Australian Genre Film interrogates key genres at the core of Australia's so-called new golden age of genre cinema, establishing the foundation on which more sustained research on film genre in Australian cinema can develop. The book examines what characterises Australian cinema and its output in this new golden age, as contributors ask to what extent Australian genre film draws on widely understood (and largely Hollywood-based) conventions, as compared to culturally specific conventions of genre storytelling. As such, this book offers a comprehensive and up-to-date survey of Australian genre film, undertaken through original analyses of 13 significant Australian genres: action, biopics, comedy, crime, horror, musical, road movie, romance, science fiction, teen, thriller, war, and the Western. This book will be a cornerstone work for the burgeoning field of Australian film genre studies and a must-read for academics; researchers; undergraduate students; postgraduate students; and general readers interested in film studies, media studies, cultural studies, Australian studies, and sociology.

Various disciplines that deal with Achaemenid rule offer starkly different assessments of Persian kingship. While Assyriologists treat Cyrus's heirs as legitimate successors of the Babylonian kings, biblical scholars often speak of a "kingless era" in which the priesthood took over the function of the Davidic monarch. Egyptologists see their land as uniquely independently minded despite conquests, while Hellenistic scholarship tends to evaluate the interface between Hellenism and native traditions without reference to the previous two centuries of Persian rule. This volume brings together in dialogue a broad array of scholars with the goal of seeking a broader context for assessing Persian kingship through the anthropological concept of political memory.
