

## Mcqs And Emqs For The Diploma In Otolaryngology Head And Neck Surgery Masterpass Masterpass Series

**The Diploma in Otolaryngology - Head & Neck Surgery (DOHNS) is now an intercollegiate examination, and can count towards membership of one of the surgical colleges of Great Britain. The DOHNS has evolved to fit its new role, leaving little up-to-date material available for candidates preparing for the written component. This book by former DOHNS candidates meets that need, focusing on topics that are likely to be examined. Each answer is accompanied by an explanation using current evidence-based research wherever possible. This will be an essential revision text for all DOHNS candidates. 'Applicable to medical students and trainee doctors in general practice as well as ENT and related head and neck disciplines such as neurology and neurosurgery. Each question is followed by the correct answer and clear and concise explanation. Indeed, it is the quality of this additional information that makes this book stand out from its competitors. It provides the student with experience and examination technique in answering these questions, but additionally it is a teaching volume in its own right. It is a credit to its enthusiastic and very competent young teachers in its content, design and clarity, and is another excellent contribution to our thriving speciality.'** - from the Foreword by David Howard

**Plastic Surgery Quiz, is a collection of 500 multiple choice (MCQs) and extended matching (EMQs) questions. It is the first in a series of revision books for the major surgical specialities. The questions are arranged into 10 quizzes, each covering the wide breadth of the speciality. Each quiz comprises of 40 MCQs and 10 EMQs. The answers are presented at the end of each quiz with brief explanations and extra study material. This book is suitable for plastic surgery trainees and plastic surgery residents revising or preparing for their final exits exams or the National Board Exams. It would also be suitable as a revision aid covering a wide range of topics within Plastic Surgery. What do you need to do before sitting the written component of the FRCS (Tr and Orth) examination? Practice, practice, practice. Sadly the MCQs and EMQs in the actual examination are not this straightforward. This book will help the orthopaedic surgeon preparing for the written part of the examination to be ready to face the task ahead. The MCQs and EMQs appear in the same format as the examination and cover the syllabus topics. Divided into subspecialty chapters, including trauma and basic science, this book is ideal for use alongside a revision plan. The questions have detailed answers and selected references, arming readers with the knowledge they need to approach the topic correctly. Written by recent, successful examination candidates, this question-and-answer-based revision guide is ideal preparation for the FRCS (Tr and Orth) examination as well as being helpful for other postgraduate orthopaedic exams"--**Provided by publisher.

MCQs and EMQs for the MRCS comprises 570 multiple choice questions and extended matching questions in the format of the latest MRCS examination. The questions are presented as six practice papers of 50 MCQs and 45 EMQs and have been specifically designed to prepare the reader for the examination. Papers 1-3 test a candidate's knowledge of the Core Modules and Papers 4-6 test understanding of the System Modules. Answers and brief explanations and provided to aid understanding. Specifically designed to help candidates revise for the MRCS exam, this two-volume pack features 350 Single Best Answer multiple choice questions, and 250 Extended Matching Questions, divided into 96 themes, covering the whole syllabus. Containing everything candidates need to pass the MRCS Part A, the pack focuses intensively on the application of basic sciences (applied surgical anatomy, physiology, and pathology) to the management of surgical patients. The high level of detail included within the questions and their explanations allows effective self-assessment of knowledge and quick identification of key areas requiring further attention. Varying approaches to Single Best Answer multiple choice questions are used, giving effective exam practice and guidance through revision and exam technique. This includes clinical case questions, positively-worded questions, requiring selection of the most appropriate of relatively correct answers; 'two-step' or 'double-jump' questions, requiring several cognitive steps to arrive at the correct answer; as well as factual recall questions, prompting basic recall of facts.

This is the new, expanded and updated edition of the key text currently available for the first stages of the MRCS examination. Mirroring the exam syllabus, it offers the trainee a clear understanding of the core knowledge required for examination success and incorporates new material reflecting recent developments and the new examination. The chapters have been written by acknowledged experts, many of whom are themselves involved in the training and examining of candidates. Designed to achieve maximum efficiency in learning, the content provides ample detail, key points and suggestions for further reading. In addition to a detailed index, each chapter has its own table of contents to enhance ease of use. It will be indispensable for the new trainee, and will also provide established surgeons and other healthcare professionals working in the surgical environment with a modern, authoritative overview of the key areas of surgical practice. With over 1000 essential questions, MCQs and EMQs in Surgery is the ideal self-assessment companion guide to Bailey & Love 's Short Practice in Surgery, 26th edition. The book assists trainee surgeons as they prepare for examinations and enables them to test their knowledge of the principles and practice of surgery as outlined in Bailey & Love. Divided into 13 subject-specific sections and written by expert contributors, the MCQs and EMQs provide comprehensive coverage of the current surgical curriculum as well as the core learning points as set out in Bailey & Love. The book is ideally suited for the MRCS exam as well as for the first part of the FRCS (General Surgery) and the new Intercollegiate FRCS (International) exams. The book emphasises the importance of self-assessment within effective clinical examination and soundly based surgical principles while taking into account the latest developments in practice. This new edition includes many new contributors and enhanced chapters with answers provided in much greater detail. While the book is closely aligned with the content of the celebrated Bailey & Love, it also performs well as a standalone self-test guide and may be used independently. MCQs and EMQs in Surgery provides an invaluable revision tool for all candidates studying for the MRCS and FRCS exams.

