

Md 110

The United States Government Printing Office (GPO) was created in June 1860, and is an agency of the U.S. federal government based in Washington D.C. The office prints documents produced by and for the federal government, including Congress, the Supreme Court, the Executive Office of the President and other executive departments, and independent agencies. A hearing is a meeting of the Senate, House, joint or certain Government committee that is open to the public so that they can listen in on the opinions of the legislation. Hearings can also be held to explore certain topics or a current issue. It typically takes between two months up to two years to be published. This is one of those hearings.

With an Appendix ...

District of Columbia Appropriations

The turbulent years of 1861-1865 were especially so for the people of Randolph County, North Carolina. Sentiment to stay in the Union was high, and remained so throughout the war, yet hundreds of Randolph County boys marched off to defend their native soil, many of course never to return. "The Randolph Hornets," Company M, 22nd Regiment North Carolina Troops, were a company of such men, who earned a reputation for their grit and determination in battle. This book conveys the history of the Randolph Hornets and of the company's individual members through both official and personal accounts of the Civil War. Articles written by Sergeant John T. Turner in 1914 recalling his experiences with the company are included as well as an in-depth history of the company battle flag, its capture and its return to the county. A complete roster of the company includes genealogical information and short biographies for several of the men. The final chapter provides information about the local reenactment group based on the company, whose performances provide a sense of the hardships of 19th century military life.

The Latin American Experience

NBS Technical Note

Management Directive MD-110

Antitrust policy nominally plays an instrumental public interest role. The generally accepted notion is that it is a government instrument designed to intervene in relatively unregulated markets in order to preserve rivalry among independent buyers and sellers. Competition authorities are supposed to restrain business conduct that exercises monopoly power aimed at excluding competitors or exploiting consumers and clients. Thus it can be said - although few pro-market theorists make the insight explicit - that antitrust provisions reveal mistrust of the capacity of markets to promote social welfare. The inner logic, enforcement mechanisms, and practical outcomes of antitrust provisions are all intrinsically contradictory to the natural dynamic course of market functioning. In Dr. De Leon's challenging thesis, this mistrust of the market lies at the root of antitrust policy, giving rise always to a preference towards 'predicting' the result of impersonal market forces rather than interpreting the entrepreneurial behaviour which creates those forces. And it is in Latin America that he finds the powerful evidence he needs to support his case. From the formative years of Latin American economic institutions, during the Spanish Empire, economic regulations - far from being driven by the pursuit of promoting free trade and economic freedom - have been conceived, enacted and implemented in the context of deeply anti-market public policies, trade mercantilism and government dirigisme. The so-called "neoliberal" revolution of the 1990s triggered by the Washington Consensus did not really change the interventionist innuendo of these policies, but merely restated the social welfare goal to be achieved: the pursuit of economic efficiency. Dr. De Leon presents his case against the assumption that consumer welfare orientated policies such as antitrust do really promote entrepreneurship and market goals. Paradoxically, antitrust enforcement has undermined the transparency of market institutions, in the name of promoting market competition. The author's provocative analysis marshals several sets of facts in support of his thesis, including the actual functioning of antitrust policy as reflected in case law in various Latin American countries, the preference of merger control over other less intrusive forms of market surveillance, the constrained role of competition advocacy against government acts, and the ineffective institutional structure created to apply the policy. Among the many specific topics treated are the following: government immunity; strategic industries; state-owned enterprises; politically influential groups; measurement of market concentration; the burden of proof of social welfare benefits; the role of joint trade associations and professional guilds; institutional arrangements that favour collusion; selective distribution; sector regulation; erosion of property rights; marginal role of courts in the antitrust system; leniency programs; and privatized public utilities. The growing significance of Latin America in the context of economic globalization endows this book with huge international interest. Written by a leading authority on the topic, this is the first book that presents a detailed description of Latin American antitrust law and policy as it has been developed through numerous judicial opinions. A wide variety of audiences around the world will find it of extraordinary value: competition law specialists, scholars and students of the subject, policymakers and politicians in Latin America, as well as all interested lawyers, jurists, and economists.

Authored by experts in various facets of civil litigation and reviewed by general editor William C. Bochet, LexisNexis Practice Guide New Jersey Trial, Post-Trial, and Appellate Proceedings offers quick, direct, New Jersey-specific answers to questions that arise in day-to-day civil litigation practice. Topically organized, LexisNexis Practice Guide New Jersey Trial, Post-Trial, and Appellate Proceedings covers a range of civil practice issues and takes task-oriented approach to each subject in its action-oriented section headings (e.g. Moving for Relief in Limine, Preparing for Direct Examinations of Experts at Trial, and Making Objections or Requests for Curative Instructions) and multiple checklists in each chapter that guide the reader through each step of a task. This publication covers critical topics such as jury charges, bench trial, opening statements, burdens of proof, trial motions, party and non-party witnesses, expert witnesses, summations, and bringing appeals. It includes numerous practice tips (Strategic Point, Warning, Timing and Exception) to ensure best practices and help the attorney make choices, avoid practice pitfalls and recognize important time limitations and exceptions to general rules. The online product includes practice forms.
