This book provides a good guideline as to why and how to choose a particular theory or method to study an organisational phenomenon such as accounting. All the chapters provide both retrospective and contemporary views by scholars in the field. Each chapter documents the latest developments and research in accounting and control systems and provides valuable insights into methodological perspectives in accounting research. Business success or failure is often determined by decisions made in establishing selling prices for products and services. . . . In this clear and readable work, the authors present a good summary of the literature on pricing policy, emphasizing the relevance of costs. They propose a system that involves analyzing indirect costs to distinguish those that may be relevant to pricing in some circumstances but not others. This 'analytical contribution accounting' has promise as a tool for many businesses. Students writing papers on costs and pricing policy would find this volume a useful starting point. The bibliography is good. . . . College and university collections. Using practical examples and simple language, this book develops an accounting system that is a new and functional key to making product pricing decisions. This accounting system, which bridges the gap between full and direct costing, is called Analytical Contribution Accounting. Georges and McGee demonstrate practically as well as theoretically why it is so superior for pricing purposes. The system is based on the relativity aspects implicit in the direct cost method, and on the calculations of a set of differentiated contributions. This text is meant for use in introductory accounting courses at community colleges and proprietary schools. It is used mainly in vocational, non-transfer courses in basic accounting. It is commonly used in secretarial/office career programs. In addition, it is often used in the required accounting course for many non-office vocational programs in manufacturing technology, hospitality, automotive, HVAC, etc.. The Chapter 1-15 version is intended for one quarter/one semester courses.
