How Posters Work has a unique focus on visual language. Rather than provide a history of the genre or a compilation of collectibles, the book is organized around active design principles. Concepts such as "Simplify," "Focus the eye," "Exploit the diagonal," "Reverse expectations," and "Say two things at once" are illustrated with a diverse range of posters, from avant-garde classics and rarely seen international works to contemporary pieces by today's leading graphic designers. Illustrated with over 150 works*

*This book is neither autobiography nor a family history. It is a short account of an unusual childhood and the experience of being born into a family living in a repressive political system. The family members faced many restrictions in their daily lives but, in other respects, managed to avoid the worst excesses of the Communist regime. The book recounts how, despite many limitations, the author and her brother were protected, encouraged to flourish and were not held back by a hostile political environment until their adult years. ***"Mademoiselle Fifi" is a short story by Guy de Maupassant. Henri Rene Albert Guy de Maupassant (5 August 1850 - 6 July 1893) was a popular 19th-century French writer, considered one of the fathers of the modern short story and one of the form's finest exponents. A protege of Flaubert, Maupassant's stories are characterized by their economy of style and efficient, effortless denouements.***

***Many of the stories are set during the Franco-Prussian War of the 1870s and several describe the futility of war and the innocent civilians who, caught in the conflict, emerge changed. He authored some 300 short stories, six novels, three travel books, and one volume of verse. His first published story "Boule de Suif" ("Ball of Fat," 1880) is often considered his masterpiece. He delighted in clever plotting, and served as a model for Somerset Maugham and O. Henry in this respect. His stories about expensive jewellery ("The Necklace," "La parure") are imitated with a twist by Maugham ("Mr Know-All," "A String of Beads") and Henry James ("Paste"). Taking his cue from Balzac, Maupassant wrote comfortably in both the high-Realist and fantastic modes; stories and novels such as "L'Heritage" and Bel-Ami aim to recreate Third Republic France in a realistic way, whereas many of the short stories (notably "Le Horla" and "Qui sait?") describe apparently supernatural phenomena. The supernatural in Maupassant, however, is often implicitly a symptom of the protagonists' troubled minds; Maupassant was fascinated by the burgeoning discipline of psychiatry, and attended the public lectures of Jean-Martin Charcot between 1885 and 1886. This interest is reflected in his fiction. Maupassant is notable as the subject of one of Leo Tolstoy's essays on art: The Works of Guy de Maupassant. Friedrich Nietzsche's autobiography mentions him in the following text: "I cannot at all conceive in which century of history one could haul together such inquisitive and at the***

***This monograph, based on newly declassified sources from Western and Russian archives as well as on communist texts about international law and neutrality, is the first English-language account of Soviet policy towards neutral yet capitalist Austria during the Cold War. In order to make neutrality a model for the West, the Kremlin presented the unique Soviet-Austrian relationship as "a good example of peaceful coexistence" and a showcase for the benefits a Western state might reap by declaring neutrality. This honor, however, had strings attached: The communist doctrine of neutrality contained obligations that were expected to make it possible to exploit neutral states as instruments of Soviet policy and bring them nearer the socialist bloc.***

Engine production for the typical car manufactured today is a study in mass production. Benefits in the manufacturing process for the manufacturer often run counter to the interests of the end user. What speeds up production and saves manufacturing costs results in an engine that is made to fall within a wide set of standards and specifications, often not optimized to meet the original design. In short, cheap and fast engine production results in a sloppy final product. Of course, this is not what enthusiasts want out of their engines. To maximize the performance of any engine, it must be balanced and blueprinted to the exact tolerances that the factory should have adhered to in the first place. Four cylinder, V-8, American or import, the performance of all engines is greatly improved by balancing and blueprinting. Dedicated enthusiasts and professional racers balance and blueprint their engines because the engines will produce more horsepower and torque, more efficiently use fuel, run cooler and last longer. In this book, expert engine builder and veteran author Mike Mavrigian explains and illustrates the most discriminating engine building techniques and perform detailed procedures, so the engine is perfectly balanced, matched, and optimized. Balancing and blueprinting is a time consuming and exacting process, but the investment in time pays off with superior performance. Through the process, you carefully measure, adjust, machine and fit each part together with precision tolerances, optimizing the design and maximizing performance. The book covers the block, crankshaft, connecting rods, pistons, cylinder heads, intake manifolds, camshaft, measuring tools and final assembly techniques. For more than 50 years, balancing and blueprinting has been an accepted and common practice for maxim

**The Gilgamesh Epic is an epic poem from ancient Mesopotamia that is often regarded as the earliest surviving great work of literature. The literary history of Gilgamesh begins with five Sumerian poems about 'Bilgamesh' (Sumerian for 'Gilgamesh'), king of Uruk, dating from the Third Dynasty of Ur (circa 2100 BC). These independent stories were later used as source material for a combined epic. The first surviving version of this combined epic, known as the "Old Babylonian" version, dates to the 18th century BC and is titled after its incipit, Shutur eli sharri ("Surpassing All Other Kings"). Only a few tablets of it have survived.**

In Spain, the two hundred years that elapsed between the beginning of the early modern period and the final years of the

Habsburg Empire saw a profusion of works written by women. Whether secular or religious, noble or middle class, early modern Spanish women actively composed creative works such as poetry, prose narratives, and plays. The Routledge Research Companion to Early Modern Spanish Women Writers covers the broad array of different kinds of writings – literary as well as extra-literary – that these women wrote, taking into consideration their subject positions and the cultural and historical contexts that influenced and were influenced by them. Beyond merely recognizing the individual women authors who had influence in literary, religious, and intellectual circles, this Research Companion investigates their participation in these circles through their writings, as well as the ways in which their texts informed Spain's cultural production during the early modern period. In order to contextualize women's writings across the historical and cultural spectrum of early modern Spain, the Research Companion is divided into six sections of general thematic interest: Women's Worlds; Conventual Spaces; Secular Literature; Women in the Public Sphere; Private Circles; Women Travelers. Each section is subdivided into chapters that focus

on specific issues or topics.
