"First Published in 2005, Routledge is an imprint of Taylor & Francis, an informa company."

Bookwise is a carefully graded reading scheme organized into five cross-curricular strands, encouraging links to other subjects. Comprising 16 fiction and ten non-fiction titles, the 25 books at each level span a two-year reading age and the three-tier levelling system within each level facilitates an accurate match of reading ability and text. The full-colour readers are accompanied by teacher's guides and resource sheets to help teachers get the most out of their guided reading and writing sessions.

Life doesn't look like it's supposed to for Dani Ruiz, a hopeless romantic. After a painful and sudden break-up with Rick Marin, Dani hides away from reality, retreating to a world of fiction where she prefers book boyfriends over the hassles of a relationship. Almost two years later, Dani's friends are tired of watching her in a holding pattern, so they stage an intervention, forcing her back into the real world of dating.

Unexpectedly, Dani meets Liam Lucas, a down-to-earth firefighter. He might be the person to show her she's still worth something. Dani's hesitant to trust her heart with another man, but their instant and electric chemistry is something she can't deny. As Dani starts to believe that she's found her real-life book boyfriend, Rick decides that he'll go to any lengths to get her back. Seeing Rick as a changed man makes Dani question everything. Can Dani trust her patched-up heart with Liam? Or has Rick transformed into the man she's always wanted? Written from various points of views, The Do Over is a story of second chances and new beginnings.

A proposed railway on the 5th European Railway Corridor (Venice-Kiev) between the northern Adriatic ports of Koper (Slovenia) and Trieste (Italy) and the interior of Slovenia required extensive karstological studies and planning. This book contains the knowledge gained from these studies as well as further information on the regional karst surface and underground, the karst hydrogeology and the specific caves of the Beka-Ocizla cave system.

Ripper A Novel HarperCollins

Offers fresh ways of approaching photography, showing how photographs circulate in an 'image world' that exists beyond their art and media origins. This book argues that these images permeate people's minds as much as the environment and that photography has affected our sense of time and its relationship to memory.

The aim of the series is to bring together important recent writing in major areas of philosophical inquiry, selected from a variety of sources, mostly periodicals, which may not be conveniently available to the university student or the general reader. The editors of each volume contribute an introductory essay on the items chosen and on the questions with which they deal. A selective bibliography is appended as a guide to further reading. This volume is designed to set out some of the central issues in the theory of truth. It begins with writings by F. H. Bradley, William James, Gottlob Frege, and Bertrand Russell, and continues with the classical discussions from the middle of the century (including Wittgenstein, Quine, and Austin), ending with a selection of contemporary contributions, including essays from Donald Davidson and Richard Rorty. The collection draws together, for the first time, the debates between philosophers who favour 'robust' or 'substantive' theories of truth, and those other, 'deflationist' or minimalists, who deny that such theories can be given. The editors provide a substantial introduction, in which they map out this terrain and locate writers from Frege to Wittgenstein and Davidson within it. They also describe how these debates relate to more technical issues, such as work on the Liar paradox and formal truth theories.

This is the first multi-volume collection of major writings on cultural anthropology, the sub-field of anthropology which is concerned with how people in different places live and understand the world around them. It covers key methodologies (participant observation, ethnography) and topics (kinship, ritual, values) and maps the development of the field from its beginnings in the mid-nineteenth century through to recent and current debates on the 'critique of anthropology' and the rise of new methodologies such as multi-sited research. The four volumes are arranged thematically and each is separately introduced. Drawing upon essays from anthropology and related disciplines, the volumes together chart the origins of the field, explore its core theories and methods, and trace the proliferation of sub-fields that it has generated, including anthropology of art, urban anthropology, medical anthropology and the anthropology of gender and sexuality. With key texts from James George Frazer, Lewis Henry Morgan, Bronislaw Malinowski, Franz Boas, Ruth Benedict, Margaret Mead, Lucy Mair, Claude Levi Strauss, Melford Spiro, Marshall Sahlins, Laura Nader, Maurice Godelier, David Graeber, Suad Joseph and many more, this set is an essential resource for scholars and students of the subject.

Can Captain Wyvern keep his new marriage of convenience all business--or will it turn into something more? Captain Charles Wyvern owes a great debt to the man who saved his

life--especially since Major Richardson lost his own life in the process. The best way to honor that hero's dying wish is for Wyvern to escort the man's grieving fiancée and mother safely to a new cottage home by the sea. But along the way, he learns of another obligation that has fallen on his shoulders: his uncle has died and the captain is now the Earl of Rothwell. When he and the ladies arrive at his new manor house in Devon, they discover an estate in need of a leader and a gaggle of girls, all wards of the former earl. War the new earl knows; young ladies and properties he does not. Still wishing to provide for the bereaved Lady Sophia Haverly, Charles proposes a marriage of convenience. Sophie is surprised to find she isn't opposed to the idea. It will help her care for her betrothed's elderly mother, and she's already fallen in love with the wayward girls on the Rothwell estate. This alliance is a chance to repay the captain who has done so much for her care, as well as divert her attention from her grief. When Wyvern returns to his sea commission, she'll stay behind to oversee his property and wards. It sounds so simple. Until the stalwart captain is arrested on suspicion of smuggling, and Sophie realizes how much he's come to mean to her. Now she'll have to learn to fight, not only for his freedom but also for his love.

