Beyond Our Solar System

Yellow Pages to the World of Microcomputers

This book presents a program of basic studies dealing with the anatomy and physiology of the human body. Each body system is detailed and major organs and their functions are described. Each of the twelve teaching units in this book is introduced by a color transparency (print books) or PowerPoint slide (eBooks) that emphasizes the basic concept of the unit and presents questions for discussion. Reproducible student pages provide reinforcement and follow-up activities. The teaching guide offers descriptions of the basic concepts to be presented, background information, suggestions for enrichment activities, and a complete answer key.

Motivate Your Students! This easy-to-use workbook is chock full of stimulating activities that will jumpstart your students' interest in algebra while reinforcing the major algebra concepts. A variety of puzzles, mazes, and games will challenge students to think creatively as they sharpen their algebra skills. A special assessment section is also included to help prepare students for standardized tests.

The curriculum-oriented worksheets in this packet were developed by leading science educator and former president of the National Science Teachers Association, Ed Ortleb. As students color, answer questions, create cloud poems, and complete the other activities, they will learn and reinforce their knowledge about Earth's life support systems from the atmosphere and air to gravity. Extension activities and background information are also included in teacher guide section.
