Innovation. The word might make you think of Silicon Valley. But innovation isn't the sole province of start-ups. They didn't invent it, and they're not always the ones from which we can best learn. As Matt Kingdon argues in The Science of Serendipity, it's corporate innovators battling within large, established organisations who are the field's real heroes. Tapping into 20 years of experience on the front lines of innovation-bringing new products and services to market and helping organisations become more creative—Kingdon dissects the ways in which corporations are continually reborn. He looks at the anatomy of innovation, asking: How do time-pressed executives go about taking risks? How do they prepare to see—and seize—opportunity? And how do you place humans, with all of their fears and foibles, at the heart of commercial success? In a conversational, jargon-free style built on a practitioner's observations and anecdotes, The Science of Serendipity traces the dilemmas that executives in a wide variety of firms face. It details the steps taken to overcome the issues and get great ideas across the finish line. If you're looking for a guide in your fight against the corporate machine, this is the business book for you. Matt Kingdon is the Co-founder, Chairman, and Chief Enthusiast of What If! Innovation Partners. For 20 years, What If! has partnered with the world's most successful, forward-looking companies—businesses such as Barclays, Four Seasons, Google, PepsiCo, Pfizer, and Virgin—to galvanise innovation and deliver impact. Its 250 inventors work across the Americas, Europe, and Asia.

'This book provides an extremely well written and informative introduction to the subject of media economics, characterized by clarity in the explanation of concepts or frameworks and by a balanced discussion for the respective positions in areas of debate' - Paul MacDonald, Roehampton Institute Understanding Media Economics provides a clear, precise introduction to the key economic concepts and issues affecting the media. The book: explains the fundamental concepts relevant to the study of media economics; considers the key industrial questions facing the media industries today; relates economic theory to business practice; covers a wide range of media activity - advertising, television, film, print media, and new media; and looks at the impact of economics on public policy. Understanding Media Economics offers a stimulating perspective on the contemporary media environment. This book will be an essential purchase for all students of the media and mass communication. "Written in a clear and accessible style that would suit the needs of journalists and scholars alike, this encyclopedia is highly recommended for large news organizations and all schools of journalism."--Starred Review, Library Journal Journalism permeates our lives and shapes our thoughts in ways we've long taken for granted. Whether we listen to National Public Radio in the morning, view the lead story on the Today show, read the morning newspaper headlines, stay up-to-the-minute with Internet news, browse grocery store tabloids, receive Time magazine in our mailbox, or watch the nightly. Text and Cases Advertising Rates, Circulation, Subscription Price, Etc The Praeger Handbook of Media Literacy [2 volumes] How to Create Effective Advertising Fundamentals and Techniques

Drawing on the twelve core disciplines of business, including business law, economics, marketing and finance, this third edition of the hugely successful The 30 Day MBA shows you to use key business concepts and tools to assess business decisions and implement strategy. Now with a new concept for each chapter - including crowdfunding, digital marketing, business incubators and the 80/20 principle - it also provides coverage of the key optional modules: Mergers and Acquisitions and International Business. New case studies include Volkswagen Group China, Google in China, IKEA, Meraki, Ocado, Ford, IBM and McDonalds among others. Including a range of free online resources that enable you to revise and test your knowledge, this bestselling classroom-free guide is brimming with models, international case studies and practical applications of key theories, placing MBA skills within reach of all professionals and students.

A survey of the role and the future prospects of the local press in the 1990s. The authors also take into account the radical changes the local press have been through with new technology and the proliferation of free newspapers. The business of journalism is in the midst of massive change. Managing Today's News Media: Audience First offers practical solutions on how to cope with and adapt to the evolving media landscape. News media experts Samir Husni, Debora Halpern Wenger, and Hank Price introduce a forward-looking framework for understanding why change is occurring and what it means to the business of journalism. Central to this new paradigm is a focus on the audience. The authors introduce "The 4Cs Strategy" to describe how customers, control, choice, and change are all part of a strategy for successful media organizations. Real-world case studies, important theoretical grounding, and a focus on understanding rather than resisting the customer's desire for choice and control make this an unbeatable resource for students and managers alike who want to succeed in this changed media business landscape. Hearings Before the Subcommittees [i.e. Subcommittee] on Bicentennial Affairs, the Environment, and the International Community of the Committee on the District of Columbia, House of Representatives, Ninety-fourth Congress ...

