fossil tales to the traditions of the Iroquois, Navajos, Apaches, Cheyennes, and Pawnees. Fossil Legends of the First Americans represents a major step forward in our understanding of how humans made sense of fossils before evolutionary theory developed.

Kurze's book provides fresh and sometimes startling insights into both famous and little-known episodes in Mann's life and into his writing—'the only realm in which he ever felt free. It shows how love, death, religion, and politics were not merely themes in "Buddenbrooks," but were woven into the fabric of his existence. 40 photos.

COLLEGE MEN and Masculinities is a comprehensive handbook that offers a compilation of the best classic and contemporary research on male students in higher education. The editors, Shawn R. Harper and Frank Harris III—two experts in the field of men and masculinities—frame each of the six sections of the book with a summary of issues and implications for educational practice. Each section also includes a wealth of forward-thinking strategies and suggestions that faculty and institutional leaders can creatively employ on their campuses to reverse problematic trends and outcomes among male undergraduates. With contributions from leading scholars in education, sociology, psychology, and other disciplines, College Men and Masculinities explores the following issues in depth: Identity development and gender socialization Sexualities and sexual orientations Destructive behaviors (judicial offenses, alcohol abuse, and violence) Health and wellness College men of color College men and sports This vital resource will help educators and administrators address the alarming trends and issues that arise from identity-related challenges among boys and college men. "What a valuable resource! This book includes some of the most influential research and theory on all aspects of collegiate masculinity—from sports to spirituality, hazing to hook-ups, and alcohol to assault. Always sensitive to how different groups of men experience college life, Harper and Harris's book will surely become the touchstone text for those who work with or study college men."—Michael Kimmel, author of Manhood in America and professor of sociology, Stony Brook University "Essential reading for all who care about gender equity, this book advances the conversation about men in college at the crucial nexus of identity, citizenship, culture, and relationship, enabling faculty and student affairs administrators to build more thoughtful and challenging educational environments for men from diverse populations."—Susan Marine, Women's Center director and assistant dean for student life, Harvard University "This book offers educators and administrators much-needed guidance for understanding and effectively meeting the developmental, academic, and social needs of undergraduate men."—Chauncey Smith, undergraduate student leader, Morehouse College

Thomas Mann

Public Archaeology: Arts of Engagement

College Men and Masculinities

Michael Manned filmmaker and writer-director of Heat and Miami Vice, teams up with Edgar Award-winning author Meg Gardiner to deliver Mann's first crime novel - an explosive return to the world and characters of his classic film Heat - an all-new story that illuminates what happened before and after the iconic film. A man's obsession with a silent-film star sends him on a journey into a shadow world of lies, illusions, and unexpected loss. Six months after losing his wife and two young sons in an airplane crash, Vermont professor David Zimmer spends his waking hours mired in a blur of alcoholic grief and self-pity. Then, watching television one night, he stumbles upon a clip from a lost silent film by comedian Hector Mann. Zimmer's interest is piqued, and he soon finds himself embarking on a journey around the world to research a book on this mysterious figure, who vanished from sight in 1929 and has been presumed dead for sixty years. When the book is published the following year, a letter turns up in Zimmer's mailbox bearing a return address from a small town in New Mexico-supposedly written by Hector's wife. "Hector has read your book and would like to meet you. Are you interested in paying us a visit?" Is the letter a hoax, or is Hector Mann still alive? Torn between doubt and belief, Zimmer hesitates, until one night a strange woman appears on his doorstep and makes the decision for him, changing his life forever. This stunning novel plunges the reader into a universe in which the comic and the tragic, the real and the imagined, the violent and the tender dissolve into one another. With The Book of Illusions, one of America's most powerful and original writers has written his richest, most emotionally charged work yet.

