A unique and outstanding military and industrial achievement, the Collins class submarine project was also plagued with difficulties and mired in politics. Its story is one of heroes and villains, grand passions, intrigue, lies, spies and backstabbing. It is as well a story of enormous commitment and resolve to achieve what many thought impossible. The building of these submarines was Australia's largest,

most expensive and most controversial military project. From initiation in the 1981-2 budget to the delivery of the last submarine in 2003, the total cost was in excess of six billion dollars. Over 130 key players were interviewed for this book, and the Australian Defence Department allowed access to its classified archives and the Australian Navy archives. Vividly illustrated with photographs from the

Nonfiction One of Pearl Jam's Jeff Ament's Top 10 of 2018 It's no surprise that surfers like to party. The 1960-70s image, bolstered by Tom Wolfe and Big Wednesday, was one of mild outlaws--tanned boys refusing to grow up, spending their days drinking beer and smoking joints on the beach in between mindless hours in the water. But in the 1980s, as surf brands morphed into multibillion-dollar companies, the derelict portrait began to harm business. The external surf image became

Kelly Slater and Laird Hamilton, beacons of health, vitality, bravery, and clean-living. Internally, though, surfing had moved on from booze and weed to its heart's true home, its soul's twin flame: cocaine. The rise of cocaine in American popular culture as the choice of rich, white elites was matched, then quadrupled, within surf culture. The parties got wilder, the nights stretched longer, the stories became more ridiculously unbelievable.

And there has been no stopping, no dip in passion. It is a forbidden love, and few, if any, outside the surf world know about this particular rhapsody. Drug use is kept very well-hidden, even from insiders, but evidence of its psychosis rears its head from time to time in the form of overdoses, bar fights, surf contests, murders, and cover-ups. Cocaine + Surfing draws back the curtain on a hopped-up, sometimes-sexy, sometimes-deadly relationship and uses cocaine as the

Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the

- physical principles of various material handling systems;
- considerations in selecting technically efficient and environmentally friendly equipment;
- best practices in upgrading and optimizing existing bulk material handling facilities;
- strategies to select proper equipment in the early phases of a new project.

Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.