An intelligence officer fights to save his sister from the mob in this thriller from the New York Times–bestselling author of The Midnight Bell. Oliver Grant is an American intelligence officer, a hero of the Vietnam War. But when the Mafia kidnaps his sister, his life is turned upside down and he agrees to complete a dangerous assignment for the powerful mob boss Dimitri Stavrou in order to gain her freedom: Grant must save Stavrou's son from a secret cliff-top prison in Libya. To accomplish this mission, he must scale the rocky crag and somehow get Stavrou's son out alive. His sister's life—and his own—hang in the balance in a nerve-racking tale of action and suspense from the author Tom Clancy called "the master," with more than a quarter of a billion copies of his thrillers sold around the world.

No matter where we live or what language we speak, food is an essential factor that shapes the way we think, feel, act, and respond to one another. In this milestone book, Michio Kushi presents his vision for building world peace through a sane way of eating. As the leader of the modern-day international macrobiotic movement, Michio has taught, lectured, written, and worked steadily to achieve his view of the future a world in which all people can live in harmony with nature and with one another. In 1987, he launched his One Peaceful World society, a worldwide educational organization devoted to bringing about world peace through a new awareness of the links between food and the emotions, natural law, history, and international order. This book lays the foundation for One Peaceful World. It includes case studies throughout history in which macrobiotic diets relieved conflict and sickness. It traces the rise of the organic and natural foods industry, to which Kushi has been a notable contributor. It offers menus and recipes, reference sources, and a wealth of information that point the way to a new approach to diet and thought. And it recommends additional actions that we can take to bring unity to the world. The book is divided into four parts. In Part 1, Kushi details his early life in Japan during World War II, and his journey to macrobiotics under the guidance of George Ohsawa. Part 2 delves into the cosmological and universal concepts behind macrobiotics, including the importance of yin and yang. In Part 3, Kushi discusses the values that are essential to creating One Peaceful World in modern times. And in Part 4, the author looks forward to a new world government. One Peaceful World is an important and fascinating book for anyone committed to good health, whole foods, and world peace. "
Having lost the Civil War in Spain, four republican rebels lead a fugitive existence deep in the Cantabrian mountains. Wounded and hungry the rebels are frequently drawn from the safety of the mountains into the villages they once inhabited, risking their lives and the lives of anyone helping them. Faced with the lonely mountains, its harsh winters and unforgiving summers, it is only a matter of time before the Fascists hunt them down. Llamazares's lyrical prose serves to animate the wilderness, making the landscape as much a witness to the brutality of the Franco regime as the persecuted villagers and republicans.

Co-written by Joseph Stiglitz, winner of the Nobel Prize for his research on imperfect markets, and Carl E. Walsh, one of the leading monetary economists in the field, Economics is the most modern and accurate text available.

From the NEW YORK TIMES Bestselling author, a gripping murder mystery about a serial killer on the loose in San Francisco. Indiana Jackson is 33 years old and works in an alternative medicine clinic in San Francisco that attracts all sorts of characters, some of them skeptics, who fall for her candor and humility. Her teenage daughter, Amanda likes noir literature and hopes to attend MIT, where she will be with Bradley, an old friend that she plans to marry, with or without his consent. In her free time, she plays Ripper, an online role playing game that involves solving real-life mysteries and crimes using information collected by Amanda's father, the Chief Inspector of the San Francisco police. Amanda plays the game via Skype with adolescents from all over the world and with her best friend, her grandfather Blake. Each player in the game has a virtual personality: Amanda is the game master, and Blake is her henchman; the others are Sherlock Holmes, Colonel Paddington, Esmeralda, and the psychic Abatha. When Ripper's latest murder mystery-"the case of the misplaced bat"-begins to touch their real-world lives, Amanda and her friends know they must solve the case and find the murderer before he can strike again. RIPPER is a true thriller, with the twists, surprises, well-placed clues, and revelations that lead to a climatic finale. A rich and generous novel, filled with humor but increasingly dark, it's a fast-paced read that grabs you right from the start and keeps you glued to the page.

