Le Telecommunications Thesis S Mak

How did the Gospel of Mark come to exist? And how was the memory of Jesus shaped by the experiences of the earliest Christians? For centuries, biblical scholars examined texts as history, literature, theology, or even as story. Curiously absent, however, has been attention to processes of collective memory in the creation of biblical texts. Drawing on modern explorations of social memory, Sandra Huebenthal presents a model for reading biblical texts as collective memories. She

Download File PDF Le Telecommunications Thesis S Mak

demonstrates that the Gospel of Mark is a text evolving from collective narrative memory based on recollections of Jesus's life and teachings. Huebenthal investigates the principles and structures of how groups remember and how their memory is structured and presented. In the case of Mark's Gospel, this includes examining which image of Jesus, as well as which authorial self-image, this text as memory constructs. Reading Mark's Gospel as a Text from Collective Memory serves less as a key to unlock questions about the historical Jesus and more as an examination of memory about him within a

Download File PDF Le Telecommunications Thesis S Mak

particular community, providing a new and important framework for interpreting the earliest canonical gospel in context.

The book focuses on experimental modeling of atmospheric turbulence effects and mitigation of beam wandering and wavefront distortions in terrestrial free space optical communication (FSOC). This means, developing a reliable FSOC system with a necessary optoelectronic assembly to compensate the atmospheric turbulence effects, so as to practically attain the acceptable BER under any real-world open atmospheric turbulence conditions.

This book brings together experts from different areas to show how creativity drives design and innovation in different kind of businesses. It presents theories and best practices demonstrating how creativity generates technological invention, and how this, combined with entrepreneurship, leads to business innovation. It also discusses strategies to teach entrepreneurial competencies and support business developments, including aspects such as corporate social responsibility and sustainability. Moreover, the book discusses the role of human factors in understanding,

communicating with and engaging users, reporting on innovative approaches for product design, development, and branding. It also discusses applications in education and well-being. Based on the AHFE 2021 Conferences on Creativity, Innovation and Entrepreneurship, and Human Factors in Communication of Design, held virtually on July 25–29 July, 2021, from USA, the book addresses a broad audience of business innovators, entrepreneurs, designers, and marketing and communication experts alike. Things (IoT) and e-mining. Written by respected experts and researchers working on ICT, the book offers a valuable asset for young researchers involved in advanced studies. The book is presented in four volumes.

Features - additional services - occur whenever organisations compete by differentiating their products from those of rival organisations. Adding one feature may break another, or interfere with it in an undesired way. This phenomenon is called feature interaction. This book explores ways in which the feature interaction problem may be mitigated.

This practical, user-friendly resource helps students successfully complete an evaluation capstone: a dissertation, thesis, or culminating project where a student conducts an evaluation as their capstone experience. Authors Tamara M.

Download File PDF Le Telecommunications Thesis S Mak

Walser and Michael S. Trevisan present a framework to support students and faculty in maximizing student development of evaluator competencies, addressing standards of the evaluation profession, and contributing to programs and disciplinary knowledge. Their framework, and this book, is organized by six fundamentals of evaluation practice: quality; stakeholders; understanding the program; values; approaches; and maximizing evaluation use. Throughout the book they use the metaphor of the journey to depict the processes and activities a student will experience as they navigate an evaluation capstone and the six fundamentals of evaluation practice. In pursuit of a completed capstone, students grow professionally and personally, and will be in a different place when they reach the destination and

Beyond the Great Divide Strategic Corporate Communication in the Digital Age

This eye-opening reader explores how communication values and styles can be similar or different for members of various cultures and communities. INTERCULTURAL COMMUNICATION: A READER focuses on practical strategies you can use to communicate more effectively in a variety of contexts, including interpersonal, rhetoric, group, business, education, health care, and organizational. This broad-based, highly engaging reader, compiled by the authors who defined the course, includes a balanced selection of articles-some commissioned solely for this text-

that discusses the classic ideas that laid the groundwork for this field, as well as the latest research and ideas. Material is presented in such a way that you can read, understand, and then apply course concepts to your own life. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

New perspectives on digital scholarship that speak to today's computational realities Scholars across the humanities, social sciences, and information sciences are grappling with how best to study virtual environments, use computational tools in their research, and engage audiences with their results.

