Windows Server 2003 certification line. Exams will likely go live the

following August and September. This launch is a comprehensive

revamping of the MCSE (Microsoft Certified System Engineer) track with

all new core exams and all new electives. In addition, the MCSA

(Microsoft Certified System Administrator) certification will expand

its program to include an additional upgrade exam for MCSAs wanting to

become MCSEs. The launch of this new certification track means that

all current MCSEs, representing an installed base of approximately

200,000 (source: MCP Magazine) will need to recertify under Windows

Server 2003. In addition, any MCP looking to become an MCSE--estimates

are about 1.2 million (source: MCP Magazine)--will also have to

continue their certifications under the new program. Many industry

experts expect the Windows 2003 certification, and product line as

well, to be a more popular track since many organizations are still using NT and plan to skip 2000 and go directly to 2003. * DVD Provides a "Virtual Classroom": Get the benefits of instructor led training at a fraction of the cost and hassle. * Guaranteed Coverage of All Exam Objectives: If the topic is listed in Microsoft's Exam 70-290 objectives, it is covered here. * Fully Integrated Learning: This system includes a study guide, DVD training and Web-based practice exams.