Jimmy was only nine years old when he was molested and sexually assaulted in London's dingy East End. He struggled to keep his dark secret, while coping with being adopted and his illiterate father's violent outbursts. Desperately needing to be loved, Jimmy accepts an offer of 'conditional kindness' from Tom, his scoutmaster. Now, after a lifetime of secrets, his story can be told as Tom is now dead, so.... The controversial New York City police commissioner and New York Times bestselling author of *The Lost Son* shares the story of his fall from grace and the effects of his incarceration on his views of the American justice system. Bernard Kerik was New York City's police commissioner during the 9/11 attacks, and became an American hero as he led the NYPD through rescue and recovery efforts of the World Trade Center. His résumé as a public servant is long and storied, and includes receiving a Medal of Honor. In 2004, Kerik was nominated by George W. Bush to head the Department of Homeland Security. Now, he is a former Federal Prison Inmate known as #84888-054. Convicted of tax fraud and false statements in 2007, Kerik was sentenced to four years in federal prison. Now, for the first time, he talks candidly about what it was like on the inside: the torture of solitary confinement, the abuse of power, the mental and physical torment of being locked up in a cage, the powerlessness. With newfound perspective, Kerik makes a plea for change and illuminates why our punishment system doesn't always fit the crime. In this extraordinary memoir, Kerik reveals his unprecedented view of the American penal system from both sides: as the jailer and the jailed. With astonishing candor, bravery, and insider's intelligence, Bernard Kerik shares his fall from grace to incarceration, and turns it into a genuine and uniquely insightful argument for criminal justice reform.

This chapter-by-chapter learning aid systematically and effectively helps students study college accounting and get the maximum benefit from their study time. Each chapter provides a Summary Practice Test with fill-in-the-blanks, multiple choice, and true/false problems AND solutions to all the questions, and the Working Papers Working Papers contain tailor-made spreadsheets to all end-of-chapter problems.

With the publication in 1859 of *On the Origin of Species by Means of Natural Selection*, Charles Darwin established evolution by common descent as the dominant scientific explanation for nature's diversity. This was to be his gift to science and society; at last, we had an explanation for how life came to be on Earth. Scientists agree that the evolutionary origin of animals and plants is a scientific conclusion beyond reasonable doubt. They place it beside such established concepts as the roundness of the earth, its revolution around the sun, and the molecular composition of matter. That evolution has occurred, in other words, is a fact. Yet as we approach the bicentennial celebration of Darwin's birth, the world finds itself divided over the truth of evolutionary theory. Consistently endorsed as "good science" by experts and overwhelmingly accepted as fact by the scientific community, it is not always accepted by the public, and our schools continue to be battlegrounds for this conflict. From the Tennessee trial of a biology teacher who dared to teach Darwin's theory to his students in 1925 to Tammy Kitzmiller's 2005 battle to keep intelligent design out of the Dover district schools in Pennsylvania, it's clear that we need to cut through the propaganda to quell the cacophony of raging debate. With the publication of *Darwin's Gift*, a voice at once fresh and familiar brings a rational, measured perspective to the science of evolution. An acclaimed evolutionary biologist with a background in theology, Francisco Ayala offers clear explanations of the science, reviews the history that led us to ratify Darwin's theories, and ultimately provides a clear path for a confused and conflicted public.

The Do Over

Algorithms and Data Structures in C++

There was nothing simple about what Brody Carter needed to do... With any other woman, it would be. But not with Michaela Doucet. He barely knew the provocative beauty and already her face haunted his

dreams. Yet he could not let that affect him.

Algorithms and Data Structures in C++ introduces modern issues in the theory of algorithms, emphasizing complexity, graphs, parallel processing, and visualization. To accomplish this, the book uses an appropriate subset of frequently utilized and representative algorithms and applications in order to demonstrate the unique and modern aspects of the C++ programming language. What makes this book so valuable is that many complete C++ programs have been compiled and executed on multiple platforms. Each program presented is a stand-alone functional program. A number of applications that exercise significant features of C++, including templates and polymorphisms, is included. The book is a perfect text for computer science and engineering students in traditional algorithms or data structures courses. It will also benefit professionals in all fields of computer science and engineering.

The olive (*Olea europaea*) is increasingly recognized as a crop of great economic and health importance world-wide. Olive growing in Italy is very important, but there is still a high degree of confusion regarding the genetic identity of cultivars. This book is a source of recently accumulated information on olive trees and on olive oil industry. The objective of this book is to provide knowledge which is appropriate for students, scientists, both experienced and inexperienced horticulturists and, in general, for anyone wishing to acquire knowledge and experience of olive cultivation to increase productivity and improve product quality. The book is divided into two parts: I) the olive cultivation, table olive and olive oil industry in Italy and II) Italian catalogue of olive varieties. All chapters have been written by renowned professionals working on olive cultivation, table olives and olive oil production and related disciplines. Part I covers all aspects of olive fruit production, from site selection, recommended varieties, pest and disease control, to primary and secondary processing. Part II contains the chapter on the description of Italian olive varieties. It is well illustrated and includes 200 elaiographic cards with colour photos, graphs and tables.
