A biography of one of Germany's pioneers in aerial combat: "a great read" (Internet Modeler). Max Immelmann was born in Dresden, the son of a container factory owner. When World War I started, Immelmann was recalled to active service, transferred to the Luftstreitkräfte, and sent for pilot training in November 1914. He was on his way to becoming a legendary flying ace. Initially stationed in northern France as a reconnaissance aviator, he was shot down by a French pilot but managed to land safely behind German lines. He was decorated with the Iron Cross, Second Class for preserving his aircraft. Later in 1915, he became one of the first German fighter pilots, quickly building an impressive score of victories as he became known as The Eagle of Lille, Der Adler von Lille. Known for the aerial combat maneuver that bears his name; for the use of a machine gun

synchronized to fire forward through the propeller arc; and for his association with the Fokker Eindecker, Germany's first fighter aircraft, Immelman was the first pilot to be awarded the Pour le Mérite, Germany's highest military honor—which became colloquially known as the “Blue Max” in the German Air Service. Along with Oswald Boelcke and other pilots, Immelman was one of the main instigators of the Fokker Scourge, which inflicted heavy losses upon British and French aircrews during 1915. He was credited with fifteen victories—the final one coming on March 30, 1916. This Casemate edition of Max Immelman's biography does not change a word from the original 1930 edition, but for the first time, reworks the original type and page layout to provide a beautiful and highly readable new treatment to this classic of aviation literature.

*Estimating Market Value and Establishing Market Rent at Small Airports
Report of the Committee on Financial Sector Reforms*

Enhancing Board Effectiveness seeks to examine the conceptualization and role of the board in a variety of contexts and articulate solutions for improving the

effectiveness of the board, especially in developing and emerging markets. Enhancing Board Effectiveness with therefore address the following central questions: To what extent is the concept and role of the board evolving? What rights, powers, responsibilities and other contemporary and historical experiences can enhance the effectiveness of the board, especially in the particular contexts of developing and emerging markets? What socio-economic, political, regulatory and institutional factors/actors influence the effectiveness of the board and how can the policies and practices of such actors exert such influences? In what ways can a reconstructed concept of the board serve as a tool for theoretical, analytical, regulatory and pragmatic assessment of its effectiveness? In examining this issues, Enhancing Board Effectiveness will investigate theoretical, socio-economic, historical, empirical, regulatory, comparative and inter-disciplinary approaches. Academics in the relevant fields of accounting, behavioural psychology/economics, development studies, financial regulation, law and

management/organizational studies, political economy and, public administration will find this book of high interest. This is a hopeful account of the potential for organizational change and improvement within government. Despite the mantra that "people resist change," it is possible to effect meaningful reform in a large bureaucracy. In *Unleashing Change*, public management expert Steven Kelman presents a blueprint for accomplishing such improvements, based on his experience orchestrating procurement reform in the 1990s. Kelman's focuses on making change happen on the front lines, not just getting it announced by senior policymakers. He argues that frequently there will be a constituency for change within government organizations. The role for leaders is not to force change on the unwilling but to unleash the willing, and to persist long enough for the change to become institutionalized. Drawing on the author's own personal experience and extensive research among frontline civil servants, as well as literature in organization theory and psychology, *Unleashing Change*

presents an approach for improving agency performance from soup to nuts—mixing theory with practice. Its analysis is innovative and empirically rich. Kelman's conclusions challenge conventional notions about achieving reform in large organizations and mark a major advance in theories of organizational change. His lessons will be of interest not only to scholars interested in improving the performance of the public sector, but for anyone struggling to manage a large organization. "Steve Kelman's creative research, augmented by his own considerable experience as a reform-minded federal official, gives this book unusual depth and authenticity."—Rosabeth Moss Kanter, Harvard Business School, author of *Confidence: How Winning Streaks and Losing Streaks Begin and End*

Stagnant global trade, subdued investment, and heightened policy uncertainty marked another difficult year for the world economy. A subdued recovery is expected for 2017, with receding obstacles to activity in commodity exporters and solid domestic demand in commodity importers. Weak

investment is weighing on medium-term prospects across many emerging markets and developing economies (EMDEs). Although fiscal stimulus in major economies, if implemented, may boost global growth above expectations, risks to growth forecasts remain tilted to the downside. Important downside risks stem from heightened policy uncertainty in major economies. Global Economic Prospects is a World Bank Group Flagship Report. On a semiannual basis (January and June), it examines global economic developments and prospects, with a special focus on developing countries. The report includes analysis of topical policy challenges faced by developing countries through in-depth research in the January edition and shorter analytical pieces in the June edition.

