The Sayre & Morris texts have been written for first-year economic principles courses offered in colleges and universities. In writing this text, the authors have attempted to stay focused on four guiding principles: 1. Achieve a well-written text by writing as clearly as possible, to avoid unnecessary jargon, to speak directly to the student, and avoid unnecessary abstraction and repetition. 2. Provide a focused emphasis on Student Learning. Students learn economics by doing economics. Review questions and self-test questions are positioned throughout each chapter to achieve this end along with a comprehensive and integrated student Study Guide. 3. Avoid an encyclopedic text by focusing on important material. The authors have refined the coverage in many chapters with a view to increasing readability and student performance. Review exercises, found at the end of chapter sections, have been rewritten to focus on the core objectives. In addition, the integrated Study Guide has been reorganized into three major sections

Macroeconomics, First Canadian Edition offers a new approach to this subject. Drawing upon their vast experience in teaching and research, the authors have written an intermediate macroeconomics book that sets the standard for books in this third millennium. Delong provides a streamlined presentation of material, traditional and modern, resulting in a more understandable and comprehensive book. This edition features five changes to the standard presentation of modern macroeconomics: -Provide a more student-friendly way of learning growth theory -Provide sufficient coverage of growth facts so that students learn the how and why of both growth over time and growth across countries· -Treat the economy as open from the beginning of the book· -Deal with interest rates, not money stocks· -Increased focus on the Phillips curve. These changes, while not radical are shifts in emphasis and changes of focus. They do not require recasting of courses, but they are very important in bringing the organization of the book into line with what students learning macroeconomics today need to know.

Market feedback tells us that relevance of the material covered, clarity, pacing and even a bit of “show and tell” will draw students into the text and provide the motivation to learn economics. Frank and Bernanke, Macroeconomics, Second Canadian Edition, addresses these needs by focusing on the following:· Active learning approach: New concepts are introduced by means of simple examples, usually numerical, which are developed step-by-step in the text. Many examples are followed by exercises that allow students to test their understanding. The worked examples (the show and tell) put the theory into practice. This system also includes exercises, similar to the worked examples, for students to practice on. Solutions to the Exercises are found at the end of each chapter. · Economics reflect the real world: Through the Economic Naturalist feature (minicases), students are encouraged to become economic naturalists who employ basic economic principles to understand and explain what they see around them. These examples show students the relevance of economics to their world. Core concepts are reinforced in the discussion of each of these minicases. Additional Economic Naturalist examples are found on the Student web page and in the Instructor's Manual. · Core Principles: A set of six core principles are integrated throughout the text to ensure that students develop a strong understanding of these core economic ideas.· Accessible text with electronic support: The Online Learning Centre provides faculty and students with a comprehensive set of resources to engage student's in the study of economics. 500 ways to achieve your highest score From Basic Economic Concepts to Measurement of Economic Systems, Economic Growth and International Trade and Finance, there is a lot of subject matter to know if you want to succeed on your AP Macroeconomics exam.