Classic work in science and technology studies (STS) has played a central role in how these fields analyze digital technologies, but many of its key examples do not speak to

Download File PDF Le Telecommunications Thesis S Mak

today's computational realities. This groundbreaking collection brings together a world-class group of contributors to refresh the canon for contemporary digital scholarship. In twenty-five pioneering and incisive essays, this unique digital field guide offers innovative new approaches to digital scholarship, the design of digital tools and objects, and the deployment of critically grounded technologies for analysis and discovery. Contributors cover a broad range of topics, including software development, hackathons, digitized objects, diversity in the tech sector, and distributed scientific collaborations. They discuss methodological considerations of social networks and data analysis, design projects that can translate STS concepts into durable scientific work, and much more. Featuring a concise introduction by Janet Vertesi and

Download File PDF Le Telecommunications Thesis S Mak

David Ribes and accompanied by an interactive microsite, this book provides new perspectives on digital scholarship that will shape the agenda for tomorrow ' s generation of STS researchers and practitioners.

The book mainly addresses the following aspects: First, it systematically introduces the domestic and foreign research results, pointing out the key elements of the basic theory of IMC, according to a company ' s present situation and the practice of IMC strategy. Second, according to the different characteristics of each organization, it provides various IMC organization structures, such as linear structure Model I, a virtual network and centralized type that focuses on individual interest, external types of the IMC organizational structures Model, etc., and suggestions for further study are also

and Communication

Interracial Communication: Theory Into Practice,

Third Edition, by Mark P. Orbe and Tina M. Harris,

guides readers in applying the contributions of recent

Download File PDF Le Telecommunications Thesis S Mak

communication theory to improving everyday communication among the races. The authors offer a comprehensive, practical foundation for dialogue on interracial communication, as well as a resource that stimulates thinking and encourages readers to become active participants in dialogue across racial barriers. Part I provides a foundation for studying interracial communication and includes chapters on the history of race and racial categories, the importance of language, the development of racial and cultural identities, and current and classical theoretical approaches. Part II applies this

Download File PDF Le Telecommunications Thesis S Mak

information to interracial communication practices in specific, everyday contexts, including friendships, romantic relationships, the mass media, and organizational, public, and group settings. This Third Edition includes the latest data, new research studies and examples, all-new photos, and important new topics.

Almost everything that matters to humans is derived from and through communication. Just because people communicate every day, however, does not mean that they are communicating competently. In fact, evidence indicates that there is a substantial

Download File PDF Le Telecommunications Thesis S Mak

need for better interpersonal skills among a significant proportion of the populace. Furthermore, "dark side" experiences in everyday life abound, and features of modern society pose new challenges that make the concept of communication competence increasingly complex. The Handbook of Communication Competence brings together scholars from across the globe to examine these various facets of communication competence, including its history, its essential components, and its applications in interpersonal, group, institutional, and societal contexts. The book provides a state-of-the-

Download File PDF Le Telecommunications Thesis S Mak

art review for scholars and graduate students, as well as practitioners in counseling, developmental, health care, educational, intercultural, and human resource management contexts, illustrating that communication competence is vital to health, relationships, and all collective human endeavors. Context is what contributes to interpret a communicative act beyond the spoken words. It provides information essential to clarify the intentions of a speaker, and thus to identify the actual meaning of an utterance. A large amount of research in Pragmatics has shown how wide-ranging and

Download File PDF Le Telecommunications Thesis S Mak

multifaceted this concept can be. Context spans from the preceding words in a conversation to the general knowledge that the interlocutors supposedly share, from the perceived environment to features and traits that the participants in a dialogue attribute to each other. This last category is also very broad, since it includes mental and emotional states, together with culturally constructed knowledge, such as the reciprocal identification of social roles and positions. The assumption of a cognitive point of view brings to the foreground a number of new questions regarding how information about the

Download File PDF Le Telecommunications Thesis S Mak

context is organized in the mind and how this kind of knowledge is used in specific communicative situations. A related, very important question concerns the role played in this process by theory of mind abilities (ToM), both in typical and atypical populations. In this Research Topic, we bring together articles that address different aspects of context analysis from theoretical and empirical perspectives, integrating knowledge and methods derived from Philosophy of language, Linguistics, Cognitive Science, Cognitive Neuroscience, Developmental and Clinical Psychology.

The humanities and social sciences. A

Describing a fascinating case from the modern mission movement in Africa, this book offers new and valuable insight from the encounter between the Dii people and Norwegian missionaries. Spiritual and social

changes were results of fascination, miscommunication and constant negotiation in a spiritual and civilizing marketplace. At its core, information security deals with the secure and accurate transfer of information. While information security has long been important, it was, perhaps, brought more clearly into mainstream focus with the so-called "Y2K" issue. The Y2K scare was the fear that computer networks and the systems that are controlled or operated by software would fail with the turn of the millennium,

since their clocks could lose synchronization by not recognizing a number (instruction) with three zeros. A positive outcome of this scare was the creation of several Computer Emergency Response Teams (CERTs) around the world that now work - operatively to exchange expertise and information, and to coordinate in case major problems should arise in the modern IT environment. The terrorist attacks of 11 September 2001 raised security concerns to a new level. The international community responded on at least

two fronts; one front being the transfer of reliable information via secure networks and the other being the collection of information about - tential terrorists. As a sign of this new emphasis on security, since 2001, all major academic publishers have started technical journals focused on security, and every major communi- tions conference (for example, Globecom and ICC) has organized workshops and sessions on security issues. In addition, the IEEE has created a technical committee on Communication and Information Security.

