Tennis is more mentally difficult than most other sports. Because of its one-on-one nature, it feels more important than it is. Competitive matches can become highly stressful, and losing is painful. Emotions tend to get out of hand, with fears and nerves becoming difficult to control. Confidence comes and goes; the scoring system is diabolical; and everyone is at risk of choking, even the greatest players in the world. This book attacks these and other issues faced by players of all levels. Dr. Allen Fox’s solutions are logical and straightforward, and most importantly, they have been tested on court and they work.

The mathematical challenges coming from the social and behavioral sciences differ significantly from typical applied mathematical concerns. □Change,□ for instance, is ubiquitous, but without knowing the fundamental driving force, standard differential and iterative methods are not appropriate. Although differing forms of aggregation are widely used, a general mathematical assessment of potential pitfalls is missing. These realities provide opportunities to create new mathematical approaches. These themes are described in an introductory, expository, and accessible manner by exploring new ways to handle dynamics and evolutionary game theory, to identify subtleties of decision and voting methods, to recognize unexpected modeling concerns, and to introduce new approaches with which to examine game theory. Applications range from avoiding undesired consequences when designing policy to identifying unanticipated voting (where the □wrong□ person could win), nonparametric statistical, and economic □supply and demand□ properties.

This book explores the motivations of adult second language (L2) learners to learn Italian in continuing education settings in Australia. It focuses on their motivational drives, learning trajectories and related dynamics of identity development triggered by the learning process. Central to the study are adult L2 learners, who are still a largely under-researched and growing group of learners, and readers will gain a better understanding of the learning process of this specific group of learners and ideas for sustaining L2 adult learning motivation in continuing education settings. Furthermore, the book discusses the role played by the Italian migrant community in Australia in making Italian a sought-after language to learn. It explores how a migrant community may influence motivation, and highlights and expands on the notion of L2 learning contexts, showing the existence of sociocultural environments where second language learning trajectories are affected by the presence of migrant groups.

This forward-thinking Handbook draws on the expertise of established and emerging scholars to provide a comprehensive review of the current state and future direction of theory and practice in US public administration. Chapters offer a cross-disciplinary, holistic review of the field, pulling together leaders from subfields such as public administration, public and nonprofit management, finance, human resource management, networks, nonprofits, policy, and politics. Chapter authors conclude that the field is intellectually rich and highly nuanced, but also identify numerous opportunities for growth and expansion in the coming years. The Handbook charts an agenda for future research in the field.The Handbook of American Public Administration is geared toward academics, researchers, and advanced graduate students. As an authoritative text on the history and State of US public administration, it proves equally suitable for national and international audiences. Practitioners who may be looking for background information or state-of-the-art knowledge about practice will also benefit from this Handbook.

A Proven System to Leverage Your Network in a Job Search

To desire something is a condition familiar to everyone. It is uncontroversial that desiring has something to do with motivation, something to do with pleasure, and something to do with reward. Call these "the three faces of desire." The standard philosophical theory at present holds that the motivational face of desire presents its unique essence--to desire a state of affairs is to be disposed to act so as to bring it about. A familiar but less standard account holds the hedonic face of desire to reveal to true nature of desire. In this view, to desire something is to tend to pleasure if it seems that the desired state of affairs has been achieved, or displeasure if it seems otherwise, thus tying desire to feelings instead of actions. In Three Faces of Desire, Schroeder goes beyond actions and feelings to advance a novel and controversial theory of desire that puts the focus on desire's neglected face, reward. Informed by contemporary science as much as by the philosophical tradition, Three Faces of Desire discusses recent scientific discoveries that tell us much about the way that actions and feelings are produced in the brain. In particular, recent experiments reveal that a distinctive system is responsible for promoting action, on the one hand, and causing feelings of pleasure and displeasure, on the other. This system, the brain's reward system, is the causal origin of both action and feeling, and is the key to understanding the nature of desire.

This is a new edition of the established reference and graduate text on experimental psychology. Widely used for over 25 years, this edition has been completely updated and expanded into two volumes; contributors to these works are among the most highly renowned professionals in the field. Volume 1 includes coverage of the physics and retinal physiology of vision; the nature of auditory perception, speech, and emotional patterns; and the latest theories and findings in the area of behavioral genetics. Volume 2 includes studies exploring such topics as the psychobiology of learning and memory; the influences of choice and reinforcement in human behavior; psycholinguistics; individual variations in cognitive functioning, and much more.

Bringing together contributions from international research on writing and motivation this volume addresses the implications of writing instruction based on the 2 main approaches to writing research: cognitive and socio-cultural. It provides systematic analysis of the various models, perspectives, and methods of motivation and writing.

