Crash course in wireless telecom Need a jargon-free explanation of how wireless telecommunications work, with an emphasis on the design and management of systems? You'll find it in Paul Bedell's Wireless Crash Course. This guide provides everything you need to understand the basic working of wireless, its technology and markets. You get a crystal-clear introduction to basic concepts like radio frequency (RF), cell sites, and switching, and insight into issues such as site acquisition, tower selection and construction, design of the fixed network (a.k.a the "backhaul"), and interconnection to the Public Switched Telephone Network. The expert author carefully delineates the complex regulatory processes that affect all wireless service providers. This A to Z treatment of every major feature of wireless explains both coming wireless internet access (WAP, Bluetooth, wireless data, etc.) and wireless broadband access (LMDS, MMDS) and their prospects in the marketplace.

Learn the Secrets Behind World-Class Product Development In a world overloaded with new products and services, making a single offering stand out is a Herculean task. Or is it? Market leaders are developing innovative processes that all but guarantee the success of their new products--and now their secrets are available to you. The McGraw-Hill 36-Hour Course: Product Development gives you the critical edge in a product-saturated world. Presenting the most current marketing tools and best practices, it provides proven methods behind successful product development, along with case studies from the most creative companies of our time--Apple, Google, Cisco, Toyota, Pixar, and many others. In less than a week, you'll be an expert on: Creating a value proposition that motivates a customer to buy your new product Protecting intellectual property to sustain a competitive advantage Creating a budget and securing the capital you need Managing the design, fabrication, integration, and delivery processes Master the essentials of product development Maximize your study time Measure your progress with chapter tests and a free online exam Earn a Certificate of Achievement online Designed as an easy, self-paced "course" complete with chapter-ending quizzes and an online final exam, The McGraw-Hill 36-Hour Course: Product Development puts you on the fast track to making your dream product a success.

Get a sound fix on the expanding universe of telecom Explore the vast telecom landscape -- from standards and protocols to premise, access and transport technologies. Far more than an acronym-studded quick fix, Telecom Crash Course is a true tutorial that offers you context, connections, and the wisdom to quickly grasp key technologies, including wireless Internet, optical networking, 3G, IP, protocol layer, PSTN, ATM, spread spectrum, GPRS, and SIP. Author Steven Shepard includes lively stories that deliver important points about the markets that drive the technologies. You get rigorous technical accuracy, with explanations of each technology's economic importance. Here's your chance to decipher the alphabet soup of telecom acronyms -- not just what they stand for, but what they mean and how they can generate profits.