The national story of Chester Archaeology Student Conference "Archaeo-Engage: Engaging Communities in Archaeology" (April 2017), provides original perspectives on public archaeology's current practices and future potentials focusing on ar/archaeological media, strategies and subjects. "The nation needs to be confronted with the crime that we're committing and the promises we are betraying. This is a book about betrayal of the young, who have no power to defend themselves. It is not intended to make readers comfortable." Over the past several years, Jonathan Kozol has visited nearly 60 public schools. Virtually everywhere, he finds that conditions have grown worse for inner-city children in the 15 years since federal courts began dismantling the landmark ruling in Brown v. Board of Education. First, a state of nearly absolute apartheid now prevails in thousands of our schools. The segregation of black children has reverted to a level that the nation has not seen since 1968. Few of the students in these schools know white children any longer. Second, a protomilitary form of discipline has now emerged, modeled on stick-and-carrot methods of behavioral control traditionally used in prisons but targeted exclusively at black and Hispanic children. And third, as high-stakes testing takes on pathological and punitive dimensions, liberal education in our inner-city schools has been increasingly replaced by culturally barren and robotic methods of instruction that would be rejected out of hand by schools that serve the mainstream of society. Filled with the passionate voices of children and their teachers and some of the most revered and trusted leaders in the black community, The Shame of the Nation is a triumph of firsthand reporting that pays tribute to those undefeated educators who persist against the odds, but directly challenges the chilling practices now being forced upon our urban systems by the Bush administration. In their pursuit of the national dream, the nation has failed to fulfill at last the promise made some 50 years ago to all our youngest citizens. From The Shame of the Nation "I went to Washington to challenge the soft bigotry of low expectations," the president said in his campaign for reelection in September 2004. "It's working. It's making a difference." It is one of those deadly lies, which, by sheer repetition, is at length accepted by large numbers of Americans as, perhaps, a rough approximation of the truth. But it is not the truth, and it is not an innocent misstatement of the facts. It is a devious appeasement of the heartache of the parents of the poor and, if it is not forcefully resisted and denounced, it is going to lead our nation even further in a perilous direction. Also available as a Random House AudioBook and an eBook

Fossil Legends of the First Americans

The Shame of the Nation

Life as a Work of Art : a Biography

The Art of Marvel's The Avengers

"The first ever comparative reading of Shakespeare and Thomas Mann in view of key questions in modern culture"...

Few books currently exist that cover such a wide spectrum of topics. The chapters dealing with air pollution from mobile sources, air pollution and health effects and air quality modeling fall into the air pollution category while the ones related to microalgae for carbon dioxide sequestration/biofuels production, fuel cells, and solar energy technology, respectively, can be ascribed to the energy topic. Several technologies to handle a wide spectrum of environmental pollutants are taken into account in numerous chapters. The chapter on biodiversity is clearly related to the conservation issue, while the water pollution subject is tackled by the chapter on water quality monitoring. Finally, a general analysis on green business, as well as a chapter on grid/cloud computing technology for collaborative problem solving and shared resources management conclude the work. Because of its breadth of coverage, this book is particularly useful as a graduate text.

"This SAGE Handbook integrates basic research on social dimensions of aging. It presents programmatic applications of research in areas not often seen in Handbooks including imprisonment, technology and aging, urban society aged, and elderly migration. The authors constitute a Who's Who of international gerontology, and the focus on globalization and aging is unique among Handbooks today. This Handbook should be in the library of every social gerontologist." - Vern L. Bengtson, Professor of Gerontology, University of Southern California This volume reflects the emergence of ageing as a global concern, including chapters by international scholars from Asia, Australasia, Europe and North America. It provides a comprehensive overview of key trends and issues in the field, drawing upon the full range of social science disciplines. The Handbook is organized into five parts, each exploring different aspects of research into social aspects of ageing: Disciplinary overviews: summaries of findings from key disciplinary areas within social gerontology. Social relationships and social differences: explores area like social inequality, gender, religion, inter-generational ties, social networks, and friendships. Individual characteristics and change in later life: examines different aspects of

individual aging, including self and identity, cognitive processes, and bio-social interactions and their impact on physical and psychological aging. Comparative perspectives and cultural innovations: topics include ageing and development, ageing in a global context, migration, and cross-cultural perspectives on grandparenthood. Policy issues: covering policy concerns such as long-term care, technology and older people, end of life issues, work and retirement, and the politics of old age. This will be essential reading for all students, researchers and policy-makers concerned with the major issues influencing the lives of older people across the globe.

Let a "who's who" of foot and ankle surgeons take your skills to the next level! Drs. Coughlin, Saltzman, and Anderson bring you state-of-the-art, comprehensive coverage of the full range of foot and ankle disorders. Expect the best from this revised "classic" work refreshed for a new generation in one robust multimedia resource. Achieve the best possible outcomes with authoritative answers on every major aspect of the treatment and management of foot and ankle disorders and diseases! With content covering biomechanics, examination, diagnosis, non-operative and operative treatment, and post-operative management, you have all the guidance you need to offer optimal care to your patients.
