In Mapping the P??upata Landscape Elizabeth A. Cecil presents a spatial and material history of the P??upata tradition and examines the formation of a ?aiva religious landscape in Early Medieval India.

Paul C. Taylor provides an accessible guide to a well-travelled but still-mysterious area of the contemporary social landscape. The result is the first philosophical introduction to the field of race theory and to a non-biological and situational notion of race. Provides the first philosophical introduction

to the field of race theory. Outlines the main features and implications of race-thinking; asks questions such as: What is race-thinking? Don't we know better than to talk about race now? Are there any races? What is it like to have a racial identity?

Engages with the ideas of such important figures as Linda Alcoff, K. Anthony Appiah, W.E.B. Du Bois, Howard Winant, and Naomi Zack. Explores the enduring significance of race in relation to culture, personal relationships and social justice.

This book contains five research articles and one review article derived from the 6th Fabos Conference on Greenway Planning

held at the University of Massachusetts, Amherst, in April of 2019. Specific topics covered include greenway planning and analysis for urban morphology, typology, climate change impact and recreational and health usage, in addition to historic greenway restoration. All the articles illustrate multidisciplinary approaches for analyzing urban greenway functions within expanding and contracting cities.

Social work as a profession and academic discipline has long centered women and issues of concern to women, such as reproductive rights, labor rights, equal rights, violence and poverty.

In fact, the social work profession was started by and maintained in large part by women and has been home to several generations of feminists starting with recognized first wave feminists. This wide-ranging volume both maps the contemporary landscape of feminist social work research, and offers a deep engagement with critical and third wave feminisms in social work research. Showcasing the breadth and depth of exemplary social work feminist research, the editors argue that social work's unique focus on praxis, daily proximities to privilege and oppression, concern with social change and engagement with participatory forms of inquiry place

social workers in a unique position to both learn from and contribute to broader social science and humanities discourse associated with feminist research. The authors attend here to their specific claims of feminisms, articulate deep engagement with theory, address the problematic use of binaries, and engage with issues associated with methods that are consistently of interest to feminist researchers, such as power and authority, ethics, reflexivity, praxis and difference. a wide range of contemporary scholarship, some of which provides new treatments of traditional concepts. By integrating issues of diversity throughout the book, Ferguson helps students see the inter-relationships of race, social class, and gender, and the ways in which they have shaped the experiences of all people in society. With a combination of up-to-the minute examples, cutting-edge research, and the latest available data, Essentials of Sociology gets students thinking sociologically about what they're seeing in the news and on their screens. Highlighting the macro social forces at work in our everyday lives, the authors move students beyond their individual experiences and cultivate their sociological imaginations. Innovative pedagogy promotes active reading and helps

students master core sociological concepts. This strong in-text pedagogical program is now supported by InQuizitive, Norton's new formative, adaptive learning tool.

Theories of performativity have garnered considerable attention within the social sciences and humanities over the past two decades. At the same time, there has also been a growing recognition that the social production of space is fundamental to assertions of political authority and the practices of everyday life. However, comparatively little scholarship has explored the full implications that arise from the confluence of these two streams of social and political thought. This is the first book-length, edited collection devoted explicitly to showcasing geographical scholarship on the spatial politics of performativity.

It offers a timely intervention within the field of critical human geography by exploring the performativity of political spaces and the spatiality of performative politics. Through a series of geographical case studies, the contributors to this volume consider the ways in which a performative conception of the "political" might reshape our understanding of sovereignty, political subjectification, and the production of social space. Marking the 20th anniversary of the publication of Judith Butler's classic, *Bodies That Matter* (1993), this edited volume brings together a range of contemporary geographical works that draw exciting new connections between performativity, space, and politics.

