*New York Times bestseller Introduction by New York Times bestselling author and famous minor television personality John Hodgman One of my dad's favorite jokes about getting older was: "I went out for coffee when I was twenty-one and when I got back I was fifty-eight!" I get what he meant now. Time flies. My first book, If Chins Could Kill: Confessions of a "B" Movie Actor, was published back in 2001 and it chronicles the adventures of a "mid-grade, kind of hammy actor" (my words), cutting his teeth on exploitation movies far removed from mainstream Hollywood. This next book, an "Act II" if you will, could be considered my "maturing years" in show business, when I began to say "no" more often and gravitated toward self-generated material. Taking stock in the overall quality of my life, I fled Los Angeles and moved to a remote part of Oregon to renew, regroup and reload. If that sounds tame, the journey from Evil Dead to Spider-Man to Burn Notice was long, with plenty of adventures/mishaps along the way. I never pictured myself hovering above Baghdad in a Blackhawk helicopter, facing a pack of wild dogs in Bulgaria, or playing an aging Elvis Presley with cancer on his penis - how can you predict this stuff? The sheer lunacy of show business is part of the fun for me and I hope you'll come along for the ride. - Bruce "Don't Call Me Ash" Campbell Perfect for readers of Jon Krakauer and Douglas Preston, this "authentic and encyclopedic" book examines real-life cases of those who vanish in the wilderness without a trace (Roman Dial)—and those eccentric, determined characters who try to find them. These are the stories that defy conventional logic. The proverbial vanished without a trace incidences, which happen a lot more (and a lot closer to your backyard) than almost anyone thinks. These are the missing whose situations are the hardest on loved ones left behind. The cases that are an embarrassment for park superintendents, rangers and law enforcement charged with Search & Rescue. The ones that baffle the volunteers who comb the mountains, woods and badlands. The stories that should give you pause every time you venture outdoors. Through Jacob Gray's disappearance in Olympic National Park, and his father Randy Gray who left his life to search for him, we will learn about what happens when someone goes missing. Braided around the core will be the stories of the rangers who fill the vacuum created by a vanished human being. We'll meet eccentric bloodhound-handler Duff and R.C., his flagship purebred, who began trailing with the family dog after his brother vanished in the San Gabriel Mountains. And there's Michael Neiger North America's foremost backcountry Search & Rescue expert and self-described "bushman" obsessed with missing persons. And top researcher of persons missing on public wildlands Ex-San Jose, California detective David Paulides who is also one of the world's foremost Bigfoot researchers. It's a tricky thing to write about missing persons because the story is the absence of someone. A void. The person at the heart of the story is thinner than a smoke ring, invisible as someone else's memory. The bones you dig up are most often metaphorical. While much of the book will embrace memory and faulty memory—history—The Cold Vanish is at its core a story of now and tomorrow. Someone will vanish in the wild tomorrow. These are the people who will go looking.*

Missing 411- Off The Grid Missing 411- Off The Grid is the seventh book in the best selling series about missing people. The books are based on actual law enforcement, search and rescue and archived reports of incidents. The author has based the narrative on delivering the facts and not making unsubstantiated claims. Thousands of case files were reviewed and what's presented are incidents that fit narrow criteria of established profile points. According to the Urban Dictionary Grid means, "untraceable through normal means." The individuals that are documented in this seventh book of the Missing 411 series fit this definition to perfection. The disappearances involve physicists, physicians, professors, hikers, hunters, children, and joggers. Cases from thirty states, six Canadian provinces and five countries are included. Each of these stories is new to the Missing 411 series. Disappearances from national parks, forests and open spaces that have never been discussed or compared to similar instances are included. Updated tables from past books assist the reader in understanding the vast numbers of missing that fit the established profile. Early reviewers of this book have called it the most intriguing and thought-provoking of the series. Author David Paulides is an investigative reporter, twenty-year police officer/detective and the director of the Canam Missing Project (www.canammissing.com), the organization behind the search for understanding the missing person issue. He recently released a movie based on the books, Missing 411, which a former LA Magazine and NBC movie critic rated it the best documentary for 2017. He has presented his findings to the most attended annual search and rescue conference in the world, NASAR and has spoken at hundreds of seminars, symposiums, and meetings. Mr. Paulides has a bachelors and masters degree from the University of San Francisco and currently resides in Denver.Missing 411- Off The GridRelease Date: October 24, 2017PaperbackPages: 401Author: David PaulidesAvailable: www.canammissing.comLanguage: English\*\*Our books are not knowingly sold to resellers and are only distributed through our website for \$24.99 each.