This book:
-Presents activities that allow all students to succeed
-Lets you mix and match activities to create varied daily lesson plans
-Ensures that your students are meeting the NASPE standards for skill and fitness development
-Includes an activity finder to make it easy to select activities that meet your students' needs
Mix, Match, and Motivatehelps you show elementary students that physical activity can be fun and meaningful. It shifts the emphasis away from competitive games in favor of activities that allow all students to succeed, ensuring maximum student involvement and a positive experience for all. These 107 activities take a developmentally appropriate approach to skill development and fitness. You'll be able to meet a range of individual needs while motivating kids to participate in lifelong physical activity and meeting the NASPE standards for skill and fitness development. The book has an easy-to-follow format that allows you to mix and match activities to create a multitude of fresh, new lessons to keep your students moving and learning. Chapter 1 provides straightforward, practical information on developing and implementing a program for maximum student success. Chapters 2 through 5 are organized along the lines of a complete lesson: instant activity and warming up (chapter 2), developing fitness (chapter 3), developing core skills and enhancing motivation (chapter 4), and concluding the lesson and cooling down (chapter 5). Finally, chapter 6 provides ideas for activities that celebrate individual and program success, which involve parents and community members. Several features make this book particularly teacher-friendly. In the opening pages you'll find an activity finder--an easy-to-read chart that summarizes key information about each activity, including the age for which it is intended, the lesson component it covers, and the health-related fitness component it fulfills. You can use the chart to pinpoint the activities that best meet your students' needs. For those activities listed as core activities, you'll also find a list of the skills each activity develops: throwing and catching, striking and kicking, volleying and dribbling, movement and balance, skill combinations and techniques, or strategies and communication. The activities themselves are presented in a clear, easy-to-digest format that provides everything you need to introduce the activity successfully:
-Age-level icons indicate at which age group--primary or intermediate--to use the activity.
-An overview summarizes the activity and explains how it fits into a lesson plan.
-An equipment list shows you at a glance what you'll need.
-A preparation section helps you get ready.
-Step-by-step instructions show you how to present the activity to your students.
-Hints and modifications make your teaching more effective, create individual variations for students, or increase the challenge for students.
Every activity in this book has been field-tested and proven successful. If you want to create successful experiences that will not only help students develop basic skills and fitness but also leave them with a desire to return for more, then Mix, Match, and Motivateyour way to success.

It happened. It may have been a surprise, or it could have been anticipated, but at this point, what does it matter? You lost your job. Or, the frustrations at your current job have hit the boiling point. You just can't take it anymore! In either case, change is inevitable. But, you're over the age of 50 and intellectually or intuitively you know your age could be a factor in your job search. . .and, you are right. There are age-related biases that exist in the job market that will work against you. According to government statistics, job seekers over 50 encounter more difficulty in getting new jobs and suffer notably longer unemployment than their younger counterparts. But these statistics do not have to apply to you! First, immediately stop with the worry and negative thinking. You're in a better position than you think. There are employers out there that not only will hire you, they are looking for you! The key is to find them, sell them on you, and get them to hire you. It's not as hard as you may think. In the Over 50 and Motivated book, Brian Howard will teach you a systematic approach for conducting a real-world job search based on years of frontline recruiting experience helping thousands of tenured job seekers just like you. He will teach you how to effectively conduct a job search in today's job market and techniques to successfully combat age biases. He will show you how to get job offers and your next fulfilling career position!

There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, How People Learn: Brain, Mind, Experience, and School: Expanded Edition was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. How People Learn II: Learners, Contexts, and Cultures provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. How People Learn II will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.

This review of eight countries offers innovative schemes that appear to be developing the skills and attitudes necessary for lifelong learning.

Integrating significant advances in motivation science that have occurred over the last two decades, this volume thoroughly examines the ways in which motivation interacts with social, developmental, and emotional processes, as well as personality more generally. The Handbook comprises 39 clearly written chapters from leaders in the field. Cutting-edge theory and research is presented on core psychological motives, such as the need for esteem, security, consistency, and achievement; motivational

systems that arise to address these fundamental needs: the process and consequences of goal pursuit, including the role of individual differences and contextual moderators; and implications for personal well-being and interpersonal and intergroup relations.

How can I get motivated when my mental energy feels like ... mush? Life insists we do things like: - Get out of bed. - Study for exams. - Show up for work. - Think about exercise. - Make sales calls. The list goes on and on. There are so many mind-numbing things we know we should do, but our minds and bodies say, "No!" So what do we really need? How about strategies we can actually use? Instead of feeling defeated and sluggish, we can take iron-fisted control of our minds and get motivated in less than 60 seconds. We can struggle, feel guilty, and fight motivation fatigue for the rest of our lives, or we can learn how to be smarter than our unmotivated brains. Life is short. Let's feel motivated to do what we have to do. No need to suffer. Let our minds work for us, instead of against us. Scroll up and start reading this book now!