General Education Essentials "Full-time and part-time faculty in any

discipline and at any size campus with any type of mission can pick up this volume and learn something that will help her or him improve teaching and learning.???"From the Foreword by Terrel L. Rhodes, vice president for Curriculum, Quality, and Assessment, Association of American Colleges and Universities Every year, hundreds of small colleges, state schools, and large, research-oriented universities across the United States (and, increasingly, Europe and Asia) revisit their core and general education curricula, often moving toward more integrative models. And every year, faculty members who are highly skilled in narrowly defined fields ask two simple questions: "Why?" and "How is this going to affect me?" General Education Essentials seeks to answer these and other questions by providing

Access Free Mapping The Social Landscape 6th Edition

a much-needed overview of and a rationale for the recent shift in general education curricular design, a sense of how this shift can affect a faculty member's teaching, and an understanding of how all of this might impact course and student assessment. Filled with examples from a variety of disciplines that will spark insights, General Education Essentials explores the techniques that can be used to ensure that students are gaining the skills they need to be perceptive scholars and productive citizens. "This is THE ONE BOOK for academics to get up to speed about reforming general education." □Jerry Gaff, senior scholar, Association of American Colleges and Universities

Haiti is a failing state. The country is still unable to provide basic needs such as employment, food, housing, healthcare and education to a majority of its inhabitants in over two centuries after its revolution and Independence of 1804. Relatively incompetent, both the nation's government and its opposition ignore moral politics, and instead, focus on corruption and fighting each other. Though free from French rule, the country remains tied to its slave past and violent history. It seems like a socioeconomic and urban consensus cannot be achieved in order to carry out

sustainable solutions for the people. This book, *From Revolution to Chaos in Haiti, 1804-2019: Urban Problems and Redevelopment Strategies*, is an attempt to analyze this situation from a historical perspective. First, the Haitian Revolution of 1804 is displayed to show the violent and bloody struggles of outstanding leaders and warriors against colonial powers for the making of a great political and independent nation. Second, Haiti's decline is analyzed starting from the assassination of its first leader, Jean-Jacques Dessalines, in 1806 to the country's bottom rank in the global stratification during the 2010's along with the impact of the catastrophic 2010 earthquake. The main factors noted within this decline are linguistic, agricultural, urban and (HIV, AIDS, TB) healthcare issues and undercapitalization along with ideological confusions (capitalism, neoliberalism, socialism, social

This book complements the growing body of literature exploring the relationships between arts and cartography . It is distinct from the previous ones by its main focus: The multiple ways of representing a database. In the context of the exponential increase of the volume of geospatial data available, addressing this issue becomes critical and has not yet received much attention. Furthermore, the content of the database – environmental issues in the city – gives a strong social and political texture to the project. The expected audience for this book are academic as well as students interested in the relationships between art and cartography, place and technology, power and representations. This book

could serve as an inspiration for local groups and communities dealing with environmental injustice all over the world. Finally, at a local scale, this book could become a major reference for individuals, communities and institutions interested in environmental issues in the city of Montreal.

Updated in a new 8th edition, *Public Speaking: An Audience-Centered Approach* brings theory and practice together. Its distinctive and popular approach emphasizes the importance of analyzing and considering the audience at every point in the speech making process. This model of public speaking is the foundation of the book, and it guides the reader through the step-by-step process of public speaking, focusing their attention on the dynamics of diverse audiences, and narrowing the gap between practice and the real world.

our understanding of urban territories; on surfaces, in the margins or within voids. The diverse media of arts practices as well as commercial branding are used to explore narratives that reveal latent characteristics of urban situations that conventional architectural inquiry is unable to do. The subjects covered are presented within a wider framework of urban theory into which are embedded case study examples that outline the practices, processes and interpretations of each

theme. The chapters provide a contemporary reading of urban socio-cultural conditions using 'mapping' as a lens to explore and communicate the social phenomena and lived experiences of the dynamic and temporal city. Mapping is developed as a form of critical instrumentality to expose, record and contribute to the understanding of the singular essences of space, place and networks by thematic, cognitive and experiential modes of investigation. What is history and why

Access Free Mapping The Social Landscape 6th Edition

should we study it? Is there such a thing as historical truth? Is history a science? One of the most accomplished historians at work today, John Lewis Gaddis, answers these and other questions in this short, witty, and humane book. The Landscape of History provides a searching look at the historian's craft, as well as a strong argument for why a historical consciousness should matter to us today. Gaddis points out that while the historical method is more sophisticated than most historians realize, it