This book covers three principal subject areas: smart cities, general contractors and business models. The smart city concept is currently on the rise and cities around the world appear to be in a race to become smart, fast. Converting big cities into smart cities is a move that almost all cities around the globe have made, or will undoubtedly make in the near future, to be able to cope with the various repercussions of urbanization. Smartness is a vague term that could relate to anything and everything, such as infrastructure, people or governance. In this book, we focus our attention on smart buildings - large ones, in particular - and attempt to identify the key problems that France-based construction companies face today, in order to suggest plausible solutions. Our research findings show that no single business model can fit all smart cities worldwide. Using the general contractor business model for smart cities, this book proposes an original solution to managing smart city projects, bringing together architecture, construction and strategy.

A study of the way a key group of reporters and their news organizations cover a political campaign in Philadelphia. Three methods were used: participant-observation, content analysis, and interviewing. The ultimate intention was not simply to measure and analyze the news coverage of one particular race but to shed light on the underlying processes and organizational structures that influence news coverage of local elections.

'This highly original book focuses on human resource management issues in the context of entrepreneurial and small firms, including original theoretical and empirical chapters. . . the book offers a unique insight into understanding the role of HRM in developing sustainable entrepreneurship and entrepreneurial ventures as well as how HRM practices and procedures can be used to help navigate, or indeed drive, the changing landscape in smaller and entrepreneurial firms. It is a useful resource for many small firms, entrepreneurship and economic development researchers, and also for policy-makers and post-graduate students interested in these areas. It provides a starting point to consider a variety of issues with regard to HRM and, in this regard it is an interesting and useful Handbook.' - Qihai Huang, International Journal of Entrepreneurial Behaviour & Research This invaluable reference tool has been designed in response to the growing recognition that too little is known about the intersection between entrepreneurship and human resource management. Paying particular attention to the 'people' side of venture emergence and development, it offers unique insights into the role that human resource management (HRM) plays in small and entrepreneurial firms. A group of international scholars contribute theoretical and empirical chapters on specific HRM issues in the context of entrepreneurial and smaller firms. The Handbook offers a new understanding of the role of HRM in developing sustainable entrepreneurship and describes how HRM practices and procedures can be used to help navigate and, indeed, drive the changing landscape in these firms. Exploring the functional aspects and nature of managing HRM in new, small, growing, emerging and entrepreneurial firms, this fascinating Handbook will not only be warmly welcomed by HRM students, researchers and academics, but also by HR practitioners and managers.

The Media and the Mayor's Race

Advertising, once seen as 'the official art of capitalist society' is an increasingly commonplace component of a characteristically promotional culture. Iain MacRury's Advertising offers the means to explore and evaluate this transition with an introduction to advertising for the contemporary reader. Advertising provides a clear and easy guide to a changing cultural and commercial genre. It explores how advertising can be studied as a cultural industry, and as a sign system, and how adverts and the reception of adverts can be considered drawing on approaches from literary criticism, structuralism, post-structuralism, psychoanalysis and ethnography. Written in an accessible and interesting style, Advertising is the ideal introductory book for students of media, communication and journalism.

Why there is no such thing as a free audience in today's attention economy The internet was supposed to fragment audiences and make media monopolies impossible. Instead, behemoths like Google and Facebook now dominate the time we spend online—and grab all the profits. This provocative and timely book sheds light on the stunning rise of the digital giants and the online struggles of nearly everyone else, and reveals what small players can do to survive in a game that is rigged against them. Challenging some of the most enduring myths of digital life, Matthew Hindman explains why net neutrality alone is no guarantee of an open internet, and demonstrates what it really takes to grow a digital audience in today's competitive online economy.

