This Handbook is designed to assist Army Commanders in taking proper immediate action when faced with a variety of legal issues that might arise during your command. The purpose of your action is to preserve the legal situation until you can consult with your servicing Judge Advocate. However, like most aspects of your command responsibilities, you can fail if you just wait for things to come to you. You must be proactive in preventing problems before they occur. In the legal arena, this means establishing and enforcing high standards, ensuring your Soldiers are fully aware of those standards and properly comply with them. You must also properly train your Soldiers on all Army policies and higher level command standards so that they also understand and comply with them. Soldiers must also be able to live by Army Values and be able to apply those values to real-world situations, which will usually keep them well within legal bounds. Topics include: THE TOP TEN SITUATIONS WHERE YOU SHOULD IMMEDIATELY CONSULT YOUR SERVICING JUDGE ADVOCATE MILITARY JUSTICE/CRIMINAL LAW Introduction to Military Criminal Law Misconduct: Options and Duties Of The Commander Unlawful Command Influence R.C.M. 303 Preliminary Inquiry Non-Judicial Punishment, Article 15, UCMJ Article 15 Search and Seizure Self-Incrimination, Confessions, and Rights Warning UCMJ Articles Urinalysis, Drug and Alcohol Policies Fraternalization and Improper Senior-Subordinate Relationships Proper Responses to Reports of Sexual Assault Victim -Witness Issues INVESTIGATIONS Administrative Investigations/References Intro AR 15-6 Investigations Accident Investigations (AR 385-10) Line of Duty Investigations (AR 600-8-4) Fatal Training/Operational Accident Presentations Kin (AR 600-34) Financial Liability Investigations (AR 735-5) STANDARDS OF ETHICAL CONDUCT Standards of Conduct Commanders Coins Support to Non-Federal Entities Government Motor Vehicle Transportation Family Readiness Groups Accompanying Spousal Travel Annual Filing of Financial Disclosure Forms ADMINISTRATIVE LAW AND PERSONNEL ACTIONS "Flagging" Soldiers from Positive Personnel Actions Enlisted Separations Officer Separations Bars To Reenlistment - Field Initiated Qualitative Service Program (QSP) Removal of Enlisted Soldiers From Promotion Lists Removal of Officers and Warrant Officers From Promotion Lists Security Clearances - Suspension and Revocation Sexual Harassment Domestic Violence Amendment to the Gun Control Act (Lautenberg Amendment) & 138 Complaints Relief from Command INDIVIDUAL SOLDIER RIGHTS Body Piercing & Tattoo Policy Conscientious Objection Behavioral Health Evaluations Command Access to a Soldier's Protected Health Information (HIPAA) Extremist Organizations and Activities Political Activities by Members of The Armed Forces Whistleblower Protection Service Member's Civil Relief Act (SCRA) Religious Accommodations INTERNATIONAL & OPERATIONAL LAW Rules of Engagement Law of Armed Conflict CLAIMS AND CLIENT SERVICES Article 139 Claims Foreign and Deployment Claims Family Support Obligations (AR 608-99) Debt and Consumer Protection GOVERNMENT INFORMATION PRACTICES Freedom of Information Act Program Privacy Act Program FISCAL LAW Fiscal Law for Commanders Judging by the frequency with which it makes an appearance in television news shows and late night stand up routines, the frivolous lawsuit has become part and parcel of our national culture. McDonald's because she was scalded when she spilled her coffee. Thousands file lawsuits claiming they were injured by Agent Orange, silicone breast implants, or Bendectin although scientists research shows these substances do not cause the diseases in question. The United States, conventional wisdom has it, is a hyperlitigious society, propelled by avaricious lawyers, harebrained judges, and runaway juries who waste money and time and, moreover, many are simply groundless. Carl T. Bogus is not so sure. In Why Lawsuits Are Good for America, Bogus argues that common law works far better than commonly believed. Indeed, Bogus contends that while the system can and occasionally does produce "wrong" results, it is very difficult for it to make flatly irrational decisions. Blending history, theory, empirical data, and social studies, Bogus explains why the common law, rather than being outdated, may be more necessary than ever. As Bogus sees it, the common law is an essential adjunct to governmental regulation because it is not as easily manipulated by big business. Meanwhile, big business has launched an all out war on the common law. "Tort reform"—measures designed to make more difficult for individuals and small corporations—one of the ten proposals in the Republican Contract With America, and George W. Bush's first major initiative as Governor of Texas. And much of what we have come to believe about tort reform comes from a coordinated propaganda effort by big business and its allies. Bogus makes a compelling case for the necessity of safeguarding the system from current assaults. Why Lawsuits Are Good for America provides broad historical overviews of the development of American common law, torts, products liability, as well as fresh and provocative arguments about the role of the system of "disciplined" litigation in the twenty-first century.

HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

Management decisions on appropriate practices and policies regarding tropical forests often need to be made in spite of innumerable uncertainties and complexities. Among the uncertainties are the lack of formalization of lessons learned regarding the impacts of previous programs and projects. Beyond the challenges of generating the proper information on these impacts, there are other difficulties that relate with how to socialize the information and knowledge gained so that change is transformational and enduring. The main complexities lie in understanding the interactions of social-ecological systems at different scales and how they varied through time in response to policy and other processes. This volume is part of a broad research effort to develop an independent evaluation of certification impacts with stakeholder input, which focuses on FSC certification of natural tropical forests. More specifically, the evaluation program aims at building the evidence base of the empirical biophysical, social, economic, and policy effects that FSC certification of natural forest has had in Brazil as well as in other tropical countries. The contents of this volume highlight the opportunities and constraints that those responsible for managing natural forests for timber production have experienced in their efforts to improve their practices in Brazil. As such, the goal of the studies in this volume is to serve as the foundation to design an impact evaluation framework of the impacts of FSC certification of natural forests in a participatory manner with interested parties, from institutions and organizations, to communities and individuals.

Water and light have seduced artists through the years and the quality of these elements at the New Jersey Shore continues to attract artists to this day. Between the late 1800s and 1940, an inspired group of painters were drawn to the New Jersey coastline, forming communities of artists. Jersey Shore Impressionists breaks new ground in the history of American art by recognizing the distinct influence of New Jersey and its Shore on impressionist era American painters. This book establishes – for the first time – a category of impressionist American painters who focused on, or were profoundly influenced by, the landscapes and seascapes of this Shore – from Sandy Hook and Highlands to the Barnegat Bay region to Cape May. “Not since 1964, nearly 50 years ago, and only once before that in 1938 has there been published a book on painters in New Jersey,” says the book's author, Roy Pedersen. “Never until now has there appeared a survey of the regional impressionist painters of New Jersey. This book and the accompanying exhibition for the first time celebrate these unrecognized works into the history of New Jersey and American art.” Jersey Shore Impressionists is produced in conjunction with a 2013 exhibition at the Morven Museum & Garden in Princeton, NJ. The exhibition, titled “Coastal Impressions: Painters of the Jersey Shore, 1880-1940” seeks to examine how the New Jersey shore was home to artist colonies whose output rivaled that of the better-known colonies of Old Lyme and Cos Cob, Connecticut, and Bucks County, Pennsylvania. In a Foreword, Richard J. Boyle, former director of the Pennsylvania Academy of the Fine Arts, describes the foundation of art colonies, and how they traveled from origins in mid-nineteenth century France to the plein-air attraction of the Jersey Shore's “special light.” The first art colony – at Manasquan – forms around 1880 as young artists fresh from European training in Germany, France and Italy begin to arrive, and the book includes work from these artists – Will Hicok Low, Theodore Robinson, Albert Grantley Reinhart, Charles Freeman and Caroline Coventry Haynes. The next generation – Edward Boulton, Ida Wells Stroud, Julius Golz – trained in America, join and form new colonies to paint the unique light as well as the activities of the Shore. The passionate work created by these artists stands as an important, but unsung, chapter of American Impressionism and is celebrated in this book, establishing the important contribution to American art in general, and New Jersey's cultural heritage in particular.