For twelve years, Andrea Lankford lived in the biggest, most impressive national parks in the world, working a job she loved. She chaperoned baby sea turtles on their journey to sea. She pursued bad guys on her galloping patrol horse. She jumped into rescue helicopters bound for the heart of the Grand Canyon. She won arguments with bears. She slept with a few too many rattlesnakes. Hell yeah, it was the best job in the world! Fortunately, Andrea survived it. In this graphic and surprisingly funny account of her and others' extraordinary careers, Lankford unveils a world in which park rangers struggle to maintain their idealism in the face of death, disillusionment, and the loss of a comrade killed while holding that thin green line between protecting the park from the people, the people from the park, and the people from each other. Ranger Confidential is the story behind the scenery of the nation's crown jewels—Yosemite, Grand Canyon, Yellowstone, Great Smokies, Denali. In these iconic landscapes, where nature and humanity constantly collide, scenery can be as cruel as it is redemptive.

A non-fiction book about people who are missing by way of land, air and water.

Our Island Story is the "history" of England up to Queen Victoria's Death. Marshall used these stories to tell her children about their homeland, Great Britain. To add to the excitement, she mixed in a bit of myth as well as a few legends.

(www.canammissing.com)This is the third "Missing 411" book researching facts of people who have vanished in remote locations of the world. "Missing 411-North America and Beyond" is the first edition that discusses missing people and relevant facts from five countries (Australia, England, France, Iceland and Indonesia) outside of North America and examines the parallels between the cases. The book also includes a multitude of new stories from North America.There is a continuing trend of clusters of missing people in United States National Parks. The National Park Service has continued with their policy of failing to keep ledgers, track or otherwise document lists of missing people inside their parks and monuments. This edition has cases from Florida, Texas, Hawaii and forty other states. There are new clusters of missing people from Sequoia and Mount Rainier National Park, Three Sisters Wilderness (OR) and Adirondacks (NY). Canada has missing cases from six provinces that are documented.This new book brings further clarity to the missing person issue by examining multiple disappearances of people in small-confined areas and exposing the similarities of their case. David Paulides also exposes a series of coed disappearances that date back to the early 1900's, which have unusual facts surrounding their case."Missing 411-North America and Beyond" is the largest and most comprehensive of the trilogy, 472 pages. The Missing 411 series builds upon itself. It is recommended that you read "Missing 411-Western United States" first, then the eastern version and then "North America and Beyond." There is a historical aspect to this issue and there are common elements that run through the disappearances. \*\*\*\*\*One of the early reviews of "Missing 411-North America and Beyond" was written by New York Times Best Selling author Whitley Strieber:David Paulides has shined a light onto one of the greatest and most disturbing mysteries of our time: the simple and awful fact that people disappear, especially in our national parks, and little effort is made to find them, let alone inform the public about the danger.Even when massive searches are mounted, and people are found, the events surrounding their loss and recovery are often far beyond logical explanation.This is the most comprehensive and expertly presented series of books on the subject ever written, and the latest volume, which includes stories from five countries, is sobering, chilling and far too well researched to ignore. The Power of the Sea describes our struggle to understand the physics of the sea, so we can use that knowledge to predict when the sea will unleash its fury against us. In a wide-sweeping narrative spanning much of human history, Bruce Parker, former chief scientist of the National Ocean Service, interweaves thrilling and often moving stories of unpredicted natural disaster with an accessible account of scientific discovery. The result is a compelling scientific journey, from ancient man's first crude tide predictions to today's advanced early warning ability based on the Global Ocean Observing System. It is a journey still underway, as we search for ways to predict tsunamis and rogue waves and critical aspects of El Niño and climate change caused by global warming.

