In Shakespeare, Adaptation, Psychoanalysis, Matthew Biberman analyzes early adaptations of Shakespeare's plays in order to identify and illustrate how both social mores and basic human psychology have changed in Anglo-American culture. Biberman contests the received wisdom that Shakespeare's characters reflect essentially timeless truths about human nature. To the contrary, he points out that Shakespeare's characters sometimes act and think in ways that have become either stigmatized or simply outmoded. Through his study of the adaptations, Biberman pinpoints aspects of Shakespeare's thinking about behavior and psychology that no longer ring true because circumstances have changed so dramatically between his time and the time of the adaptation. He shows how the adaptors' changes reveal key differences between Shakespeare's culture and the culture that then supplanted it. These changes, once grasped, reveal retroactively some of the ways in which Shakespeare's characters do not act and think as we might expect them to act and think. Thus Biberman counters Harold Bloom's claim that Shakespeare fundamentally invents our sense of the human; rather, he argues, our sense of the human is equally bound up in the many ways that modern culture has come to resist or outright reject the behavior we see in Shakespeare's plays. Ultimately, our

current sense of 'the human' is bound up not with the adoption of Shakespeare's psychology, perhaps, but its adaption-or, in psychoanalytic terms, its repression and replacement.

This book argues that play offered Hamlet, John Donne, George Herbert, Andrew Marvell, Robert Burton, and Sir Thomas Browne a way to live within the contradictions and conflicts of late Renaissance life by providing a new stance for the self. Grounding its argument in recent theories of play and in a historical analysis that sees the seventeenth century as a point of crisis in the formation of the western self, the author demonstrates how play helped mediate this crisis and how central texts of the period enact this mediation.

As with the first Vintage anthology in the Pocketful series, this selection of some of the most commonly taught plays is aimed at satisfying the need for a concise, quality collection that students will find inexpensive and that instructors will enjoy teaching. The reception of this series has supported the original assumption that students and teachers would welcome an innovative alternative to huge anthologies, which are rarely used in their entirety, tend to be too bulky to carry and to handle in class. A POCKETFUL OF PLAYS: VINTAGE DRAMA contains six plays that research reveals to be currently among the most commonly studied in class around the country. The plays include source materials to encourage further discussion and analysis. Among these enhancements are author's comments, biographical and critical commentaries, and reviews of actual productions.

Writing in a lively, informal style, two editors with extensive experience in a wide variety of fields--fiction and nonfiction, trade and reference, academic and commercial publishing--explain what editors in different jobs really do in this concise practical guide. The past fifteen years have witnessed a diverse group of experiments in 'staging' Shakespeare on film. New Wave Shakespeare on Screen introduces and applies the new analytic techniques and language that are required to make sense of this new wave. Drawing on developments in Shakespeare studies, performance studies, and media studies, the book integrates text-based and screen-based approaches in ways that will be accessible to teachers and students, as well as scholars. The study maps a critical vocabulary for interpreting Shakespeare film; addresses script-to-screen questions about authority and

performativity; outlines varied approaches to adaptation such as revival, recycling, allusion, and sampling; parses sound as well as visual effects; and explores the cross-pollination between film and other media, from ancient to cutting-edge. New Wave Shakespeare on Screen emphasizes how rich the payoffs can be when Shakespearians turn their attention to film adaptations as texts: aesthetically complex, historically situated, and as demanding in their own right as the playtexts they renovate. Works discussed include pop culture films like Billy Morrisette 's Scotland, PA; televised updatings like the ITV Othello; and art-house films such as Julie Taymor 's Titus, Al Pacino 's Looking for Richard, Michael Almereyda 's Hamlet, and Kristian Levering 's The King is Alive. These films reframe the playtexts according to a variety of extra-Shakespearean interests, inviting viewers back to them in fresh ways.

“To succeed in the theatre, students must have strong skills in analyzing plays.” So states the authors’ rationale for this concise text that offers a step-by-step approach to recognizing how plays work. Pritner and Walters guide the reader through four levels of reading a play. This approach progresses from a purely subjective and personal response, through objective information gathering, and on to more complex levels of interpretation. Each chapter of *Introduction to Play Analysis* introduces a

concept that is then explored by studying its application to *The Glass Menagerie*, chosen for its simultaneous accessibility and complexity. Other examples rely on works by Sophocles, Molière, August Wilson, and Shakespeare. End-of-chapter questions can be applied to any play being analyzed.

anthology which gives students a perspective on the variety and range of a large group of poets. This multi-national, multi-cultural, multi-genre and multi-lingual collection gives students a view and instructors an opportunity to teach the universality of poetry. Includes a superb historical range of poetry, from its recorded beginnings to most contemporary. *Affect Theory, Genre, and the Example of Tragedy* employs Silvan Tomkins' Affect-Script theory of human psychology to explore the largely unacknowledged emotions of disgust and shame in tragedy. The book begins with an overview of Tomkins' relationship to both traditional psychoanalysis and theories of human motivation and emotion, before considering tragedy via case studies of Oedipus, Hamlet, and *Death of a Salesman*. Aligning Affect-Script theory with literary genre studies, this text explores what motivates fictional characters within the closed conditions of their imagined worlds and how we as an audience relate to and understand fictional characters as motivated humans. This book is about the human condition: suffering, emotional and psychological distress, identity, existence, and reality. It examines these issues at the physical, biological, psychological,

sociocultural, linguistic, discursive, and spiritual levels, comparing and evaluating, as well as integrating where possible, a broad range of approaches and theories to provide a holistic understanding of the person. This book charts a range of cross-disciplinary approaches and theories relating to human nature, experience, and behavior, and discusses current postmodernist/poststructuralist concerns about the essence of what we are. The book incorporates Eastern philosophies and psychologies, and identifies, in its conclusion, a number of elicited principles and practices that a person may incorporate into their daily living to reduce suffering and increase psychological and emotional well-being. The book also offers a schematic representation of its general concepts in relation to the human condition, its levels, components, and processes, which can be used to refer to or underpin understanding, and for readers' further discussion, exploration, and research.