This work features a Foreword by David Taylor, Vice Dean, Leicester Medical School. "This book is the first to assist students with a new format of testing knowledge and clinical skills, i.e., the extended matching question. I am delighted my colleagues here in Leicester, where undergraduate education is given the very highest priority, have found the time and energy to write this book. This book comprehensively tests a whole range of obstetrics and gynaecology and I congratulate them for it." - David Taylor, in the Foreword. This revision aid in Obstetrics and Gynaecology is based on the Extended Matching Question format (EMQ). It contains over 200 patient vignettes arranged in topic areas covering a broad range of themes and degrees of difficulty. It provides test EMQs and detailed answers at the completion of each section. "EMQs in Obstetrics and Gynaecology" is an indispensable study and revision aid for undergraduate medical students preparing for in-course assessment in obstetrics and gynaecology as well as final exams. It also provides a vital review for specialist trainees in obstetrics and gynaecology preparing to take postgraduate exams.

Pre-Clinical Medicine consists of a comprehensive and rigorously developed collection of multiple choice questions (MCQs) and extended matching questions (EMQs), carefully designed to equip you with the medical knowledge and clinical acumen necessary to excel in your pre-clinical exams. Success at medical school demands an in-depth understanding of fundamental scientific principles, as well as the ability to integrate and apply this knowledge in different clinical contexts. Each chapter of this book has been methodically developed in order to help you do just that, with over 500 practice questions in total. By working through these practice questions and the detailed solutions provided, you will enhance your appreciation and understanding of the medical sciences, and significantly improve your clinical reasoning skills, not only making you a better medical student but laying a strong foundation for your future career as a doctor.

Get Through Intercollegiate MRCS Parts 1 and 2: MCQs and EMQs has been written by experienced surgeons and features four practice papers: two covering each part of the examination. All questions have been modelled on actual exam questions so that they accurately reflect the style and level of difficulty. Detailed explanations are given in the answers to help candidates use the book as a revision aid as well as a self-test book. All surgical trainees preparing to sit the two parts of the MRCS examination will find this book an invaluable aid to their revision, as well as keen medical students with an interest in surgery as a future career.

EMQs and MCQs for Medical Finals is a unique revision and study tool for Final Examination preparation. Practice questions cover a variety of key topics in both medicine and surgery, with the mixture of questions reflecting the general weighting in real exams. Comprehensive answer notes are provided for each question, explaining why a particular answer is correct and why others are not. Useful mnemonics and tips on remembering key facts help to consolidate learning.

A Collection of 500 McQ and Emq Questions

**With over 1000 essential questions, MCQs and EMQs in Surgery is the ideal self-assessment companion guide to Bailey and Love's Short Practice in Surgery, 26th edition. The book assists trainee surgeons as they prepare for examinations and enables them to test their knowledge of the principles and practice of surgery as outlined in Bailey and Love. Bailey & Love's Short Practice of Surgery remains one of the world's pre-eminent medical textbooks, beloved by generations of surgeons, with lifetime sales in excess of one million copies. Now in its 25th edition, the content has been thoroughly revised and updated while retaining its traditional strengths. Under the stewardship of the eminent editorial team, comprising two editors with experience gained over previous editions and a third editor new to this edition, and in response to reader feedback, the content has been sub-divided into parts to ensure a logical sequence and grouping of related chapters throughout while the text features enthusiastically received in the last edition have been retained. The new edition opens with sections devoted to the underlying principles of surgical practice, investigation and diagnosis, and pre-operative care. These are followed by chapters covering all aspects of surgical trauma. The remainder of the book considers each of the surgical specialities in turn, from elective orthopaedics through skin, head and neck, breast and endocrine, cardiothoracic and vascular, to abdominal and genitourinary. Key features: Authoritative: emphasises the importance of effective clinical examination and soundly based surgical principles, while taking into account the latest developments in surgical practice. Updated: incorporates new chapters on a wide variety of topics including metabolic response to injury, shock and blood transfusion, and surgery in the tropics. Easy to navigate: related chapters brought together into clearly differentiated sections for the first time. Readable: preserves the clear, direct writing style, uncluttered by technical jargon, that has proved so popular in previous editions. User-friendly: numerous photographs and explanatory line diagrams, learning objectives, summary boxes, biographical**

footnotes, memorable anecdotes and full-colour presentation supplement and enhance the text throughout. Bailey and Love has a wide appeal to all those studying surgery, from undergraduate medical students to those in preparation for their postgraduate surgical examinations. In addition, its high standing and reputation for unambiguous advice also make it the first point of reference for many practising surgeons. The changes that have been introduced to the 25th edition will only serve to strengthen support for the text among all these groups. There has been a marked change in examination strategy over the last five years; EMQs (extended matching questions) are popular with tutors and students alike as they present a more realistic view of a student's ability to apply his or her knowledge in a clinical situation. The new edition of MCQs in Physiology has been subject to a complete overhaul to become MCQs and EMQs in Physiology. This reflects the current methods of examination techniques and will provide the student with a complete revision resource book. Packed with MCQs and EMQs along with clear and simple explanations of each answer, this book covers all the main physiological systems. The questions stretch from basic to applied and interpretative and are written with the modern integrated syllabus firmly in mind. Presented alongside other core revision books such as EMQs in Clinical Medicine this book will soon be seen as a must-have for any medic's shelf. Specifically designed for the current requirements of the MRCS examination, this book reflects the balance between basic science and clinical surgery. Each core and system chapter contains both multiple choice and extended matching questions. Additionally, it includes detailed explanations, and is ideally suited to preparation for this examination.
