contributions made by geographers in recent years to our understanding of the day-to-day experiences of American minorities and the historical and current processes that account for living spaces, persistent patterns of segregation and group inequalities, and the complex geographies that continue to evolve at local and regional levels across the country. One of the book's underlying themes is the dynamic and complex nature of U.S. multiculturalism and the academic difficulty in evaluating it from a single viewpoint or theoretical stance. As such, *Multicultural Geographies* is derived from the joint efforts of selected scholars to bring together diverse perspectives and approaches in documenting the experiences of American minorities and the issues that affect them.

orchestrated to replace his or her predecessor through an opaque process and for reasons not normally made public. The professional trajectories of Chinese regional leaders are mysterious in many ways. Their promotions and demotions can be "predictable" in terms of their age, gender, nationality, education, factions, and previous engagements in the political system. Yet, speaking of their capability, performance, opportunities and arrangements, their future can also be "unexpected". Such arrangements are always originated from the Organization (zuzhi) which represents the Chinese Communist Party. What are the factors the organization considers in order to make its final decisions on nominating and appointing a regional leader? Today 's regional leaders of China will very likely become the central leaders of China in the future. By making an empirical analysis of Chinese regional leaders '
