The Japanese Cinema Book provides a new and comprehensive survey of one of the world's most fascinating and widely admired filmmaking regions. In terms of its historical coverage, broad thematic approach and the significant international range of its authors, it is the largest and most wide-ranging publication of its kind to date. Ranging from renowned directors such as Akira Kurosawa to neglected popular genres such as the film musical and encompassing topics such as ecology, spectatorship, home-movies, colonial history and relations with Hollywood and Europe, The Japanese Cinema Book presents a set of new, and often surprising, perspectives on Japanese film. With its plural range of interdisciplinary perspectives based on the expertise of established and emerging scholars and critics, The Japanese Cinema Book provides a groundbreaking picture of the different ways in which Japanese cinema may be understood as a local, regional, national, transnational and global phenomenon. The book's innovative structure combines general surveys of a particular historical topic or critical approach with various micro-level case studies. It argues there is no single fixed Japanese cinema, but instead a fluid and varied field of Japanese filmmaking cultures that continue to exist in a dynamic relationship with other cinemas, media and regions. The Japanese Cinema Book is divided into seven inter-related sections: · Theories and Approaches · * Institutions and Industry · * Film Style · * Genre · * Times and Spaces of Representation · * Social Contexts · * Flows and Interactions

Deixis as a field of research has generated increased interest in recent years. It is crucial for a number of different subdisciplines: pragmatics, semantics, cognitive and contrastive linguistics, to name just a few. The subject is of particular interest to experts and students, philosophers, teachers, philologists, and psychologists interested in the study of their language or in comparing linguistic structures. The different deictic structures – not only the items themselves, but also the oppositions between them – reflect the fact that neither the notions of space, time, person nor our use of them are identical cross-culturally. This diversity is not restricted to the difference between languages, but also appears among related dialects and language varieties. This volume will provide an overview of the field, focusing on Romance languages, but also reaching beyond this perspective. Chapters on diachronic developments (language change), comparisons with other (non-)European languages, and on interfaces with neighboring fields of interest are also included. The editors and authors hope that readers, regardless of their familiarity with Romance languages, will gain new insights into deixis in general, and into the similarities and differences among deictic structures used in the languages of the world.

"The celebrated allegorical paintings La Primavera and The Birth of Venus were the source of Sandro Botticelli's rediscovery in both the 16th and 19th centuries, and are still regarded as apogees of Florentine Renaissance painting." "In this volume, the author examines these and other paintings of mythological content by the artist. He retells the stories of classical antiquity from which so many of Botticelli's motifs derive, equipping the reader with tools to appreciate the narrative quality of the artist's works. Nomads of a Desert City

Language and Culture

You see them as faceless shapes on the median or in city parks. You recognize them by their cardboard signs, their bags of aluminum cans, or their weathered skin. But you do not know them.

In Nomads of a Desert City Barbara Seyda meets the gazes of our homeless neighbors and, with an open heart and the eye of an accomplished photographer, uncovers their compelling stories of life on the edge. Byrdy is a teenager from Alaska who left a violent husband and misses the young daughter her mother now cares for. Her eyes show a wisdom that belies her youth. Samuel is 95 and collects cans for cash. His face shows a lifetime of living outside while his eyes hint at the countless stories he could tell. Lamanda worked as an accountant before an act of desperation landed her in prison. Now she struggles to raise the seven children of a woman she met there. Dorothy's earliest memories are of physical and sexual abuse in a shelter, paycheck to paycheck, reciting affirmations so she may continue to grace the world with my presence. They live on the streets or in shelters. They are women and men, young and old, Native or Anglo or Black or Hispanic. Their faces reflect the forces that have shaped their lives: alcoholism, poverty, racism, mental illness, and abuse. But like desert survivors, they draw strength from some hidden reservoir. Few recent studies on homelessness offer such a revealing collection of oral history narratives and compelling portraits. Thirteen homeless women and men open a rare window to enrich our understanding of the complex personal struggles and triumphs of their lives. Nomads of a Desert City sheds a glaring light on the shadow side of the American Dream and takes us to the crossroads of despair and hope where the human spirit survives.