Access Free Mapping The Social Landscape 6th Edition

doesn't require unintelligible prose to explain. Like cartographers mapping landscapes, historians represent what they can never replicate. In doing so, they combine the techniques of artists, geologists, paleontologists, and evolutionary biologists. Their approaches parallel, in intriguing ways, the new sciences of chaos, complexity, and criticality. They don't much resemble what happens in the social sciences, where the pursuit of independent variables functioning with static systems seems increasingly

divorced from the world as we know it. So who's really being scientific and who isn't? This question too is one Gaddis explores, in ways that are certain to spark interdisciplinary controversy. Written in the tradition of Marc Bloch and E.H. Carr, The Landscape of History is at once an engaging introduction to the historical method for beginners, a powerful reaffirmation of it for practitioners, a startling challenge to social scientists, and an effective skewering of post-modernist claims that we

This innovative book is a collection of autoethnographies by a diverse group of contributors who describe and theorize about the critical moments in their development as social justice educator/scholars in the face of colonizing forces. Using a rhizomatic approach, the editors' meta-analysis identifies patterns of similarity and differences and theorizes about the exercise of agency in resistance and identity formation. In our increasingly diverse society, *Becoming Critical* is a wonderful resource for teacher education and sociology of education as it presents an alternative methodological approach for qualitative inquiry. The book contributes to students' understanding of the development of critical theories—especially as they

In *From the Miners' Doublehouse*, archaeologist Karen Metheny uses an interpretive, contextual approach to examine the physical and cultural landscape of the now-abandoned coal-mining town of Helvetia in western Pennsylvania. The author weaves together documentary sources, oral history, and archaeological evidence to reveal the ways in which mine workers constructed a sense of community in this company town from the late nineteenth century to the mid-twentieth. As the first archaeological and historical study of a coal company town that focuses upon the strategies its residents used to manipulate landscape and material culture to achieve personal and social goals, *From the Miners' Doublehouse* makes a significant

contribution to historical and industrial archaeology. This book will be of interest to scholars in industrial and environmental history, geography, and industrial sociology. It will also appeal to general readers interested in coal's history and the Appalachian coal-mining region.

Landscape ecology is a rapidly growing science of quantifying the ways in which ecosystems interact - of establishing a link between activities in one region and repercussions in another region.

Remote sensing is a fast, inexpensive tool for conducting the landscape inventories that are essential to this branch of science. However, anyone who has conducted studies in the field has already found that traditional landscape ecology metrics are not always reliable with remote images.

Landscape Ecology: New Metric

Access Free Mapping The Social Landscape 6th Edition

Indicators for Monitoring, Modeling, and Assessment of Ecosystems with Remote Sensing presents a new set of metrics that allows remotely sensed data to be used effectively in landscape ecology. This groundbreaking new work is the first to present new metrics for remote sensing of landscapes and demonstrate how they can be used to yield more accurate analyses for GIS studies. The new metrics expand the capabilities of GIS, reduce interference and incorrect readings, help ecologists better understand ecosystem relationships, and reduce study costs. This set of metrics should be adopted by the EPA and will be the standard measure for future landscape analysis. This authoritative guide assesses the current state of the field and how remote sensing and landscape metrics have been used to date. It also explains

Access Free Mapping The Social Landscape 6th Edition

how some of the traditional metrics were developed and how they can fail in landscape studies. Once this background has been established, the new metrics are introduced and their benefits and uses explained. The information in this book has previously been available only in scattered journal articles; this is the first single source for complete background information and instructions on using the new metrics. This book of selected papers from the Critical Link 6 conference addresses the impact of a rapidly changing reality on the theory and practice of community interpreting. The recent social, political and economic developments have led to phenomena of direct concern to the field, for example multilingualism in traditionally monolingual societies, the emergence of rare language pairs, or new language-related problems in immigration application procedures, social welfare institutions and prisons.

Access Free Mapping The Social Landscape 6th Edition

Responding to the need for critical reflection as well as practical solutions, the papers in this volume approach the changing landscape of community interpreting in its diversity. They deal with political, social, cultural, institutional, ethical, technological, professional, and educational aspects of the field, and will thus appeal to academics, practitioners and policy-makers alike. Specifically, they explore topics such as interpreting roles, communication strategies, ethics vs. practice, interpreting vs. culture brokering, interpreting strategies in different interactional contexts, and interpreter training and education.