This book focuses on basic strategies you can integrate into everyday instruction in every subject area and across grade levels. It shows teachers how to motivate and engage students. Employee engagement is undeniably a crucial focus point for organisations in the twenty-first century, with motivation comprising the often missing, but vital, component of the developmental mix. Mapping Motivation for Engagement in the 21st

first century: away from hierarchies and command-and-control management styles, towards a bottom-up approach in which the needs and motivators of the employees take centre stage. Co-written with Steve Jones, this is the third book in the Mapping Motivation series. The first book in the series, by author James Sale's Motivational Map diagnostic tool. Each book builds on a different aspect of personal, team and organisational development. This book is a practical guide to the complexities of understanding and dealing with engaged employees.

Along with clear diagrams, reflective points, activities and a comprehensive index, the book provides free access to the online Motivational Map tool to facilitate a greater understanding of the contents. Drawing on copious amounts of research, the Macleod Report for the UK government, this book shows how Mapping Motivation can play a significant and crucial role in making engagement a reality, instead of a dream. Mapping Motivation for Engagement is a stimulating and practical guide for a wide audience including, but not limited to, trainers and coaches working in management and motivation, experts in human resources, internal learning and development and organisational development as well as change and engagement consultants.

Utilitarianism is the idea that ethics is ultimately about what makes people's lives go better. While utilitarian ideas remain highly influential in politics and culture, they are subject to many well-developed philosophical criticisms, such as the claim that utilitarianism is too much of us and the view that it does not respect individuals' rights. The theory is widely thought by philosophers to be the least plausible form of consequentialism, hampered by its excessive simplicity. In Taking Utilitarianism Seriously, the author argues that utilitarianism is not defeated by the standard objections. He presents a new and rich version of utilitarianism that can answer all six common objections plausibly and, in doing so, launches a state-of-the-art defence of the utilitarian tradition, which has been largely overlooked.

have often assumed. Far from being excessively simple, utilitarianism is able to account for much of the complexity and nuance of everyday ethical thought. And rather than being quickly dismissed, utilitarian approaches to moral and political philosophy deserve development and discussion.

Jesus - a Master Teacher by Roy Pitcher Synopsis for cover The success of Jesus as a teacher is both proverbial and fascinating - especially for a teacher.....but can his many strategies and methods go beyond religious teaching and be applied to the modern world? That is the question Roy Pitcher asked. His positive conclusions are described in three parts. - An analysis of Jesus' situation, decisions and methods. - An examination of seven inter-related social psychological themes evident in his teaching. - An analysis of our contemporary scene of eight strategies and a planning model that can be applied to wide ranging age groups and areas of teaching. Its success has been evident in many contexts and deserves careful consideration.

In understanding human behavior, psychologists have long been interested in what motivates specific actions. Debates have pitted extrinsic motivators (e.g. rewards/punishment) against intrinsic motivation in attempting to determine what best motivates individuals. This book provides a summary view of what research has determined about both extrinsic and intrinsic motivation, and clarifies what questions remain unanswered. Divided into three sections, section I revisits the debate about the effects of extrinsic incentives or constraints on intrinsic motivation and creativity, and identifies theoretical advances in motivational research. Section II focuses on the hidden costs and benefits of different types of achievement goals on motivation and performance. Section III discusses theory and research findings on how extrinsic and intrinsic motivators may work in everyday life and over time. This book is of interest to researchers in psychology, education, and business, as well as to a wider audience interested in promoting optimal motivation and performance. Coverage in this book includes: * Debates and controversies in motivational research * Developmental nature of intrinsic and extrinsic motivation over time * Influences of parents, educators, and employers in facilitating motivation * Effect of achievement goals on learning and performance * The role of intrinsic and extrinsic motivation in self-regulation Key Features * Brings together major figures in the fields of motivation, education, and social psychology * Provides a mix of theory, basic and applied research * Presents research conducted both in laboratories and educational settings * Comprehensive chapters provide excellent reviews of previous literature as well as outlines important new directions * Provides different perspectives on controversial debates in a balanced, constructive manner

Teachers around the world have found Ian Gilbert's classic text Essential Motivation in the Classroom an inspiring and provocative read. This ground-breaking companion to the book is a definitive one-stop guide for teachers who are looking for inspiration into how his ideas can be put into practice in every-day classrooms. A truly lively and engaging resource, it scrutinises each aspect of Gilbert's now famous 'seven keys' of motivation and provides a wide range of practical ideas, activities and launch-pads for discussion which can be blended seamlessly into your own lessons. Taking as its starting point the right of every child to an inspirational education that develops their values, attitudes and skills, this book provides you with the means to unlock even your most challenging of pupils and will act as a spring board for visionary learning in the classroom and beyond. Key ideas explored include: • Goal setting strategies • Students' own intrinsic motivation • Preparing effective challenges • Developing multiple approaches to learning • Using physical activities to anchor learning • Helping students to understand themselves better and be better prepared for the world today For teachers of pupils at all ages and stages, this book is easy to follow, easy to 'dip in and out of', is conversational in tone, and has the potential to be a game-changer for any teacher wishing to reinvigorate their pupils, colleagues and classrooms.