*Missing 411- A Sobering Coincidence is the fifth book in the acclaimed series about people who have mysteriously disappeared. The books have been vetted by some of the top journalists in the world with statements such as; "David Paulides has shined a light onto one of the greatest and most disturbing mysteries of our time." Another comment; "The paper trail uncovered by Paulides through sheer doggedness is impressive, the evidence indisputable." Survivorman Les Stroud was interviewed about the series and stated, "Paulides presents pure facts. Facts that can't be disputed."The author continues with his profile points involving the disappearances and applies them to a series of incidents involving young men and women, mostly college age. Many of the victims vanished within the confines of their college or university town. These individuals were brilliant scholars, athletes and stellar people in their community. They disappear under unusual circumstances and are often found in areas that were previously searched. Medical examiners in these cases often cannot determine the cause of death. Many times the victim was recovered in water, yet autopsies show the body was not in the water the entire time the victim was missing. The majority of the families in these cases believe their loved ones were abducted and held, then later dumped in the water. These allegations are generally ignored by authorities until pressured by facts presented through secondary autopsies that families requested and paid for.This is a chilling and shocking series of stories that will cause many parents and young people to rethink their nighttime activities.Readers can follow missing person cases and purchase the books at: www.canammissing.com, \$24.95Overview127 cases62 Different colleges and universities represented.Span of cases, 1928-2015Countries Represented:United States- 25 StatesCanada Alberta British Columbia New Brunswick Ontario QuébecFranceSpainUnited KingdomOther books in the series:Missing 411- Western United StatesMissing 411- Eastern United StatesMissing 411- North America and BeyondMissing 411- The Devil's in the Detail379 PagesAuthor: David PaulidesDate Published: August 29, 2015.*

(www.canammissing.com) People have been disappearing under mysterious circumstances for centuries. During the last 150 years the media has covered many of these cases and has attempted to put a rational spin on a very unusual event.After 3+ years and 7000 hours of intensive research there is a new paradigm being presented on people missing in the wilds of North America. "Missing 411" Identifies 28 clusters of missing people who have vanished in remote areas of the continent. The finding is a troubling fact questioning why and how these people have disappeared. Some of the victims are found and tell a very interesting and mind bending story of their experience, others are never found, a fact that confounds searchers and law enforcement.There are many children that have disappeared under highly unusual circumstances. After weeks of searching and failing to find any evidence of the child being in a remote location, many parents and law enforcement draw the conclusion that the victim was kidnapped, yes, taken by someone lurking in remote areas of our national parks, forests, farms and even ranches.There are two editions of this research, "Missing 411-Eastern United States" and "Missing 411-Western United States." The eastern United States copy has a list of every person who is listed in each book as well as a final conclusion to the investigation. You will be shocked by the lack of interest and documentation that many of our governmental bodies have committed to missing people. Chances are, they will find a way to trivialize or ignore the disturbing evidence accumulated by David Paulides, a former law man turned investigative journalist. The paper trail uncovered by Paulides through sheer doggedness is impressive, the evidence indisputable. People are vanishing without a trace from our national parks and forests, yet government agencies are saying nothing. At a minimum, this story deserves space on the front page of every newspaper in the country, and it warrants a formal high level inquiry by the federal agencies whose files leave little doubt that something very strange is unfolding in our wilderness."George Knapp, Host, Coast to Coast AM From the author of the "breathhtaking, bone-chilling work of psychological suspense" (Cristina Alger, USA TODAY bestselling author) Her One Mistake, comes a riveting new suspense novel about three ambitious women whose lives are turned upside down after a horrifying fire threatens to expose a tangled web of lies. Laura has returned to work at Morris and Wood after her maternity leave, only to discover that the woman she brought in to cover for her isn't going anywhere. Despite her close relationship with the agency's powerful CEO, she feels sidelined—and outmaneuvered—as she struggles to balance the demands of work and motherhood. Mia was only supposed to be a temporary hire at Morris and Wood, but she's managed to make herself indispensable to everyone. Everyone, that is, except Laura. If people only knew why she was so desperate to keep her job, they might not want her to stay. Janie gave up everything to support her husband and the successful agency he runs. But she has her own dark secret to protect...and will go to any lengths to keep it safe. With her signature "chilling, captivating" (Megan Miranda, New York Times bestselling author) prose, Heidi Perks weaves another bone-chilling and unputdownable thriller in the vein of Watching You and The Couple Next Door.

Further research into Middle America bigfoot sightings indicates a strong connection between bigfoot and Native Americans, and witness descriptions show a strong human likeness. The latest research from the author of the groundbreaking The Hoopa Project: Bigfoot Encounters in California named 2008 Bigfoot Book of the Year by Cryptomundo.com. Dave Paulides brings his law-enforcement investigative and analytical skills to an expanded area of research: the counties in Northern California that have reported the greatest numbers of bigfoot occurrences, and beyond to Minnesota and Oklahoma. Gaining access to many people who have never discussed their bigfoot experiences publicly before now, the author obtains intriguing details that broaden our perception of the elusive creature; and his subsequent analysis leads to the discovery of a strong and consistent link between bigfoot and the Native American community. The expert interview and artistic skills of forensic artist Harvey Pratt help to define the creatures described by the witnesses - once again with astonishing and illuminating results. The presentation of startling new forensic evidence indicates that there truly is an as-yet-identified primate living in the wilds of North America, and the author hints at new data on the horizon that will finally provide the tantalizing truth about the existence of bigfoot in North America.