Bell Canada and the City of Hamilton are pleased to announce they will be moving forward together with a Bell investment of approximately \$400 million to expand broadband Internet access in urban and rural areas of Hamilton, the largest digital infrastructure investment in the City's history. Over the next five years, Bell and a Bell-funded team of City of Hamilton staff will bring direct fibre network connections to more than 200,000 homes and business locations throughout the City with zero cost to taxpayers. The network will provide consumers with access to data speeds up to 1.5 gigabits per second, the fastest home Internet speeds in Canada. Working in partnership with the Hamilton Chamber of Commerce's Digital Infrastructure Task Force, gaps in digital infrastructure across the community were identified. Subsequently, the City worked to increase investment in digital infrastructure to address the gaps. As part of the plan to enhance Hamilton's standing as a Digital City, Mayor Eisenberger requested that broadband speeds be enhanced for all of urban Hamilton, business parks and major commercial areas, and rural areas in the community. In addition to premium network support for the City's business community, the Bell project includes the expansion of high-speed Bell Wireless Home Internet service to 8,000 homes in rural Hamilton. This innovative 5G capable technology delivered over Bell's advanced LTE wireless network provides broadband residential Internet access for small

towns, farming communities and other less populated locations. Bell will work in close cooperation with the City and local contractors, including Aecon, Telecon and Sentrex, to employ innovative techniques to minimize disruption to residents and businesses throughout the project. The majority of the network build will consist of new fibre installed underground, with additional fibre located on Bell, Hydro One and Alectra Utilities poles.

24 Steps to Success! Disciplined Entrepreneurship will change the way you think about starting a company. Many believe that entrepreneurship cannot be taught, but great entrepreneurs aren't born with something special – they simply make great products. This book will show you how to create a successful startup through developing an innovative product. It breaks down the necessary processes into an integrated, comprehensive, and proven 24-step framework that any industrious person can learn and apply. You will learn: Why the “F” word – focus – is crucial to a startup's success Common obstacles that entrepreneurs face – and how to overcome them How to use innovation to stand out in the crowd – it's not just about technology Whether you're a first-time or repeat entrepreneur, Disciplined Entrepreneurship gives you the tools you need to improve your odds of making a product people want. Author Bill Aulet is the managing director of the Martin Trust Center for MIT Entrepreneurship as well as a senior lecturer at the MIT Sloan School of Management. A Study of Organizational Renewal in Government

Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

The untold story of how America once created the most successful economy the world has ever seen and how we can do it again. The American economy glitters on the outside, but the reality is quite different. Job opportunities and economic growth are increasingly concentrated in a few crowded coastal enclaves. Corporations and investors are disproportionately developing technologies that benefit the wealthiest Americans in the most prosperous areas--and destroying middle class jobs elsewhere. To turn this tide, we must look to a brilliant and all-but-forgotten American success story and embark on a plan that will create the industries of the future--and the jobs

that go with them. Beginning in 1940, massive public investment generated breakthroughs in science and technology that first helped win WWII and then created the most successful economy the world has ever seen. Private enterprise then built on these breakthroughs to create new industries--such as radar, jet engines, digital computers, mobile telecommunications, life-saving medicines, and the internet-- that became the catalyst for broader economic growth that generated millions of good jobs. We lifted almost all boats, not just the yachts. Jonathan Gruber and Simon Johnson tell the story of this first American growth engine and provide the blueprint for a second. It's a visionary, pragmatic, sure-to-be controversial plan that will lead to job growth and a new American economy in places now left behind.

A systematic survey of all the countries of East Asia, South-East Asia, Australia, New Zealand and the Pacific Islands. Essential for anyone with a professional interest in the region Keeps up-to-date with current economic and political developments. Part One: General Survey Written by acknowledged authorities on the Pacific Rim, this collection of essays forms an impartial overview of the area as a whole. Topics include: regional security issues, human rights, environmental issues, recent economic trends and USA's relations with the Asia-Pacific region. Country Surveys Individual chapters on each country containing: articles on geography, history and the

economy; an economic and demographic survey of the latest available statistics on population, agriculture, industry, finance, trade, transport, tourism, and education; a directory of names, addresses and contact numbers covering the constitution, government, legislature, judiciary, political organizations, diplomatic representation, religion, the media, finance, trade, industry, tourism, defence and education; a select bibliography. Regional Information Includes all major international organizations active in the region, their aims, activities, publications and principal personnel; a detailed survey of major commodities in Asia and the Pacific; a directory of research institutes specializing in the region; select bibliographies of books and periodicals covering the Far East and Australasia; and an index of regional organizations.

