*nature of English as a commodified gatekeeper and simultaneously provide alternative visions for language education. - Ryuko Kubota, Professor, The university of British Columbia. In the wake of the MeToo movement, revelations of sexual assault and harassment continue to disrupt sexual politics across the globe. Reports of widespread misconduct—in workplaces from doctors' offices to factory floors—precipitate firings, legal actions, street protests, and policy punditry. Meenakshi Gigi Durham situates media culture as a place in which these broader social struggles are produced and reproduced. The media figures whose depravity sparked the #MeToo movement are symbols of the complexities of sexual desire and consent. Arguing that the media are a linchpin in these events, Durham provides a feminist account of the interrelated contexts of media production, representation, and reception. She situates the media as the key site where the establishment of sexuality and social relations takes place, and traces the media's powerful role in both reifying and challenging rape culture. This volume is dedicated to questions arising in linguistic, sociological and anthropological analyses of intercultural encounters. It aims at presenting new theoretical and methodological aspects of Intercultural Communication, focusing on issues such as

ideology and hegemonial attitudes, communicative genres and culture specific repertoires of genres, the theory of contextualization and nonverbal (prosodic, gestural, mimic) contextualization cues. The collected articles, which share an interactive view of language, focus on the methodological possibilities of explanatory analyses of intercultural communication. They address the question of how participants in intercultural communication (re)construct cultural differences and cultural identities. Empirical analyses go hand-in-hand with the discussion of

The rise of social networks and social media has led to a massive shift in the ways information is dispersed. Platforms like Twitter and Facebook allow people to more easily connect as a community, but they can also be avenues for misinformation, fake news, and polarization. The need to examine, model, and analyze the trajectory of information spread within this new paradigm has never been greater. This text expands upon the authors'

combined teaching experience, engineering knowledge, and multiple academic journal publications on these topics to present an intuitive and easy to understand exploration of social media information spread alongside the technical and mathematical concepts. By design, this book uses simple language and accessible and modern case studies (including those centered around United States mass shootings, the #MeToo social movement, and more) to ensure it is accessible to the casual reader. At the same time, readers with prior knowledge

of the topics will benefit from the mathematical model and control elements and accompanying sample simulation code for each main topic. By reading this book and working through the included exercises, readers will gain a general understanding of modern social media systems, network fundamentals, model development techniques, and social marketing. The mathematical modeling of information spread over social media is heavily emphasized through a review of existing epidemiology and marketing based models. The book then presents novel models developed by the

authors to account for modern social media concerns such as community filter bubbles, strongly polarized groups, and contentious information spread. Readers will learn how to build and execute simple case studies using Twitter data to help verify the text's proposed models. Once the reader is armed with a fundamental understanding of mathematical modeling and social media-based system considerations, the book introduces more complex engineering control concepts, including controller design, PID control, and optimal control. Examples of control

methods for social campaigns and misinformation mitigation applications are covered in a step-by-step format from problem formulation to solution simulation and results discussions. While many of the examples and methods are framed in the context of controlling social media information spread, the material is also directly applicable to many different types of controllable systems. With the essential background, models, and tools presented within, any interested reader can take the first steps toward exploring and taming the growing complexity of the