Media ownership and concentration has major implications for politics, business, culture, regulation, and innovation. It is also a highly contentious subject of public debate in many countries around the world. In Italy, Silvio Berlusconi's companies have dominated Italian politics. Televisa has been accused of taking cash for positive coverage of politicians in Mexico. Even in tiny Iceland, the regulation of media concentration led to that country's first and only public referendum. Who Owns the World's Media? moves beyond the rhetoric of free media and free markets to provide a dispassionate and data-driven analysis of global media ownership trends and their drivers. Based on an extensive data collection effort from scholars around the world, the book covers thirteen media industries, including television, newspapers, book publishing, film, search engines, ISPs, wireless telecommunication and others, across a ten to twenty-five year period in thirty countries. In many countries—like Egypt, China, or Russia—little to no data exists and the publication of these chapters will become authoritative resources on the subject in those regions. After examining each country, Noam and his collaborators offer comparisons and analysis across industries, regions, and development levels. They also calculate overall national concentration trends beyond specific media industries, the market share of individual companies in the overall national media sector, and the size and trends of transnational companies in overall global media. This definitive global study of the extent and impact of media concentration will be an invaluable resource for communications, public policy, law, and business scholars in doing research and also for media, telecom, and IT companies and financial institutions in the private sector.

When it comes to attracting consumers through advertising, which words, phrases, and techniques are most effective? Strategic Copywriting, a detailed how-to guide, introduces students to time-tested strategies for writing and designing successful ads. In this second edition, Edd Applegate explains the core principles that have guided advertising for decades, from knowing the audience to crafting a compelling message. Next, proven techniques for producing specific kinds of advertising—whether for newspapers, magazines, or other print media, for broadcast radio or television, or for social media and online/mobile platforms—are addressed in step-by-step detail. Throughout, Applegate walks readers through real advertisements from advertising agencies of all sizes across the United States to illustrate what works—or not—and why.

From a modern perspective, journalism is highly relevant to modern society, along with the emergence of mass printing system and professionalisation. This book, however, expands the meaning of journalism and views it as a social process. It will not only explore the roots and development of Chinese journalism and communication, but also demonstrate how Chinese journalism and communication interact and struggle with social culture and politics. Arranged in chronological order mainly, this book examines the initial development of Chinese journalism in ancient times in chapter 1, which from then manifested strong political attributes. After the Opium War in 1840, missionaries and businessmen from the West started to set up newspapers and periodicals in China, which brought about the birth of China's modern journalism industry. Then China's private newspapers and political party's press are studied, which are closely linked with political revolutions and have a far-reaching impact on modern Chinese society. What happened to Chinese journalism and communication after the founding of People's Republic of China in 1949? This book reviews the newspaper reforms, and studies the great negative impacts brought by "Cultural Revolution". Noteworthy news phenomena after the reform and opening-up are also covered. This book will appeal to scholars and students in journalism, communication and Chinese studies. Readers interested in Chinese society and modern Chinese history will also be attracted by it.

This press guide aims to provide a comprehensive, accurate and informative guide to the UK press, both print and broadcast and to give details about the leading newspapers and periodicals in the United Kingdom.

The 30 Day MBA in Marketing provides a complete marketing 'course' spanning twelve disciplinary areas, and including such hot topics as Buyer behaviour, Marketing strategy, Promotion and advertising, Pricing, Managing the marketing organization and Marketing and the law. Each chapter includes at least one practical real life example to illustrate how marketing concepts apply to business decision making. Learn what they teach you on professional marketing courses and at the world's top Business Schools and why it matters to you; eliminate gaps in your marketing knowledge and take part in business decision making on an equal footing with MBA graduates or your company marketing director. This book includes detailed information on how to find and analyse market data on any business or market anywhere and online appendices that provide an invaluable guide to finding further information and free resources on each topic covered.