A Hundred Small Steps

The Seven New Laws for a World Gone Digital

Asiamoney Nelson Information's Directory of Investment Research Far Eastern Economic Review Immelmann The Eagle of Lille Casemate / Greenhill

While previous reports have focused solely on the 'big' issues like capital account convertibility, bank privatization, and priority sector norms, A

Hundred Small Steps: Report of the Committee on Financial Sector Reforms goes deep into other areas where reforms are less controversial, but perhaps as important. The report argues that we need a change in mindset for the financial sector, one that recognizes that efficiency, innovation, and value for money are as important for the poor as they are for our new Indian multinationals, and these will come from improved governance, new entry and competition. Indeed the Committee believes that the road to making Mumbai an international financial centre runs through every village in India. The report is divided into separate self-contained chapters; the underlying theme behind all the proposals is the need to enhance inclusion, growth, and stability by allowing players more freedom, even while strengthening the financial and regulatory infrastructure. The role of the government is to create an enabling environment by building sound financial infrastructure. The Committee has focused primarily on broad principles and directions, without entering too much into details of implementation. It emphasizes three important reasons for financial sector reform: to include more Indians in the growth process; to foster growth itself; and to improve financial stability, flexibility, and resilience and thus protect the economy against the kind of turbulence that is affecting the world today. The Committee recognizes this is

a difficult time to propose financial sector reforms in India. The near meltdown of the US financial sector seems to be proof that markets and competition do not work. This is clearly the wrong lesson to take from the debacle. The right lesson is that markets and institutions do succumb occasionally to excesses, which is why regulators have to be vigilant. The report argues for skilled regulators who encourage growth and innovation even while working harder to contain risks.

The global economy is predominantly driven by family businesses that provide the largest source of long-term employment in most countries. In the Asian region, family members amongst the 60% of large corporations own a significant share of the equity and can influence key decisions. This phenomenon sets the family enterprises with various challenges and opportunities as any other non-family run enterprises but in a more complex dimension. This book presents a collection of cases that addresses three key challenges faced in many of the family enterprises in Asia; Succession, Governance and Innovation. The narration of the cases also offers reader tips about good practices among the Asian families such as effective family governance mechanism, development of innovation and entrepreneurial mindsets across generations, importance of family culture. This case book is

essential reading for anyone interested in addressing the needs of business families in the region.

"Staff from smaller airports typically lack specialized expertise in the negotiation and development of airport property or the resources to hire consultants. ACRP Research Report 213 provides airport management, policymakers, and staff a resource for developing and leasing airport land and improvements, methodologies for determining market value and appropriate rents, and best practices for negotiating and re-evaluating current lease agreements. There are many factors that can go into the analysis, and this report reviews best practices in property development."--Foreword.

W.O. Mitchell worked for many years on this book, polishing what was to be his big, serious, and very controversial novel about white-native relations. The book is set in the Paradise Reserve in the Alberta foothills - but the Reserve is far from perfect. Carlyle Sinclair, a widower who comes to teach in the one-room

schoolhouse, is full of optimism, but he is frustrated in and out of the classroom by the passivity of the people he is determined to help. When Victoria, his prize pupil, goes missing in the backstreets of the city, he goes in search of her, and of the truth about his own life.

The emergence of crypto assets has required taxation authorities worldwide to develop unprecedented policies and compelled tax lawyers to apply existing laws in new ways. This book - the only one to focus solely on the taxation of crypto assets - provides a detailed country-by-country analysis of how the tax law of thirty-nine countries may apply to this rapidly developing area, including different use cases and compliance and documentation requirements. Following an overview of the technology and key characteristics of crypto assets, as well as the key tax concepts and types of taxes that could apply to them, leading practitioners in each particular jurisdiction summarize the relevant tax law in that country. Fully explained are such aspects of crypto assets as the following and how they are interrelated: sales; exchanges; receipt as remuneration; forks; airdrops; mining; staking; initial coin offerings; security token offerings; and initial exchange offerings. Contributors describe how each jurisdiction applies income and capital gains taxation, value-added tax and sales tax, withholding taxes, transfer taxes, and gift, inheritance, estate and wealth taxes in the context of crypto assets. Reporting requirements and enforcement are also covered. Tax law, as it applies to crypto assets, is new and continues to evolve. This book will be welcomed as the premier resource for tax practitioners, government officials, advisors, investors,

issuers, users of crypto assets, and taxation academics who are seeking informed awareness of the policy choices countries make in dealing with the taxation of this new technology. Tax lawyers dealing with crypto assets will have comprehensive practical guidance on how to comply with the tax laws of multiple jurisdictions.

The promise of what Blockchain can offer businesses has evolved from a cryptocurrency payment gateway platform to something bigger and truly a game-changer. Blockchain can be a transformative technology for many businesses as it has the potential to drive a distributed and decentralized way of re-imagining processes and business models. As an inter-organizational paradigm, Blockchain enables cooperation, collaboration, coordination, and communication between hitherto untrusted entities, unknown to each other. And, the best way to participate in this revolution is by being a part of a consortium of eco-system players. Joining a Blockchain consortium raises many questions in the minds of member organisations as this is a relatively new phenomenon. While searching for accurate, ground-level, unbiased and business-oriented information to answer the above questions, we realized that there is no single repository or detailed guide that gives complete information on the best practices of Blockchain consortiums. It was to address these lacunae that we put together this handbook for Blockchain practitioners

and business leaders, to help them plan their participation in a holistic way – by cutting through the hype and focusing on the core value propositions that Blockchain consortiums may unlock for their organizations.