This astounding work brings professional investigative abilities and forensic artistry to the field of Bigfoot studies. This astounding work brings professional investigative abilities and forensic artistry to the field of Bigfoot studies. David Paulides, a former police investigator, has applied his skills to questioning Bigfoot witnesses. The results he has achieved in gaining access to witnesses and getting detailed information from them is both remarkable and intriguing. Furthermore, he commissioned a forensic police artist to meet with witnesses and sketch the creatures they saw. These drawings provide insights into the creature's nature never before realized. The result of this team's work is by far one of the most convincing accounts ever written on Bigfoot. The conclusion reached - that this creature, long revered by the Hoopa people, definitely inhabits the forested regions of Humboldt County in Northern California - is so convincing that those people who doubt Bigfoot's existence will be forced to think again!

A collection of strange and terrifying tales. Childrens takes a deep look at Bigfoot Nation—the seemingly real world of bigfoot around us in the United States and Canada. Whether real or imagined, that bigfoot has made his way into the American psyche cannot be denied. He appears in television commercials, movies, and on roadside billboards. In fact, bigfoot is everywhere, with actors portraying him in variously believable performances and it has become the popular notion that bigfoot is both dangerous and horny. Indeed, bigfoot is out there stalking lover's lanes and is even more lonely than those frightened teenagers that he sometimes interrupts. Bigfoot, tall and strong as he is, makes a poor leading man in the movies with his awkward personality and typically anti-social behavior. He doesn't care a skunk's gland how many movies or commercials are made about him without any royalties whatsoever being paid. To him, Bigfoot Nation is all about style, a lifestyle—shall we say—that keeps bigfoot on the fringes of society, gently creeping into and among the dreams. Join David on a wild ride from the very first bigfoot reports in the 1800s to right now. Chapters include: 1800 to 1899: The Wildmen of the Frontier! The author of the controversial bestseller Brain Trust brings his scientific expertise to the chilling true story of unexplained phenomena on Utah's Skinwalker Ranch -- and challenges us with a new vision of reality. For more than fifty years, the bizarre events at a remote Utah ranch have ranged from the perplexing to the wholly terrifying. Vanishing and mutilated cattle. Unidentified Flying Objects. The appearance of huge, otherworldly creatures. Invisible objects emitting magnetic fields with the power to spark a cattle stampede. Flying orbs of light with dazzling maneuverability and lethal consequences. For one family, life on the Skinwalker Ranch had become a life under siege by an unknown enemy or enemies. Nothing else could explain the horrors that surrounded them -- perhaps except could. Leading a first-class team of research scientists on a disturbing odyssey into the unknown, Coln Kelleher spent hundreds of days and nights on the Skinwalker property and experienced firsthand many of its haunting mysteries. With the only journalist allowed to witness and document the team's work -- Kelleher chronicles in superb detail the spectacular happenings the team observed personally, and the theories of modern physics behind the phenomena. Far from the coldly detached findings one might expect, their conclusions are utterly hair-raising in their implications. Opening a door to the unseen world around us, Hunt for the Skinwalker is a clarion call to expand our vision far beyond what we know.

Hosts of the podcast Stuff They Don't Want You to Know, Ben Bowlin, Matthew Frederick, & Noel Brown discern conspiracy foci from fiction regarding "sniff" the government doesn't want you to know. Conspiracies didn't always seem so clear and present. It used to be that people with tin-foil hats who were convinced of secret messages coming through the radio were easily disregarded as books and looney tunes. But these days, conspiracies feel alive and well. From internet rumors to lying politicians to the tinderbox that is social media, it's become remarkably clear that a vast swath of people believe really bonkers things. Why is that? How did these theories proliferate? Is this a kernel of truth or are they fully-fledged? Ben Bowlin, Matt Frederick, and Noel Brown are the hosts of the popular iHeart podcast that seeks to answer these questions. With cool heads and extensive research, they regularly break down the wildest conspiracy theories: from chemicals and biological testing to the secrets of lobbying and why the Kennedy assassination is of perennial interest. Written in smart, witty, and conversational style, and with amazing illustrations, Stuff They Don't Want You to Know is a vital book in helping to understand the unexplainable and use truth as a powerful weapon against ignorance, misinformation, and lies.