A strong business model is the bedrock to business success. But all too often we fail to adapt, clinging to outdated models that are no longer delivering the results we need. The brains behind The Business Model Navigator have discovered that just 55 business models are responsible for 90% of the world's most successful businesses. These 55 models - from the Add-On model used by Ryanair to the Subscription model used by Spotify - provide the blueprints you need to revolutionise your business and drive powerful change. As well as providing a practical framework for adapting and innovating your business model, this book also includes each of the 55 models in a quick-read format that covers: What it is Who invented it and who uses it now When and how to apply it "An excellent toolkit for developing your business model." Surviving in the Newspaper Business

Willing's Press Guide and Advertisers' Directory and Handbook

Newspaper Management in Turbulent Times

Managing Today's News Media

Explains the principles and practice of implementing an effective marketing strategy using a variety of channels and techniques.

This groundbreaking two-volume set provides readers with the information they need to grasp new developments in the swiftly evolving field of media literacy.

Willis' almost total textbook analysis of today's newspaper makes Surviving in the Newspaper Business precisely what it claims to be: A how-to guide to newspaper management in the 1980s and beyond . . . a set of unified principles for successful management.' It explains the supervision and organization of each department and stresses the importance of keeping the paper responsive to the needs of its readers, advertisers and, somewhat surprisingly, even its employees. Willis talks about advertising, circulation and marketing strategies and how to deal with competition from TV, the suburban weeklies and labor unions. He looks at the editor as a people manager, 'something that more than one tradition-bound editor has been unable to do for himself. The book has sample budgets and organizational charts and even a discussion of the relative merits of adult vs. youth carriers. Newspaper Research Journal Professor Jim Willis' book is a nicely condensed overview of the newspaper as a business. Though it is aimed at journalism students enrolled in newspaper management classes, it is also worthwhile reading for the curious reporter or copy editor who knows little about how newspapers make and spend money. . . . The book is sprinkled with good, common sense about balancing newspapers as a business against newspapering as good journalism. Professor Willis makes a gallant attempt to make sure students understand that though the newspaper must make a profit to survive, it will never truly excel unless it produces a good news-editorial product. ASNE Bulletin Surviving in the Newspaper Business is a how-to-do-it guide to newspaper management for the 1980s and beyond. It presents a set of unified principles for successful management and exposes the student to the primary mission of the newspaper: to deliver a quality product to the depth and breadth of the marketplace. Stressing the importance of the total newspaper concept, Willis portrays the successful newspaper as integrated internally among departments and externally with its readership and advertisers. In addition, he analyzes the newspaper's industrial environment, discusses management survival strategies, considers business and finance plans, and assesses organizational behavior in the newsroom. Included are a series of hands-on case studies offering further insights into topics discussed.

The Internet Trap

This is a basic text in International Marketing, a major knowledge area for students of management studies. This book attempts to make learning of the nuances of the subject easy and enjoyable for students. International trade, economic free trade zones, embargoes on exports, and tariff and non-tariff barriers that the companies face overseas form a major part of the book. In addition, the role of international organizations under the guidance of the United Nations has been given its due importance.

Journalism permeates our lives and shapes our thoughts in ways that we have long taken for granted. Whether it is National Public Radio in the morning or the lead story on the Today show, the morning newspaper headlines, up-to-the-minute Internet news, grocery store tabloids, Time magazine in our mailbox, or the nightly news on television, journalism pervades our lives. The Encyclopedia of Journalism covers all significant dimensions of journalism, such as print, broadcast, and Internet journalism; U.S. and international perspectives; and history, technology, legal issues and court cases, ownership, and economics. The encyclopedia will consist of approximately 500 signed entries from scholars, experts, and journalists, under the direction of lead editor Gregory Borchard of University of Nevada, Las Vegas.