The first editor was intimately involved with security for the Athens Olympic Games of 2004.

There is a growing interest in delegation to non-majoritarian institutions in Europe, following both the spread of principal-agent theory in political science and law and increasing delegation in practice. During the 1980s and 1990s, governments and parliaments in West European nations have delegated powers and functions to non-majoritarian bodies - the EU, independent

central banks, constitutional courts and independent regulatory agencies. Whereas elected policymakers had been increasing their roles over several decades, delegation involves a remarkable reversal or at least transformation of their position. This volume examines key issues about the politics of delegation: how and why delegation has taken place; the institutional design of delegation to non-majoritarian institutions; the consequences of delegation to non-majoritarian institutions; the legitimacy of

non-majoritarian institutions. The book addresses these questions both theoretically and empirically, looking at central areas of political life - central banking, the EU, the increasing role of courts and the establishment and impacts of independent regulatory agencies.

Reading Mark's Gospel as a Text from
Collective Memory***

The emphasis of this text is on data networking, internetworking and distributed computing issues. The material surveys recent work in the area of satellite networks, introduces certain state-of-the-art technologies, and presents recent research results in these areas.

Kara Lyons-Pardue examines the issue of the ending of the gospel of Mark, showing how the later additions to the text function as early receptions of the original gospel tradition providing an ancient “ fix ” to the problem of

Download File PDF Le Telecommunications Thesis S Mak

the ending in which the women flee the tomb in terror and silence. Lyons-Pardue suggests that the long ending functions canonically, smoothing out the “ problem ” of 16:8 in ways that support the nascent four-gospel canon. Lyons-Pardue argues that the long ending represents an ancient reception of the preceding gospel that continues to the unique portrait of discipleship that is characteristically Markan. Mary Magdalene forms the renewed paradigm of an unlikely person or outsider, here a woman, being the one to “ go and tell ” the good news. This pattern is then projected onto all disciples who are called to proclaim the news to the entire created order (16:15).

Volume I of the handbook presents contemporary, multidisciplinary, historical, theoretical, and methodological aspects of how body movements relate to language. It documents how leading scholars from different disciplinary backgrounds conceptualize and analyze this complex relationship. Five chapters and a total of 72 articles, present current and past approaches, including multidisciplinary methods of analysis. The chapters cover: I. How the body relates to language and communication: Outlining the subject matter, II. Perspectives from different disciplines, III. Historical dimensions, IV. Contemporary approaches, V. Methods.

The Authentication of Missionaries and Their Message in
the Longer Ending of Mark

Schedule of Classes

Canadiana

This book constitutes the refereed proceedings of the Second International Conference on the Theory of Information Retrieval, ICTIR 2009, held in Cambridge, UK, in September 2009. The 18 revised full papers, 14 short papers, and 11 posters presented together with one invited talk were carefully reviewed and selected from 82 submissions. The papers are categorized into four main themes: novel IR models, evaluation,

Download File PDF Le Telecommunications Thesis S Mak

efficiency, and new perspectives in IR. Twenty-one papers fall into the general theme of novel IR models, ranging from various retrieval models, query and term selection models, Web IR models, developments in novelty and diversity, to the modeling of user aspects. There are four papers on new evaluation methodologies, e.g., modeling score distributions, evaluation over sessions, and an axiomatic framework for XML retrieval evaluation. Three papers focus on the issue of efficiency and offer solutions to improve the tractability of PageRank, data cleansing practices for training classifiers, and approximate search for distributed IR. Finally, four papers look into new perspectives of IR and shed light on some new emerging areas of interest, such

Download File PDF Le Telecommunications Thesis S Mak

as the application and adoption of quantum theory in IR. This book offers a comparative study of the management of legal pluralism. The authors describe and analyse the way state and non-state legal systems acknowledge legal pluralism – defined as the coexistence of a state and non-state legal systems in the same space in respect of the same subject matter for the same population - and determine its consequences for their own purposes. The book sheds light on the management processes deployed by legal systems in Africa, Canada, Central Europe and the South Pacific, the multitudinous factors circumscribing the action of systems and individuals with respect to legal pluralism, and the effects of management strategies and

