The cloud can be a powerful tool for conducting and managing research. The Librarian's Guide to Academic Research in the Cloud is a practical guide to using cloud services from a librarian's point of view. As well as discussing how to use various cloud-based services, the title considers the various privacy and data portability issues associated with web-based services. This book helps readers make the most of cloud computing, including how to fold mobile devices into the cloud-based research management equation. The book is divided into several chapters, each considering a key aspect of academic research in the cloud, including: defining the cloud; capturing information; capturing and managing scholarly information; storing files; staying organized; communicating; and sharing. The book ends by considering the future of the cloud, examining what readers can expect from cloud services in the next few years, and how research might be changed as a result. Covers a wide range of services, discussing their strengths and weaknesses and showing readers how to use them more effectively Offers a research perspective for readers who don't know how to connect cloud services with academic research Contextualises cloud-based services, explaining not just what they do and how they work, but how they can best be used

The series Studies in Computational Intelligence (SCI) publishes new developments and advances in the various areas of computational intelligence—quickly and with a high quality. The intent is to cover the theory, applications, and design methods of computational intelligence, as embedded in the fields of engineering, computer science, physics and life science, as well as the methodologies behind them. The series contains monographs, lecture notes and edited volumes in computational intelligence spanning the areas of neural networks, connectionist systems, genetic algorithms, evolutionary computation, artificial intelligence, cellular automata, self-organizing systems, soft computing, fuzzy systems and hybrid intelligent systems. Critical to both contributors and readers are the short publication time and world-wide distribution—this permits a rapid and broad dissemination of research results. The purpose of the 10th International Conference on Software Engineering Research, Management and Applications(SERA 2012) held on May 3- June 1, 2012 in Shanghai, China was to bring together scientists, engineers, computer users, and students to share their experiences and exchange new ideas and research results about all aspects (theory, applications and tools) of Software Engineering Research, Management and Applications, and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected 12 outstanding papers from those papers accepted for presentation at the conference in order to publish them in this volume. The papers were chosen based on review scores submitted by members of the program

and further rigorous rounds of review.

In the midst of crisis true heroes are born. Steve Nole is a proud victim of heroism. In the middle of a violent rebellion he successfully works his way up from a bored battalion leader to Commander under insurmountable odds. His journey up the totem pole is a hard trudge being beset by the best and brightest opposition he's faced since he asked to marry his wife. Steve Nole's army encounters a belligerent dictator ' s armies in fierce battle. They fight legendary creatures previously unknown to the modern world and protect others from their wake. Then when the war is over the fledgling nation has to fight a different battle. They have to reconstruct their society after being controlled by a Communist dictatorship, but not everyone in the government is on the right side. A massive riot breaks out in the capitol and 3 heroes: Pascale, Scottie, and James have to get to the bottom of the rebellion in order to 'nip it in the bud'. If they succeed they save the entire nation. If they fail then the country they fought to build will be destroyed.
