The methods for teaching mathematics usually follow the structure of mathematics. The problem with this is that the structure of mathematics took centuries of elaboration to develop and is not the same as how one originally experiences mathematics. Based on research of how mathematics is actually learned, this book presents an innovative approach for teaching mathematics that will engage pupils and can have lifelong benefits for how they take on board more advanced mathematical topics. Math Makes Sense! makes use of the realistic mathematics education (RME) philosophy, which bridges the gap

between informal mathematics learning (such as in day-to-day life) and more formal teaching in school. Many real-life situations as examples for learning are included, as well as different mathematical and logic puzzles that will stimulate learning and foster understanding. The ideas presented are not confined to one national curriculum and so can be helpful worldwide to teachers/instructors (both in practice and those still in training), private tutors, homeschooling parents, and educational researchers. Solving problems is about more than computation. Students must understand the mathematics of a situation to know what computation will lead to an appropriate solution. Many students often pluck numbers from the problem and plug them into an equation using the first operation they can think of (or the last one they practiced). Students also tend to choose an operation by solely relying on key words that they believe will help them arrive at an answer, which without careful

This practical volume concentrates on the following areas:

- \* Making sense of math by fostering habits of mind that help students analyze, understand, and adapt to problems when they encounter them.
- \* Addressing the mathematical building blocks necessary to include in effective math instruction.
- \* Turning teaching “upside down” by shifting how we teach, focusing on discussion and analysis as much as we focus on correct answers.
- \* Garnering support for the changes you want to make from colleagues and administrators.
