Statistics are just as vital to understanding political science as the study of institutions, but getting students to understand them when teaching a methods course can be a big challenge. Statistics for Political Analysis makes understanding the numbers easy. The only introduction to statistics book written specifically for political science undergraduates, this book explains each statistical concept in plain language—from basic univariate statistics and the basic measures of association to bivariate and multivariate regression—and uses real world political examples. Students

learn the relevance of statistics to political science, how to understand and calculate statistics mathematically, and how to obtain them using SPSS. All calculations are modeled step-by-step, giving students needed practice to master the process without making it intimidating. Each chapter concludes with exercises that get students actively applying the steps and building their professional skills through data calculation, analysis, and memo writing.

A Report

This seventh and final volume of The Papers of George Catlett Marshall covers the last ten years of Marshall's life, when he served as secretary of defense from September 1950 to September 1951 following a year as American Red Cross president. Dramatic swings in fortune for US and UN forces in Korea consumed him as defense secretary, yet Europe remained Marshall's strategic focus and with it the establishment of a NATO military command, efforts to

convince the French to accept German rearmament, congressional approval for a major US military buildup, and a Mutual Security Program for America's allies. Marshall also participated in the decision to relieve General Douglas MacArthur, sparking public uproar and a Senate investigation. Marshall remained active and honored in retirement, particularly in 1953, when he led the US delegation to the coronation of Queen Elizabeth II and then became the

first professional soldier to win the Nobel Peace Prize, a tribute to the Marshall Plan. Through it all, he maintained an extensive correspondence with national and international leaders. When he died on October 16, 1959, George Catlett Marshall was hailed by many as the nation's greatest soldier-statesman since George Washington.
