"Akashvani" (English) is a programme journal of ALL INDIA RADIO, it was formerly known as The Indian Listener. It used to serve the listener as a bradshaw of broadcasting ,and give listener the useful information in an interesting manner about programmes, who writes them, take part in them and produce them along with photographs of performing artists. It also contains the information of major changes in the policy and service of the organisation. The Indian Listener (fortnightly programme journal of AIR in English) published by The Indian State Broadcasting Service, Bombay, started on 22 December, 1935 and was the successor to the Indian Radio Times in English, which was published beginning in July 16 of 1927. From 22 August ,1937 onwards, it used to published by All India Radio, New Delhi. From 1950,it was turned into a weekly journal. Later, The Indian listener became "Akashvani" (English) w.e.f. January 5, 1958. It was made fortnightly journal again w.e.f July 1,1983. NAME OF THE JOURNAL: AKASHVANI LANGUAGE OF THE JOURNAL: English DATE, MONTH & YEAR OF PUBLICATION: 10 DECEMBER, 1978 PERIODICITY OF THE JOURNAL: Weekly NUMBER OF PAGES: 72 VOLUME NUMBER: Vol. XLIII. Basics of Troubleshooting in Plastics Processing

The internet of things (IoT) has had a major impact on academic and industrial fields. Applying these technologies to healthcare systems reduces medical costs while enriching the patient-centric approach to medicine, allowing for better overall healthcare proficiency. However, usage of IoT in healthcare is still suffering from significant challenges with respect to the cost and accuracy of medical sensors, non-standard IoT

system architectures, assorted wearable devices, the huge volume of generated data, and interoperability issues. Incorporating the Internet of Things in Healthcare Applications and Wearable Devices is an essential publication that examines existing challenges and provides solutions for building smart healthcare systems with the latest IoT-enabled technology and addresses how IoT improves the proficiency of healthcare with respect to wireless sensor networks. While highlighting topics including mobility management, sensor integration, and data analytics, this book is ideally designed for computer scientists, bioinformatics analysts, doctors, nurses, hospital executives, medical students, IT specialists, software developers, computer engineers, industry professionals, academicians, researchers, and students seeking current research on how these emerging wireless technologies improve efficiency within the healthcare domain.

The Basics of Troubleshooting in Plastics Processing is a condensed practical guide that gives the reader a broad introduction to properties of thermoplastics plastics, additives, the major processes (extrusion, injection molding, rotational molding, blow molding, and thermoforming), as well as troubleshooting. The main goal is to provide the plastics processor with an improved understanding of the basics by explaining the science behind the technology. Machine details are minimized as the emphasis is on processing problems and the defects in an effort to focus on basic root causes to problems and how to solve them. The book's framework is troubleshooting in plastics processing because of the importance it has to the eventual production of high quality end products. Each chapter contains both practical and detailed technical information. This basic guide provides state-of-the-art information on: Processing problems and defects during manufacturing Plastics materials, their properties and characterization The plastics processing techniques Plastics additives Troubleshooting of the 5 main plastics processes References for further reading

Walk Through Paradise

Identifies colleges and universities that offer a non-traditional way to gain a bachelor's, master's, or doctorate degree.

This biography chronicles the life of professor Emil J. Gumbel (1891-1966) one of Weimar Germany's foremost left-wing intellectuals. A pacifist, socialist, and human rights activist, Gumbel is best remembered for his exposés on political violence and politicized justice in Nazi Germany. A "one-man party," at the center of the most acrimonious political battle in Weimar academia, Gumbel stood alone among his peers courageously speaking out against the Nazis.

Educational commissions continue to press the need for growth in higher education. In particular, universities in developing countries persist in putting their academic theory into practice by aiming to integrate their intellectual and cultural traditions into higher education. *Evolving Corporate Education Strategies for Developing Countries: The Role of Universities* presents the theories and opportunities for integrating corporate education into traditional universities as well as highlighting the professional development in different subject areas. This book provides relevant research important for policy makers, practitioners and scholars of higher education.

This book is a pioneering venture. It is the first effort to provide an international inventory of women's universities and colleges. Apart from providing such inventory the book intends to raise questions and suggest new ways of improving the education of women worldwide.

The book features research papers presented at the International Conference on Computer Networks and Inventive Communication Technologies (ICCNCT 2018), offering significant contributions from researchers and practitioners in academia and industry. The topics covered include computer networks, network protocols and wireless networks, data communication technologies, and network security. Covering the main core and specialized issues in the areas of next-generation wireless network design, control, and management, as well as in the areas of protection, assurance, and trust in information security practices, these proceedings are a valuable resource, for researchers, instructors, students, scientists, engineers, managers, and industry practitioners.

An Epidemiological Update on COVID-19 brings recent findings about the pandemic to the forefront. The reference is a compilation of eleven chapters contributed by expert scholars in epidemiology and medicine that cover topics of interest to anyone interested in COVID-19 monitoring and response measures. The topics also indicate some clinical areas of interest to COVID-19 researchers that have received attention due to the pandemic. It covers basic knowledge about respiratory conditions associated with SARS-CoV-2 infection and COVID-19 epidemiology. These topics are complemented with chapters detailing the symptoms and biochemical mechanisms of novel coronavirus infections intended for readers with an advanced level of understanding of life sciences and medicine. Special topics such as the immune response to Sars-CoV-2, and, recombinant drugs for COVID-19, are also covered in this book. Each

Universities, The Present Handbook Provides The Names Of Their Vice-Chancellor, Professors And Readers As Well As Their Faculties And Departments. It Also Acquaints The Readers With The Various Courses Of Studies Offered By Each University. It Is Hoped That The Handbook In Its Present Form, Will Prove Immensely Helpful To The Aspiring Students In Choosing The Best Educational Institution For Their Career Enhancement. In Addition, It Will Also Prove Very Useful For The Publishers In Mailing Their Publicity Materials. Even The Suppliers Of Equipment And Services Required By These Educational Institutions Will Find It Highly Valuable.

This book explores key themes in the making of Renaissance painting, sculpture, architecture, and prints: the use of specific techniques and materials, theory and practice, change and continuity in artistic procedures, conventions and values. It also reconsiders the importance of mathematical perspective, the assimilation of the antique revival, and the illusion of life. Embracing the full significance of Renaissance art requires understanding how it was made. As manifestations of technical expertise and

tradition as much as innovation, artworks of this period reveal highly complex creative processes--allowing us an inside view on the vexed issue of the notion of a renaissance. On self-help groups in Tamil Nadu and micro-credit available to rural women; contributed articles.
