This book is an exploration into the relations between Americans and Japanese at the Mazda-Flat Rock plant. The presence of Japan Inc. looms larger than ever for millions of American managers and workers, as hundreds of Japanese companies open plants and offices in local communities across the United States. What is it like to work for the Japanese? Can Americans, with their strong tradition of individualism, adjust to a Japanese "team system" that emphasizes harmony and close cooperation? How do Americans and Japanese resolve the misunderstandings that arise from differences in language and culture? Journalists Joseph and Suzy Fucini sought the answers by studying relations between Americans and Japanese at the Mazda plant in Flat Rock, Michigan, the first wholly-owned Japanese auto plant to employ a unionized American workforce. For three years, the Fucinis followed events at the plant, interviewing more than one hundred workers, managers and outside suppliers. The authors conclude that for all its strengths, the team system requires the sacrifice of individual interests to the good of the group, and that no matter how hard an individual tries to become part of the Mazda team, advancement for both managers and workers will be limited by the fact that they are not Japanese.

Located between Monroe and Detroit in Michigan, Flat Rock's history begins with the

Wyandot, Huron, and Seneca Indians who once hunted and fished along the Huron River. Founded in 1823 by Michael Vreelandt, the area started to grow and prosper when settlers discovered the fertile lands and waterpower of the Huron River. The power of the river attracted settlers to build and operate two sawmills, a flour mill, and a blacksmith shop. When Pres. Abraham Lincoln called for volunteers to join the Civil War, many men from Flat Rock enlisted under Walter H. Wallace's encouragement. The largest number of volunteers came from Michigan, and that state suffered the largest number of wounded at the Battle of Gettysburg. Discover the town's story through these archival images from the Flat Rock Historical Society, showcasing the businesses, churches, community, and people whose hard work helped the city to prosper.

**This study chronicles the success of the Japanese car in America.**

Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.

In the last quarter century, the U.S. economy has been transformed by a large inflow of direct investment from abroad. Foreign companies, mainly from Europe and Japan, have built factories and acquired U.S. firms at an ever-increasing rate. Jonathan Crystal finds inconsistencies in how American businesses have responded to this globalization of production. U.S. firms, especially multinationals, have conflicting interests regarding investment protection, Crystal shows. Many American firms, under siege from overseas competitors, have already expended considerable energy in obtaining trade protection, but they are competing not only with foreign imports but

also with locally established foreign-owned firms. American businesses may favor stricter regulation of foreign companies that threaten their bottom line, but they also consider their own interests as global investors subject to retaliatory protection in other countries. Restrictions on "foreign" investment, it seems, are not so attractive when they are imposed by other countries. Unwanted Company examines the different ways in which important U.S. industries (including semiconductors, automobiles, steel, consumer electronics, telecommunications, and airlines) reacted to this new challenge. It focuses on the political responses of U.S.-owned firms to how Washington ought to regulate foreign direct investment and how it ought to treat foreign-owned firms in the United States. Some industries welcomed (or at least didn't oppose) foreign investment, whereas others sought restrictive and discriminatory policies. Crystal demonstrates how the nature of the domestic political environment shapes the translation of economic interests into policy preferences.

**By the time he was twelve, Spanian knew he would follow his family's footsteps to become a career criminal. What followed was a decade-long string of brazen crimes and brutal violence: stabbings, ram-raids, drug runs and a notorious high school siege. Throughout the Sydney social housing enclaves of Redfern, Waterloo and Woolloomooloo, Spanian earned a reputation as one of the city's most flagrant crooks; armed with a boxcutter in one hand, and a syringe in the other. But it all came at a damning price: in the throes of heroin addiction and thirteen years wasted behind bars, Spanian became a longstanding resident of jails across New South Wales. There, he was embroiled in racial divisions, prison politics, and a vicious vortex of self-destruction, until music and books became an unlikely lifeline. Reading and rapping became new rituals, and a glistening light at the end of the tunnel. Released from Bathurst Correctional Centre in 2017 with newfound purpose, Spanian has since found viral fame and a sprawling, worldwide audience through hip-hop and his magnetic social media presence. This is the powerful, unflinching and high-octane memoir of how a young inner-city kid became Spanian. It gives unapologetic insight into the gritty**

socio-economic underbelly of Sydney city, the criminal justice system, and the correctional system. The story of Spanian provides hope that even the most stubborn cycles can be broken, and new dreams made.