Download File PDF Le Telecommunications Thesis S Mak

processes on systems as well as on individuals. The book offers fresh practical and analytical insight on applied legal pluralism, a fast-growing field of scholarship and professional practice. Drawing from a wealth of original empirical data collected in several countries by a multilingual and multidisciplinary team, it provides a thorough account of the intricate patterns of state and non-state practices with respect to legal pluralism. As the book's non-prescriptive approach helps to uncover and evaluate several biases or assumptions on the part of policy makers, scholars and development agencies regarding the nature and the consequences of legal pluralism, it will appeal to a wide range of scholars and practitioners in law, development

This volume chronicles the development of communication

Download File PDF Le Telecommunications Thesis S Mak

studies as a discipline, providing a history of the field and identifying opportunities for future growth. Editors Pat J. Gehrke and William M. Keith have assembled an exceptional list of communication scholars who, in the thirteen chapters contained in this book, cover the breadth and depth of the field. Organized around themes and concepts that have enduring historical significance and wide appeal across numerous subfields of communication, *A Century of Communication Studies* bridges research and pedagogy, addressing themes that connect classroom practice and publication. Published in the 100th anniversary year of the National Communication Association, this collection highlights the evolution of communication studies and will serve future generations of scholars as a window into not only our past but

Download File PDF Le Telecommunications Thesis S Mak

also the field's collective possibilities.

This book is the first to directly address the question of how to bridge what has been termed the "great divide" between the approaches of systems developers and those of social scientists to computer supported cooperative work--a question that has been vigorously debated in the systems development literature. Traditionally, developers have been trained in formal methods and oriented to engineering and formal theoretical problems; many social scientists in the CSCW field come from humanistic traditions in which results are reported in a narrative mode. In spite of their differences in style, the two groups have been cooperating more and more in the last decade, as the "people problems" associated with computing become increasingly evident to everyone. The

Download File PDF Le Telecommunications Thesis S Mak

authors have been encouraged to examine, rigorously and in depth, the theoretical basis of CSCW. With contributions from field leaders in the United Kingdom, France, Scandinavia, Mexico, and the United States, this volume offers an exciting overview of the cutting edge of research and theory. It constitutes a solid foundation for the rapidly coalescing field of social informatics. Divided into three parts, this volume covers social theory, design theory, and the sociotechnical system with respect to CSCW. The first set of chapters looks at ways of rethinking basic social categories with the development of distributed collaborative computing technology--concepts of the group, technology, information, user, and text. The next section concentrates more on the lessons that can be learned at the design stage given that

Download File PDF Le Telecommunications Thesis S Mak

one wants to build a CSCW system incorporating these insights--what kind of work does one need to do and how is understanding of design affected? The final part looks at the integration of social and technical in the operation of working sociotechnical systems. Collectively the contributors make the argument that the social and technical are irremediably linked in practice and so the "great divide" not only should be a thing of the past, it should never have existed in the first place. This book brings together the literature of urban sociology and film studies to explore new analytical and theoretical approaches to the relationship between cinema and the city, and to show how these impact on the realities of life in urban societies.

*The Longer Ending of the Gospel of Mark (Mark 16:9-20)
was appended to the Gospel of Mark in the first half of the
second century. James A. Kelhoffer explores this passage's
distinct witness to the use of gospel traditions and the
development of Christian thought. Concerning the origin of
this passage, he argues that a single author made use of*

Download File PDF Le Telecommunications Thesis S Mak

the New Testament Gospels in forging a more satisfactory ending to Mark. He studies the passage's sometimes innovative literary forms as well. Also of interest is the passage's claim that the ascended Lord will help those who believe to perform miraculous signs - casting out demons, speaking in new languages, picking up snakes, drinking poison with impunity and healing the sick - when they preach the gospel (verses 17-18, 20). This expectation is compared with portraits of miracles, especially in the context of mission, in the New Testament, various apocryphal acts and Christian apologists of the second and third centuries. In the two final chapters the author interprets the signs of picking up snakes (verse 18a) and drinking a deadly substance with impunity (verse 18b) in

Download File PDF Le Telecommunications Thesis S Mak

their history of religions contexts. An Epilogue summarizes the findings of this study and explores what can be ascertained about the otherwise unknown Christian author of Mark 16:9-20.

This two-volume set LNCS 11578 and 11579 constitutes the refereed proceedings of the 11th International Conference on Social Computing and Social Media, SCSM 2019, held in July 2019 as part of HCI International 2019 in Orlando, FL, USA. HCII 2019 received a total of 5029 submissions, of which 1275 papers and 209 posters were accepted for publication after a careful reviewing process. The 81 papers presented in these two volumes are organized in topical sections named: Social Media Design and Development, Human Behaviour in Social Media, Social Network Analysis,
