The salient features of the present edition are: All the Problems and Solutions have been thoroughly revised in the light of up-to-date amendments in Income tax Law and Rules for Assessment Year 2020-21. Almost all numerical questions given at the end of the chapters of the authors' other publications on Income-tax (viz., Income-tax Law and Accounts, Aaykar Vidhan evam Lekhe, Law and Practice of Income-tax) have been solved in this book and the number printed within brackets at the end of the questions in other publications is the problem number of this book. The selection and sequence of the questions are well planned and systematic so as to cover all ticklish points within a reasonable number of questions. Wherever needed, detailed explanatory notes have been given at the end of solutions. Candidates preparing for C.A., Company Secretaries, Cost and Works Accountants, and Income-tax Departmental Examinations, will, particularly, find the book very useful. It will also be useful for candidates preparing for B.Com. and M.Com. Examinations of various Indian Universities.

The story of special air warfare and the Air Commandos who served for the ambassadors in Laos from 1964 to 1975 is captured through extensive research and veteran interviews. The author has meticulously put together a comprehensive overview of the involvement of USAF Air Commandos who served in Laos as trainers, advisors, and clandestine combat forces to prevent the communist takeover of the Royal Lao Government. This book includes pictures of those operations, unveils what had been a US government secret war, and adds a substantial contribution to understanding the wider war in Southeast Asia.

This is a short, focused introduction to MATLAB, a comprehensive software system for mathematical and technical computing. It contains concise explanations of essential MATLAB commands, as well as easily understood instructions for using MATLAB's programming features, graphical capabilities, simulation models, and rich desktop interface. Written for MATLAB 7, it can also be used with earlier (and later) versions of MATLAB. This book teaches how to graph functions, solve equations, manipulate images, and much more. It contains explicit instructions for using MATLAB's companion software, Simulink, which allows graphical models to be built for dynamical systems. MATLAB's new "publish" feature is discussed, which allows mathematical computations to be combined with text and graphics, to produce polished, integrated, interactive documents. For the beginner it explains everything needed to start using MATLAB, while experienced users making the switch to MATLAB 7 from an earlier version will also find much useful information here.

Reporting the results of the 'East Asian Barometer' - a large-scale research project that conducted national-sample surveys in five new democracies, one established democracy and two non-democracies across Asia - this book examines the state of democracy in East Asia.

Africa's Informal Workers is a vigorous examination of the informalization and casualization of work, which is changing livelihoods in Africa and beyond. Gathering cases from nine countries and cities across sub-Saharan Africa, and from a range of sectors, this volume goes beyond the usual focus on household 'coping strategies' and individual agency, addressing the growing number of collective organizations through which informal workers make themselves visible and articulate their demands and interests. The emerging picture is that of a highly diverse landscape of organized actors, providing grounds for tension but also opportunities for alliance. The collection examines attempts at organizing across the formal-informal work spheres, and explores the novel trend of transnational organizing by informal workers. Part of the ground-breaking Africa Now series, Africa's Informal Workers is a timely exploration of deep, ongoing economic, political and social transformations.

A collection of international contributions from renowned academics and practitioners from the US, UK, China, the second edition of Fashion Marketing has been completely updated, revised and expanded to reflect the major changes in the fashion industry since 2001 and covers all of the key themes and issues of the area. Key themes and areas covered include globalization, fast fashion, luxury fashion, offshoring, business-to-business, forecasting, sourcing, supply chain management, new product development, design management, logistics, range planning, color prediction, market testing, e-commerce, and strategy.

Richard Rubin has written a completely revised and updated edition of the first textbook - and most widely-used - specifically written to cover the fundamentals of library and information science. Foundations is the most current teaching resource available, covering the practice of librarianship, the place of libraries in the broader information infrastructure, the development of information science, the growth of information technologies, information policy in libraries, intellectual organization of libraries, the mission of libraries

from past to present, and ethical aspects and principles between information providers and clients. The various types of libraries (public, academic, school, and special libraries), their internal functions, and the major organizational issues they face are discussed. This

second edition provides updates of many critical issues and also includes new topics - digital libraries and reference, information infrastructure, the Web, UCITA, Homeland Security, revised intellectual freedom policy statements, digital rights management, file sharing, MARC21, metadata, and much more - that are important to our profession. The extensive lists of selected readings have been thoroughly updated. Library and information science students and professionals will find the background and concepts they need to meet today's - and tomorrow's - challenges in this new edition.

This study draws a new picture of the invention of the emblem book, and discusses the textual and pictorial means that were developed in order to transmit knowledge, from Alciato to Vaenius, with special emphasis on the emblem commentary and natural history.

Business to business markets are considerably more challenging than consumer markets and as such demand a more specific skillset from marketers. Buyers, with a responsibility to their company and specialist product knowledge, are more demanding than the average consumer. Given that the products themselves may be highly complex, this often requires a sophisticated buyer to understand them. Increasingly, B2B relationships are conducted within a global context. However all textbooks are region-specific despite this growing move towards global business relationships – except this one. This textbook takes a global viewpoint, with the help of an international author team and cases from across the globe. Other unique features of this insightful study include: placement of B2B in a strategic marketing setting; full discussion of strategy in a global setting including hypercompetition; full chapter on ethics and CSR early in the text; and detailed review of global B2B services marketing, trade shows, and market research. This new edition has been fully revised and updated with a full set of brand new case studies and features expanded sections on digital issues, CRM, and social media as well as personal selling. More selective, shorter, and easier to read than other B2B textbooks, this is ideal for introduction to B2B and shorter courses. Yet, it is comprehensive enough to cover all the aspects of B2B marketing any marketer needs, be they students or practitioners looking to improve their knowledge.
